Storm Data and Unusual Weather Phenomena - April 2007

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
(AL-Z007) MORGAN, (AL-Z008) MARSHALL, (AL-Z009) JACKSON, (AL-Z010) DEKALB, (AL-Z016) CULLMAN				
	04/01/07 00:00 CST		0	Drought
	04/30/07 23:59 CST		0	
<p>The dry weather continued in April, but there was some limited short-term relief. A few locations tallied near normal rainfall for the month, including Courtland and the north side of Huntsville. The southern and western portions of north Alabama, did not fare so well, with rainfall deficits of two to four inches for the month. Many locations increased their 2007 precipitation deficits to between eleven and thirteen inches of precipitation.</p> <p>Virtually the entire region spent much or all of April in the D3 status (Extreme Drought) on the U.S. Drought Monitor. Impacts were reported from across the area by agricultural interests. A late season freeze on April 7th and 8th added to the agricultural stress as well.</p>

Public and law enforcement reported hail in the Ider area. This hail occurred as a line of thunderstorms moved across the area.

MARSHALL COUNTY --- 1.5 SSE LITTLE NEW YORK [34.36, -86.17]

04/03/07 22:57 CST	0	Thunderstorm Wind (EG 60 kt)
04/03/07 22:57 CST	0	Source: Emergency Manager

A squall line knocked down power lines near Martling.

A couple isolated thunderstorms moving east across the northern half of Alabama during the late morning dropped some hail in north central Alabama. The combination of an unstable airmass and outflow boundaries from the earlier storms helped to initiate other hail storms during the afternoon in north central and northeast Alabama.

MADISON COUNTY --- 2.3 WNW ELKWOOD [34.99, -86.77], 1.1 S HAZEL GREEN ARPT [34.90, -86.65]

04/03/07 21:26 CST	0	Tornado (EF0, L: 8.96 mi , W: 75 yd)
04/03/07 21:37 CST	0	Source: NWS Storm Survey

This tornado developed in extreme southwest Lincoln County, Tennessee and moved southeast across northwest Madison County, Alabama. The damage caused by this tornado was mainly a few snapped utility poles and downed trees, but there also was some minor damage to a few homes. Wind speeds were estimated at 60 m.p.h.

JACKSON COUNTY --- 1.1 SSE DAVISTOWN [34.54, -86.01], 3.6 SE DAVISTOWN [34.51, -85.98]

04/03/07 22:33 CST	0	Tornado (EF1, L: 2.57 mi , W: 100 yd)
04/03/07 22:35 CST	0	Source: NWS Storm Survey

This tornado formed three miles east of the Langston community, which is just south of the Tennessee River in southern Jackson County, and moved to the southeast before ending one mile southeast of the Macedonia community near the Macedonia Primitive Baptist Church. Most of the damage along its path was rated EF-0, except for a small area of EF-1 damage in Macedonia where maximum wind speeds were estimated to be 95 m.p.h.

About half a mile from the crossroads at Macedonia on County Road 38, the tornado did the most damage. Parts of a two-story family dwelling roof and siding were carried away, a couple century old hardwood trees were uprooted, a large outbuilding was completely destroyed, and the roof was ripped off another nearby building. Some of the debris from this property was scattered more than half a mile away. At the Corinth Missionary Church windows were broken and fascia board was ripped from the main structure, while another smaller building on the church property was blown slightly off its foundation. Roofing shingles were ripped off Macedonia Primitive Baptist Church and parts of Macedonia school, where a communications tower was bent in half.

DEKALB COUNTY --- 1.1 NW COLLBRAN [34.38, -85.80]

04/03/07 23:03 CST	0	Thunderstorm Wind (EG 60 kt)
04/03/07 23:03 CST	0	Source: Emergency Manager

Straight-line winds produced by a squall line moving southeast through the area caused a tractor trailer truck to overturn on I-59 about 5 miles south of Highway 35 in Fort Payne. The accident caused damage to both the truck and its cargo and blocked northbound traffic for roughly two hours. The driver was not injured.

A line of thunderstorms developed across the Mid Mississippi Valley during the afternoon hours and moved southeast into the Tennessee Valley during the overnight hours. After several cell mergers as the line moved into southern middle Tennessee, the line intensified and accelerated southeast across northern Alabama. Two tornadoes developed in the vicinity of mergers of the squall line with thunderstorms that developed ahead of the line.

(AL-Z001) LAUDERDALE, (AL-Z002) COLBERT, (AL-Z003) FRANKLIN, (AL-Z004) LAWRENCE, (AL-Z005) LIMESTONE, (AL-Z006) MADISON, (AL-Z007) MORGAN, (AL-Z008) MARSHALL, (AL-Z009) JACKSON, (AL-Z010) DEKALB, (AL-Z016) CULLMAN

04/07/07 01:00 CST	0	Frost/Freeze
04/08/07 08:00 CST	0	

An arctic blast of unseasonably record cold produced an unprecedented hard freeze to the entire Tennessee Valley on the mornings of April 7 and 8, and either freezing or near freezing conditions on the preceding (6th) and following day (9th). This resulted in total losses of area fruit crops including strawberries, blueberries, and peaches. Pecans, corn and wheat crops were also damaged. Economic losses totalling in the millions of dollars are anticipated. Lows in many areas dropped into 20s both mornings. The coldest temperature reports were 23 degrees Fahrenheit at Belle Mina and Valley Head. Many locations, especially rural, experienced temperatures below 32 degrees Fahrenheit from 20 to 30 hours over the span of the 6th through 10th.

Normally, the probability of temperatures dipping into the 20s this late in the season is 10 percent or less. Also of note, NASA MODIS remote sensing satellite imagery over the central Tennessee Valley revealed distinct changes from green vegetative and tree color before to an auburn and brown color, especially notable atop the Cumberland Plateau region of northeast Alabama and southern middle Tennessee.

Storm Data and Unusual Weather Phenomena - April 2007

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
COLBERT COUNTY --- 1.2 NNW CHEROKEE [34.77, -87.98]

Thunderstorm winds produced considerable damage to a roof and work shop of a residence. A tree was also blown down onto a car causing damage to a wind shield.

A narrow squall line of strong to severe thunderstorms tracked along a potent cold front which tracked east across the Ohio and Tennessee Valleys. Although deep layer wind shear was present, reports of severe weather were isolated with these thunderstorms as they entered northwest Alabama due to weak instability.

MADISON COUNTY --- 519.8 WNW MAPLE HILL [37.81, -95.39]				
	04/14/07 09:09 CST		0	Hail (1.00 in)
	04/14/07 09:09 CST		0	Source: NWS Employee

Quarter-sized hail was reported.

A series of showers and thunderstorms during the morning hours of the 14th produced heavy downpours and isolated hail across north Alabama. The rain and thunderstorms were ahead of a cold front which tracked east through the mid and deep South into the Southeast. Heavy rain was aided by moist southerly inflow from the Gulf of Mexico. Rainfall amounts of around 2 inches were reported in and around Decatur, producing local urban flooding in a poor drainage area of town.

ALABAMA, Southeast

COFFEE COUNTY --- 2.0 WSW ELBA [31.41, -86.10]

	04/14/07 18:05 CST		0.25M	Tornado (EF1, L: 5.83 mi , W: 150 yd)
	04/14/07 18:12 CST		0	Source: Emergency Manager

A tornado touched down on County Road 38 producing minor damage to a barn. It then traveled east across Marley Mill Road and destroyed a barn, shed and greenhouse. A residential gable collapsed and several pines were snapped. A few homes on Hawridge Road in the Post Oak community suffered moderate damage. Also, a carport and shed were destroyed. A portion of County Road 50 was closed due to debris. Also, a home on Robin Parker Road was damaged when several pines snapped, with one landing on the roof. Several areas, especially along Roy Parker Road, were without power for several hours until crews could repair lines taken down by fallen trees.

DALE COUNTY --- 1.0 S OZARK [31.44, -85.65]				
	04/14/07 18:10 CST		10K	Thunderstorm Wind (EG 60 kt)
	04/14/07 18:10 CST		0	Source: Emergency Manager

Straight-line winds tore the canopy off a gas station. There were several reports of downed trees and power lines.

Severe thunderstorms produced hail and wind damage in southwest Alabama.

WASHINGTON COUNTY --- 0.9 E YARBO [31.53, -88.27]

04/14/07 11:10 CST	0.50M	Thunderstorm Wind (EG 78 kt)
04/14/07 11:15 CST	0	Source: NWS Storm Survey

The large bow echo that moved across southeast Mississippi continued into southwest Alabama. Numerous trees and powerlines were blown down near Yarbo. Several of the trees landed on homes causing roof damage. A well-built garage was completely destroyed by the high winds. It appeared that the highest winds along the bow struck the garage broadside. No injuries were reported. This same area was struck by a tornado a few months before.

CLARKE COUNTY --- 1.2 SE SALITPA [31.61, -88.01]

04/14/07 11:38 CST	40K	Thunderstorm Wind (EG 50 kt)
04/14/07 11:40 CST	0	Source: NWS Storm Survey

The large thunderstorm bow echo continued moving east and blew down several trees and powerlines near Salitpa. A few of the trees fell on homes and caused roof damage. Heavy rains also caused minor street flooding.

MONROE COUNTY --- 2.8 ENE MONROEVILLE [31.54, -87.29]

04/14/07 12:28 CST	0	Thunderstorm Wind (EG 87 kt)
04/14/07 12:30 CST	1M	Source: NWS Storm Survey

A little northeast of Vredenburgh, a huge downburst occurred. Hundreds of eighteen year old pine trees in a one-half mile area were blown down. The damage occurred in a large pine forest farm. This pattern had the classic appearance of a microburst from the air. Foresters' estimated damage at neat 1 million dollars. A few minutes later a tornado struck around the same area.

MONROE COUNTY --- 0.3 ESE VREDENBURGH [31.82, -87.32], 1.2 E VREDENBURGH [31.82, -87.30]

04/14/07 12:33 CST	0.75M	Tornado (EF1, L: 1.06 mi , W: 200 yd)
04/14/07 12:36 CST	0	Source: NWS Storm Survey

A few minutes after the huge microburst occurred, a tornado touched down just southwest of County Road 56 south of Vredenburgh. Most of the structural damage occurred north of County Road 56. A very old home was pushed from its blocks and roof was lifted off. The tornado then moved northeast and damaged a church that was located near the home. Many trees were blown down in this area. Another church a few hundred yards to the northeast of the first church had part of the back of the building blown off. A convergence pattern was observed in the fallen trees from southwest of County Road 56 to northeast of the home. The tornado either dissipated or went back into the clouds near the second church. The tornado wind speed was estimated at 105 mph. No injuries were reported. People who lived only a short distance away said they never heard or observed the tornado. The tornado ended near where a huge microburst had occurred a few minutes earlier.

WILCOX COUNTY --- 5.2 SW FATAMA [31.85, -87.29], 1.8 WSW WATSONVILLE [31.86, -87.20]

04/14/07 12:41 CST	0.20M	Thunderstorm Wind (EG 60 kt)
04/14/07 12:43 CST	0	Source: NWS Storm Survey

The Vredenburgh storm took on a bow-shaped appearance again as it entered Wilcox County and did sporadic damage to trees for another five to six miles. The storm continued northeast and crossed State Highway 265. The storm damaged some out buildings on County Road 45. The storm lost its intensity near County Road 45 and no other damage was found north of County Road 45.

CRENSHAW COUNTY --- 4.9 NW SAVILLE [32.03, -86.39], 5.1 NW SAVILLE [32.03, -86.39]

04/14/07 15:00 CST	0.10M	Tornado (EF0, L: 0.54 mi , W: 40 yd)
04/14/07 15:02 CST	0	Source: NWS Storm Survey

A weak EF-0 tornado did some minor damage in the extreme north part of the county near Clearview. The tornado touched down near County Road 11 and damaged a poultry farm, three of the buildings on the farm had their tin roofs damaged. Three other buildings had parts of their roofs taken off. None of the chickens were injured. An eye witness said the tornado looked like pencil dropping out of the sky. The tornado continued northeast and dissipated near Hwy 97. A church located in this area had shingles taken off and a tree fell on the roof.

CONECUH COUNTY --- 2.5 NNW CASTLEBERRY [31.33, -87.04]

04/14/07 16:12 CST	0.15M	Tornado (EF1, L: 0.25 mi , W: 50 yd)
04/14/07 16:14 CST	0	Source: NWS Storm Survey

A weak tornado developed along the leading edge of a large bow echo just northwest of Castleberry. The tornado blew down trees and damaged a residence just west of County Road 23. Estimated wind speeds were 85 to 90 mph. No injuries occurred.

Storm Data and Unusual Weather Phenomena - April 2007

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
CONECUH COUNTY --- 2.5 NNW CASTLEBERRY [31.33, -87.04], 6.0 NE CASTLEBERRY [31.36, -86.95]				
	04/14/07 16:12 CST		0.25M	Thunderstorm Wind (EG 70 kt)
	04/14/07 16:19 CST		0	Source: NWS Storm Survey

A large bow shaped thunderstorm complex began near Interstate 65 just west of Castalberry. The complex moved east northeast blowing down several trees. Most of the damage occurred near Hwy 31 where the bow shaped complex broad sided several structures. Two homes and one barn were damaged here. This is also where the weak tornado occurred. The system continued tracking east northeast blowing down numerous trees along its path. The bow shaped complex weakened near Nymph.

COVINGTON COUNTY --- RED LEVEL [31.40, -86.62]				
	04/14/07 16:51 CST		10K	Thunderstorm Wind (EG 50 kt)
	04/14/07 16:53 CST		0	Source: Emergency Manager

High winds from a thunderstorm blew down several trees along Hwy 55 east of Red Level.

CONECUH COUNTY --- EVERGREEN [31.43, -86.97], CASTLEBERRY [31.30, -87.02]				
	04/14/07 17:30 CST		0	Flash Flood (due to Heavy Rain)
	04/14/07 18:15 CST		0	Source: Emergency Manager

Heavy rains from slow moving thunderstorms dropped 3 to 5 inches of rainfall across the central part of the county. Several secondary roads had to be closed for about an hour due to high water.

ESCAMBIA COUNTY --- WALLACE [31.20, -87.23], FOSHEE [31.12, -87.23]				
	04/14/07 17:30 CST		0	Flash Flood (due to Heavy Rain)
	04/14/07 18:15 CST		0	Source: Emergency Manager

Heavy rains from slow moving thunderstorms dropped 3 to 5 inches of rainfall across the north central part of the county. Several secondary roads had to be closed for about an hour due to high water.

Large bow echo continued moving east across Alabama producing significant damage along its path.

CRENSHAW COUNTY --- RUTLEDGE [31.73, -86.32]				
	04/26/07 11:11 CST		7K	Thunderstorm Wind (EG 50 kt)
	04/26/07 11:13 CST		0	Source: Emergency Manager

Severe thunderstorms caused tree and outbuilding damage southwest of Rutledge.

CRENSHAW COUNTY --- LUVERNE [31.72, -86.27]				
	04/26/07 11:25 CST		0	Funnel Cloud
	04/26/07 11:27 CST		0	Source: Emergency Manager

A funnel cloud was observed just north of Luverne. No damage occurred.

Severe thunderstorms produced wind damage in south central Alabama.
