Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details

A tornado with estimated peak winds of 110 mph touched down near Sandy Creek, southwest of the intersection of N 8th Road and E 8th Road. The tornado moved northeast through fields and crossed E 9th Road. The tornado crossed Route 17 where it snapped large tree limbs off the top of a tree and blew down a utility pole. Windows were also blown out of a nearby house. The tornado destroyed multiple machine sheds in the 900 block of Route 17 with debris strewn almost a mile downstream. Storm chaser video showed at least three fast moving sub-vortices as the tornado continued northeast crossing E 10th Road. The tornado then reached its maximum width of nearly 500 yards with significant cycloidal markings in a field east of E 10th Road. The tornado continued moving northeast until it ended in a field south of N 10th Road. High resolution satellite imagery was used to determine most of the path of this tornado.

LA SALLE COUNTY --- 1.9 N LEEDS [41.05, -88.99]

06/11/26 16:32 CST		0	Thunderstorm Wind (EG 65 kt)

A tornado with estimated peak winds of 145 mph touched down in a field southwest of the intersection of E 2600 North Road and N 190 East Road. The tornado moved north through Long Point where it caused tree damage. Sporadic tree damage continued near Ancona and in Reading Township . The tornado intensified as it crossed Route 23 where it blew a grain bin off its foundation and dragged it for approximately 700 yards. Drone imagery near this location showed a truck that was dragged at least 200 yards through a field. Damage to trees and utility poles also occurred near Route 23. A grain bin was destroyed just south of E 3150 North Road. The tornado crossed the Vermilion River where it destroyed a car port , a garage, flipped a camper, damaged the roof of a home and caused tree damage. A single story home partially constructed in place and partially modular was heavily damaged near the intersection of Aquaduct Road and E W Road . The tornado continued moving northeast where it crossed into LaSalle County just east of Prairie View Road . Crop damage also occurred in most of the path of the tornado in Livingston County.

A tornado with estimated peak winds of 105 mph touched down along County Road E 2200 North, west of Route 23. The tornado may not have been fully condensed to the ground or consisted of intermittent touchdowns along the first two thirds of the path where only minor tree damage was noted. A photo from a storm chaser showed a couple of mesovortices crossing Interstate 55. Minor tree damage continued as the tornado moved through Odell and areas west of Route 47. Based on storm chaser videos, the tornado appeared to rapidly strengthen and widen while crossing Route 47. Sporadic tree damage continued along the path until utility poles were broken and leaning along E 3000 North Road and N 3100 East Road. Drone imagery showed swirl marks in fields west of N 3200 East Road. Several outbuildings and a garage were destroyed just east of N 3200 East Road and a house had a significant portion of its roof structure removed. Several farm buildings and a garage were destroyed just east of N 3300 East Road, south of Route 17. A large barn was tipped on its side. Significant tree damage also occurred. The porch roof on a house collapsed along Route 17 in Blair. A wall of a farm building was removed with debris blown into a field. The tornado continued northeast and ended in a field near railroad tracks, just south of the Livingston LaSalle County line.

Storm Data and Unusual Weather Phenomena - June 2026

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details

A tornado which touched down near Long Point in Livingston County , moved northeast and crossed into LaSalle County just east of Prairie Grove Road and was likely at peak intensity as it crossed into LaSalle County as well as at its maximum width of 600 yards. The tornado heavily damaged several houses along E 12th Street and Sunbury Drive. Only the inner-most walls of a one-story house on E 12th Street remained standing. Two people in the house were both injured, a woman who suffered lacerations across her body and a man who suffered leg or ankle injuries and was rescued by police officers . A total of 7 people were injured in this area, 4 of whom were transported to a local hospital. The tornado crossed Route 18 and moved generally north along Airport Road. Just north of Route 18, a garage and a farm outbuilding were destroyed and a house suffered minor roof damage . South of N 14th Road a split-level house lost a good portion of its exterior walls and its entire roof. A detached garage was destroyed. Numerous utility poles were blown down along E 1st Street. The tornado continued northeast until it ended in a field north of N 1475th Road.

LIVINGSTON COUNTY --- 1.0 SE MISSAL [41.09, -88.73], 1.0 E MISSAL [41.10, -88.72]

	06/11/26 16:55 CST	0	Tornado (EFU, L: 0.80 mi , W: 250 yd)
	06/11/26 16:56 CST	0	Source: Storm Chaser

Based on video from several storm chasers, a brief tornado began in a field between N 975 East and N 1100 East Roads. The video clearly showed the tornado crossed E 3200 North Road and dissipated in a field just south of the LaSalle County line. This tornado did not produce any known damage.

A tornado with estimated peak winds of 120 mph touched down in the Spears-Pioneer Woods Forest Preserve just north of 95th Street damaging trees. The tornado moved northeast causing damage to trees, utility poles and minor roof damage across northern Hickory Hills. The tornado crossed Interstate 294 and strengthened on the southeast side of Justice were two apartments had roofs fully removed near 83rd Street and Roberts Road. Six injuries occurred on the top floor of one of these apartment buildings. Another roof was removed from an apartment building near 79 th Street and Oketo Avenue. Numerous other roofs suffered at least minor damage. Damage to trees and utility poles continued. The tornado was likely near its maximum width of 350 yards as it moved through this area of Bridgeview. The tornado weakened as it moved through the Clearing and Garfield areas of Chicago, though damage to roofs, siding and trees continued. The tornado then moved northeast, just north of Midway Airport while it continued to cause tree damage and minor roof damage to houses. The tornado ended near Leamington Avenue, just north of 52nd Street.

	06/17/26 14:45 CST	0	Flash Flood (due to Heavy Rain)
	06/17/26 17:45 CST	0	Source: Public

Flash flooding was reported in many areas of southeast Cook County which resulted in flooded roads, creeks and streams. Widespread street flooding was reported in Chicago Heights. Basement flooding was also reported in Chicago Heights. A car was stalled in one to two feet of water in an underpass along Route 30 and South Halsted Street. In Park Forest, Orchard Drive was closed due to flooding at an underpass near North Street and video showed Andover Street flooded with approximately one foot of water east of Andover Court. Roadway flooding was reported in multiple locations in Thorton, Lansing and Calumet City.

LAKE COUNTY --- 0.2 ESE (C81) CAMPBELL AIRPORT [42.32, -88.07], 0.4 E (C81) CAMPBELL AIRPORT [42.32, -88.06]

	06/17/26 20:32 CST	0	Tornado (EF0, L: 0.24 mi , W: 125 yd)
	06/17/26 20:33 CST	0	Source: NWS Storm Survey

A brief tornado with estimated peak winds of 80 mph touched down in the Saddlebrook Farms subdivision near Blue Heron Circle. Numerous tree limbs were blown down and several trees were uprooted. Three homes on Preakness Lane suffered minor roof and fasica damage. The tornado ended just east of Fox Hunt Way.

A wake low produced high winds during the late morning and early afternoon of June 17th. Wind gusts between 45 mph and 55 mph with a few higher gusts brought down numerous tree limbs. Scattered thunderstorms produced heavy rain and localized flash flooding during the mid afternoon across southeast Cook County. Isolated thunderstorms moved across far northern Illinois during the late evening of June 17th and produced one brief tornado.

MCHENRY COUNTY --- 2.1 E HARMONY [42.16, -88.49], 2.5 E HARMONY [42.16, -88.48]

	06/24/26 16:34 CST	0	Tornado (EF0, L: 0.34 mi , W: 10 yd)
	06/24/26 16:35 CST	0	Source: Emergency Manager

A brief tornado with estimated peak winds of 75 mph touched down in a field north of Harmony Road, approximately a half mile east of Seeman Road. The tornado moved southeast causing damage to the roof of a barn and downing some tree limbs. A few metal panels from the roof of a barn were scattered approximately 200 to 300 yards away. A utility pole was damaged. The tornado ended southwest of the intersection of Harmony Road and Briar Hill Road. A video showed this brief tornado with no clear condensation funnel but swirling debris being lofted.

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details

A strong long track tornado with estimated peak winds of 165 mph touched down in far southeast Lake County and crossed into far southwest Porter County where it quickly intensified. Widespread tree damaged including snapped and uprooted trees occurred along the entire path of the tornado in Porter County. Just east of Route 231 there was a swath of trees where nearly every tree trunk was snapped. Along S 625 W Road, a few farm outbuildings were destroyed and a house suffered roof damage. Several farm buildings, a garage and a manufactured home were destroyed along W 1000 S Road just west of S 500 W Road. Another house suffered major roof damage. A barn and farm outbuildings were destroyed just east of S 475 W Road. Farm buildings and grain bins were destroyed near S 350 W Road. Large trees were snapped and uprooted in this area. The tornado continued moving northeast and strengthened and widened as it moved north of Route 8. The tornado was likely at peak intensity as it moved across eastern Porter County. Several homes were destroyed and two separate sets of high-tension power trusses were sheared apart and collapsed. Significant scouring of the ground and crop damage also occurred. The tornado moved into LaPorte County just north of Slocum Ditch.

NEWTON COUNTY --- 2.3 SW KENTLAND [40.75, -87.47]

	06/11/26 18:57 CST	0	Thunderstorm Wind (EG 60 kt)
	06/11/26 18:57 CST	0	Source: Public

Damage to trees and outbuildings was reported.

NEWTON COUNTY --- 3.2 WSW MOROCCO [40.93, -87.51], 6.5 NNW MT AYR [41.04, -87.33]

	06/11/26 18:58 CST	0	Tornado (EF0, L: 12.60 mi , W: 200 yd)
	06/11/26 19:10 CST	0	Source: NWS Storm Survey

A tornado with estimated peak winds of 85 mph touched down near S 600 W Road just north of the intersection of W 550 S Road and then moved northeast across mainly open farmland. Trees were uprooted, a utility pole was blown down and a farm outbuilding was damaged as the tornado crossed S 500 W Road. The tornado moved through Morocco where a corridor of tree damage occurred. A utility pole was also damaged. The tornado crossed Route 41 where tree limbs were blown down. The tornado continued moving northeast across open farmland where damage was confined to trees and irrigation pivots. The tornado ended just east of the intersection of E 300 N Road and N 300 E Road.

NEWTON COUNTY --- 3.3 SW ADE [40.84, -87.50], 1.8 SE MT AYR [40.93, -87.28]

	06/11/26 18:58 CST	0	Tornado (EF0, L: 13.20 mi , W: 200 yd)
	06/11/26 19:10 CST	0	Source: NWS Storm Survey

A tornado with estimated peak winds of 85 mph touched down in a field northwest of the intersection of S 500 W Road and W 1075 S Road in Washington Township. The tornado moved northeast causing tree damage. As it moved through Ade, roofing material was blown off of a barn. The tornado crossed Route 41 and snapped four utility poles along W 800 S Road, just east of S 100 W Road. As the tornado crossed S 50 W Road, a personal weather station measured a wind gust to 85 mph. A house suffered minor shingle damage and a barn lost a quarter of its roofing material and a wall of the barn partially collapsed. A farm outbuilding was destroyed along S 50 E Road, south of E 700 S Road. A utility pole was snapped near the intersection of E 700 S Road and S 150 E Road. A grain bin was destroyed just south of E 600 S Road near Battleday Ditch. The grain bin was blown into another building causing significant damage. Tree damage continued along the entire path of the tornado including snapped trees northwest of the intersection of E 600 S Road and S 400 E Road. The tornado then crossed S 1200 W Road and into Jasper County.

NEWTON COUNTY --- 1.9 N EFFNER [40.80, -87.52]

	06/11/26 19:00 CST	0	Thunderstorm Wind (MG 60 kt)
	06/11/26 19:00 CST	0	Source: Public

A personal weather station measured a wind gust to 69 mph.

NEWTON COUNTY --- 3.2 ESE CONRAD [41.09, -87.39]

	06/11/26 19:05 CST	0	Thunderstorm Wind (EG 60 kt)
	06/11/26 19:05 CST	0	Source: Trained Spotter

Corn was snapped and an irrigation system was flipped over.

JASPER COUNTY --- 5.2 WSW (RZL) JASPER COUNTY AIRPORT [40.93, -87.28], 3.0 W (RZL) JASPER COUNTY AIRPORT [40.94, -87.24]

A tornado with estimated peak winds of 95 mph touched down between W 700 S Road and Farrell Ditch, just west of S 500 W Road. The tornado damaged a barn and peeled shingles off of a house along S 400 W Road. Sheet metal from the barn was blown into a field several hundred feet to the east. Tree damage occurred as the tornado crossed Route 41. A barn was blown down and at least 5 utility poles were blown down as the tornado crossed S 200 W Road. The tornado turned northeast and blew the press box off of bleachers into a utility pole at a race track . The tornado was likely at peak intensity as it moved through the unincorporated community of Chase were a grain elevator and multiple associated grain bins were destroyed and a couple of tree trunks were snapped. The tornado turned east northeast snapping multiple rows of utility poles from Meridian Road to S 200 E Road and downing another set of power poles in Atkinson. As the tornado reached E 200 S and S 600 E Roads, it blew down more utility poles and a few trees. The roof, chimney and gutters of a house were damaged. A chicken coup was blown into a field, killing 30 chickens. The tornado ended just northeast of the intersection of E 200 S Road and S 600 E Road.

BENTON COUNTY --- FOWLER [40.62, -87.32]

	06/11/26 20:07 EST	0	Thunderstorm Wind (EG 65 kt)
	06/11/26 20:07 EST	0	Source: Amateur Radio

Wind gusts were estimated to 75 mph with power lines blown down just west of Fowler.

BENTON COUNTY --- 2.3 SE TEMPLETON [40.49, -87.18]

	06/11/26 20:24 EST	0	Thunderstorm Wind (MG 56 kt)
	06/11/26 20:24 EST	0	Source: Public

A personal weather station measured a wind gust to 65 mph before data stopped being reported.

Severe thunderstorms moved across northwest Indiana during the afternoon and evening of June 11th producing wind damage, localized flooding and several tornadoes.
