Alaska Weather Information Line

The National Weather Service Alaska Region established the Alaska Weather Information Line as a service to all Alaskans, providing toll-free telephone access to weather information throughout the state. This service is available outside of Alaska, but it is not toll-free.

Weather Forecasts are issued on a regular basis, updated when required and either recorded by National Weather Service staff or automated by a NWS text-to-speech system providing accurate and timely weather information.

• **Public Forecasts** include area (zone) 7-day forecasts with information for major cities in Alaska.

• **Marine Forecasts** are available for all coastal marine areas with outlooks to 5 days.

• **Observations** from certain land stations and marine buoys are available. This information is updated once per hour.

The menu system is organized according to geographical area: Northern, Southwestern, South Central, and Southeastern.

Complete and comprehensive weather information, including forecasts, warnings, statements, climatological data, and observations are available on-line.

www.arh.noaa.gov

General Instructions:

- Dial the Alaska Weather Information Line.
- Listen to the menu options and make your selection for the area you want.
- Forecast areas are listed inside this leaflet.

Once you are familiar with the menu options you can enter the numbers at any time without listening to the entire message.

Example: The forecast for Shelikof Strait can be obtained by pressing 3 3 2 4.

- 3 – South Central Alaska Menu
- 3 – Kodiak Menu
- 2 – Marine Menu
- 4 – Shelikof Strait

Press the pound sign at any time to return to the previous menu.
