12/27/18 15:00 CST	0	Blizzard
12/28/18 03:00 CST	0	

A potent short wave trough in combination with a strong upper level jet streak resulted in heavy snow falling over many parts of western and central North Dakota. This was quickly followed by deep low pressure that lifted through the Northern Plains bringing additional snow and strong winds. A blizzard resulted over much of central North Dakota including the James River Valley.
