**DEAF SMITH COUNTY --- HEREFORD [34.82, -102.40]**

	06/04/09 18:00 CST		15K	Thunderstorm Wind (EG 70 kt)
	06/04/09 18:02 CST		0	Source: Fire Department/Rescue

The Hereford Fire Department reported that a roof had been blown off a lumber yard and that small tree limbs were downed by the strong thunderstorm wind gusts.

**Thunderstorms moved off the higher terrain of New Mexico into the Panhandles during the evening. A moist and unstable air mass was located across the Panhandles...which allowed thunderstorms to intensify as they tracked across the area. Reports of hail...straight-line wind damage...and a few brief tornado touchdowns were received. No damage or injuries were reported from these storms.**

The general public located about eight miles north of McLean estimated thunderstorm wind gusts of fifty-six knots which knocked down a few tree limbs.				
<b>HARTLEY COUNTY --- 7.9 NE CHANNING [35.76, -102.23]</b>				
	06/05/09 22:30 CST		0	Thunderstorm Wind (EG 52 kt)
	06/05/09 22:31 CST		0	Source: Public
The general public located eight miles northeast of Channing estimated thunderstorm wind gusts of fifty-two knots.				
<b>Severe thunderstorms moved across much of the northwestern...central and southern Texas Panhandle during the late afternoon and evening hours. Large hail and damaging winds along with an isolated tornado accompanied these severe thunderstorms. No injuries were reported.</b>				
<b>(TX-Z015) WHEELER, (TX-Z019) DONLEY</b>				
	06/07/09 09:30 CST		17K	High Wind (MAX 56 kt)
	06/07/09 11:01 CST		0	
A tight surface pressure gradient during the late morning and early afternoon hours produced strong non-thunderstorm wind gusts. Although some damage occurred from these strong winds...no injuries were reported.				
A city official reported that two pop up trailers were turned over by strong winds estimated to be fifty-six knots at Greenbelt Lake. Also...numerous tree limbs and one large tree were blown down. The large tree was a cottonwood that had snapped off about five feet from the base. A portable toilet and dumpsters were turned over along with many other small objects. No injuries were reported.				

## Storm Data and Unusual Weather Phenomena - June 2009

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

The general public in Allison reported that two large trees had snapped due to strong non-thunderstorm wind gusts estimated to be fifty-six knots. The public also reported that a wind turbine had blown off of a storage building. The strong winds had also caused damage to the storage buildings.

	06/15/09 17:23 CST		0	Tornado (EF0, L: 0.25 mi , W: 50 yd)
	06/15/09 17:29 CST		0	Source: Trained Spotter
<p>Trained spotters observed one tornado touch down briefly around 1723 CST about five miles east of Wolf Creek Park. This tornado lifted back up less than a minute later. There were additional tornadoes that briefly touched down as witnessed by dust and grass being lifted up around the circulation. The tornadoes were located in open country with the last tornado lifting at 1729 CST. The trained spotter was located about two miles from the tornadoes. The path length of the tornadoes was around a quarter of a mile with a width of around fifty yards.</p>

	06/27/09 19:30 CST		0	Source: Emergency Manager

Vehicles were stalled on Georgia Street due to flooding and the road was completely covered. The water was reportedly over the sidewalks and up to buildings. The forty-second block of Crockett Street was reportedly under water and water was up to car doors at Washington Street and 27th Street. Also...vehicles were reported to be stalled at 6th Avenue and Bowie Street and northbound Georgia Street was not passable due to high water. The Potter County and Amarillo Emergency Manager reported stalled vehicles at every intersection from Georgia Street and Interstate 40 to Georgia Street and Hawthorne Drive. A river of water a few feet deep was flowing down Interstate 27 at the low areas between Washington Street and the 34th Street bridges. Also...rapidly flowing water about three feet deep was flowing along Georgia Street from 10th Street north through McMasters Street. Major flooding was reported in the San Jacinto Park area. There was also a report of the road caving in at Interstate 40 and Washington Street due to the flooding. Water was reported to be across the entire roadway on Georgia Street and was impassable. The road reportedly buckled at Southwest 3rd Avenue and Hayden Street.
