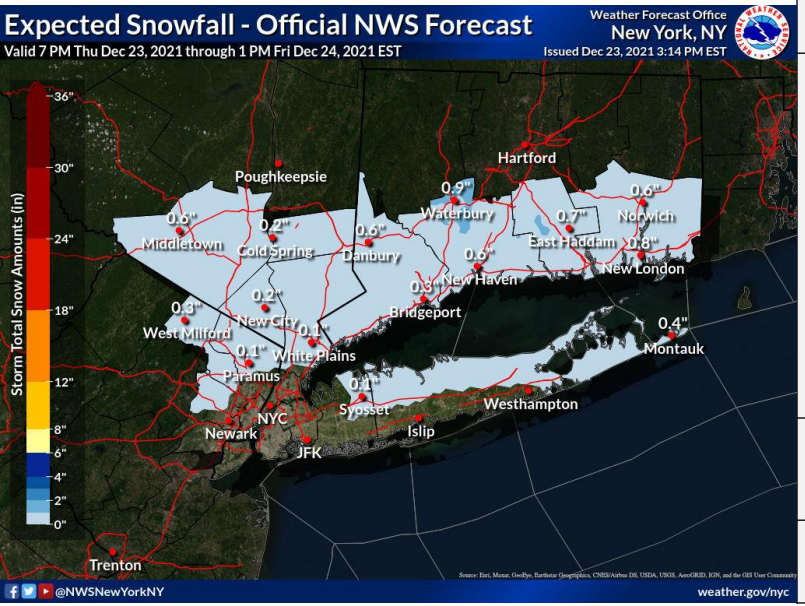
Light Snow Tonight, Light Wintry Mix Fri Night

New York, NY
WEATHER FORECAST OFFICE

OVERVIEW

A quick moving, weak low pressure system will bring a light snowfall to much of the area tonight into early Friday morning. Another quick moving low pressure system will bring a light wintry mix of sleet and freezing rain Friday night into early Saturday morning for the Interior.



TONIGHT INTO FRIDAY MORNING

- **Total Snowfall Tonight into Friday Morning**: ½ to 1” across northern portions of the Lower Hudson Valley and much of Southern CT. Highest amounts likely across hill terrain.
  - Little to no snow accumulation for the NYC/NJ metro and southern and western portions of Long Island.
- **Timing** - A 4 to 6 hour period of light snow between midnight tonight and mid to late morning Friday.
- **Impacts** - This may result in snow covered roads and hazardous travel.

FRIDAY NIGHT INTO SATURDAY MORNING

- **Ice Accumulation Friday Night into Saturday Morning:** A Trace to a few hundredths of an inch across the northern portions of the Lower Hudson Valley and interior Southern CT.
  - Elsewhere for the NYC/NJ metro, Long Island, Coastal CT, and southern Westchester County only plain rain is expected.
- **Timing -** Increasing potential late Friday evening into the overnight, and transitioning to rain by early to mid morning Saturday.
- **Impacts** - This may result in dangerous travel, and icing on untreated and elevated surfaces.

NWS ALERTS

- A Winter Weather Advisory may be needed across the Interior Friday Night into Saturday morning if confidence in ice accretion increases.

NEXT BRIEF

- By 6AM Friday.
