TURN AROUND DON'T DROWN®

Each year, more deaths occur due to flooding than from any other thunderstorm related hazard. Why? The main reason is people underestimate the force and power of water. Many of the deaths occur in automobiles as they are swept downstream. Of these drownings, many are preventable, but too many people continue to drive around the barriers that warn you the road is flooded.

Whether you are driving or walking, if you come to a flooded road, **Turn Around Don't Drown**. You will not know the depth of the water nor will you know the condition of the road under the water.

Follow these safety rules:

- Monitor the NOAA Weather Radio, or your favorite news source for vital weather related information.
- If flooding occurs, get to higher ground. Get out of areas subject to flooding. This includes dips, low spots, canyons, washes etc.
- Avoid areas already flooded, especially if the water is flowing fast. Do not attempt to cross flowing streams. **Turn Around Don't Drown**
- Road beds may be washed out under flood waters. NEVER drive through flooded roadways. **Turn Around Don't Drown** If your vehicle is suddenly caught in rising water, leave it immediately and seek higher ground.
- Do not camp or park your vehicle along streams and washes, particularly during threatening conditions.
- Be especially cautious at night when it is harder to recognize flood dangers.

Total Forecast Snowfall

- Less than an inch
- 1 to 2 inches
- 2 to 3 inches
- 3 to 4 inches
- 4 to 6 inches
- 6 to 8 inches
- 8 to 10 inches
- 10 to 12 inches
- 12 to 15 inches
- 15 to 18 inches
- 18 to 21 inches
- 21 to 27 inches
- 27 to 33 inches

Valid ending at Thursday May 21st, 2015 at 7 PM CDT

What if I am traveling into the Mountains Monday night into Tuesday?

- **Travel into the high country including I-70 will may become hazardous Monday Night and Tuesday**
- **Roads above 10,000 feet will likely become slushy or snowpacked.**
- **Low visibilities may also make travel difficult in the heavier snow showers**
