

Weather Briefing

1030 AM
Friday, May 26, 2017

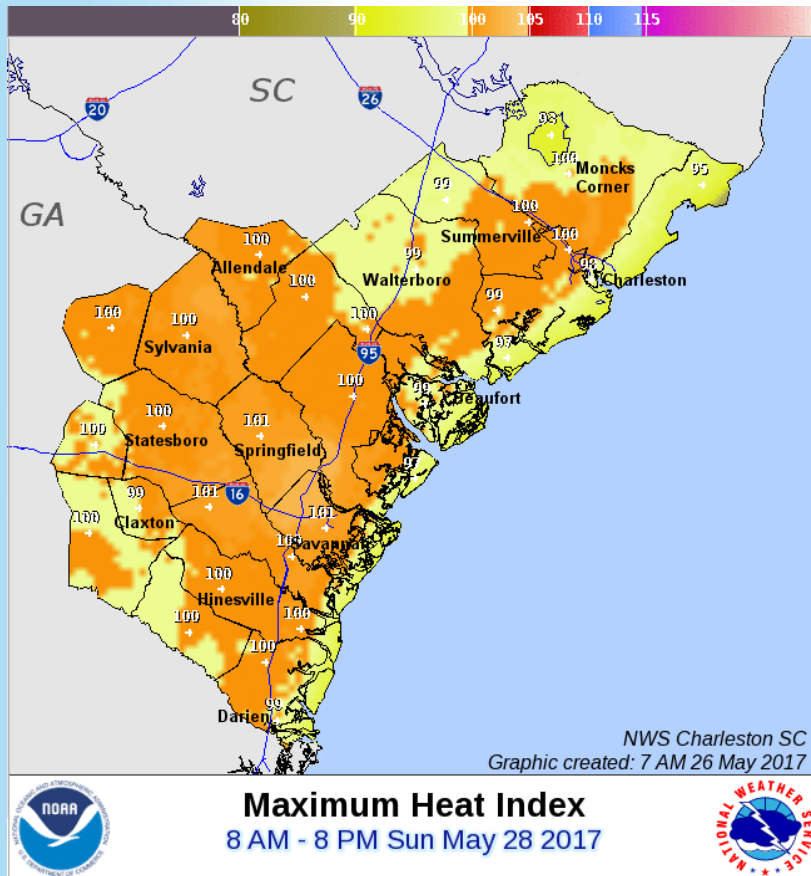

Disclaimer: *The information contained within this briefing is time-sensitive, and could affect its validity as the date/time moves away from when the briefing was created.*

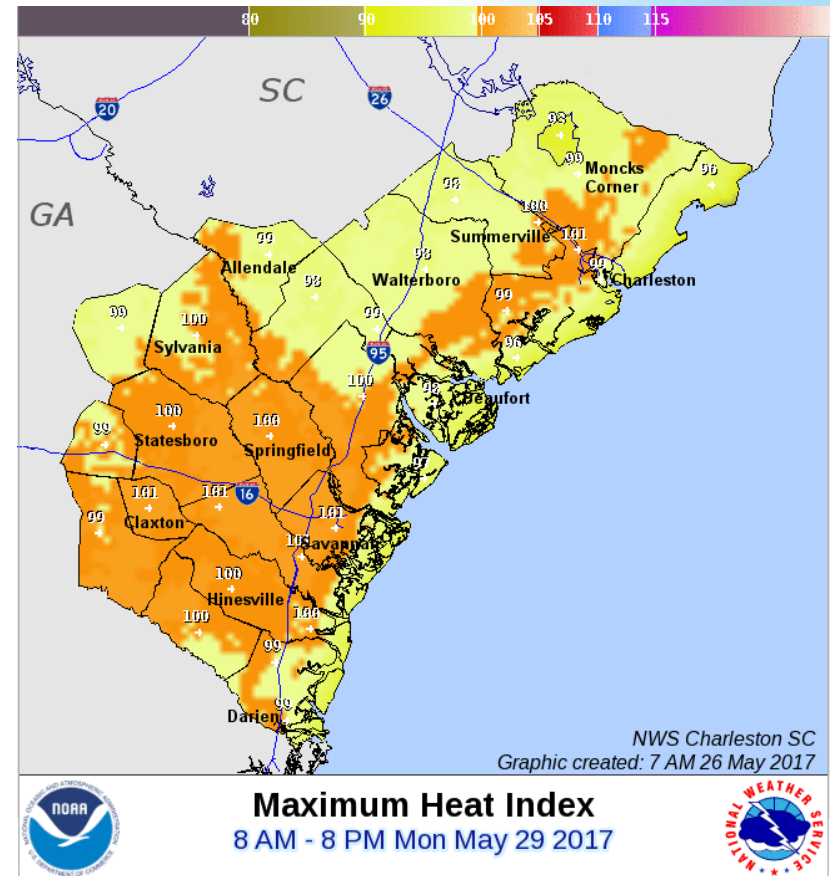

Highlights

- Isolated thunderstorms possible far northwest Sunday afternoon/evening. Cannot rule out a strong or severe thunderstorm.
- A chance for mainly afternoon and evening thunderstorms Monday through Friday. A few could be severe, mainly Monday and Tuesday.
- Shallow coastal flooding possible mainly along the southeast South Carolina coast with the evening high tides this evening through Sunday evening.
- Increasing heat indices over the weekend, possibly approaching 105 degrees on Sunday and Monday.
- Flooding to continue on South Santee River at Jamestown.
- Small craft advisory conditions are possible early next week.

Maximum Heat Index

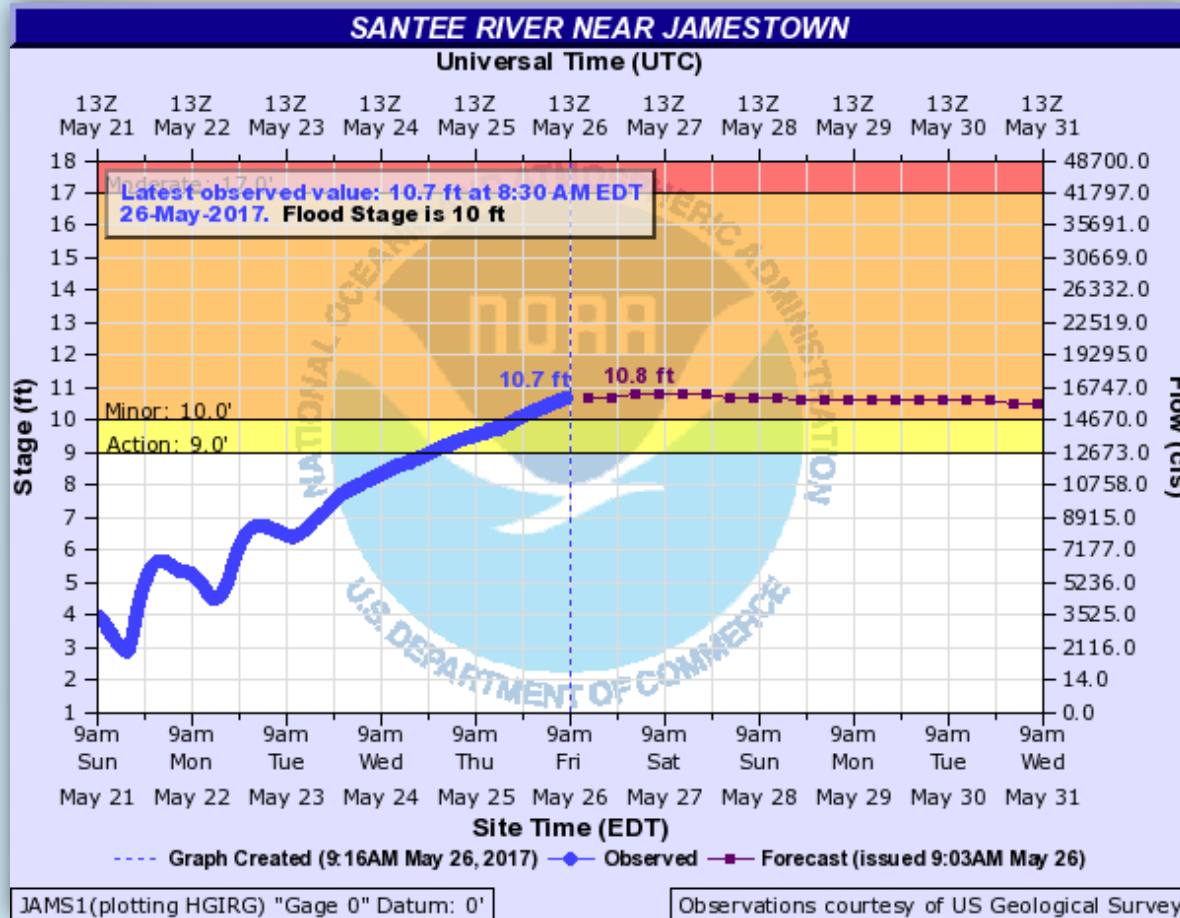

Sunday

Monday

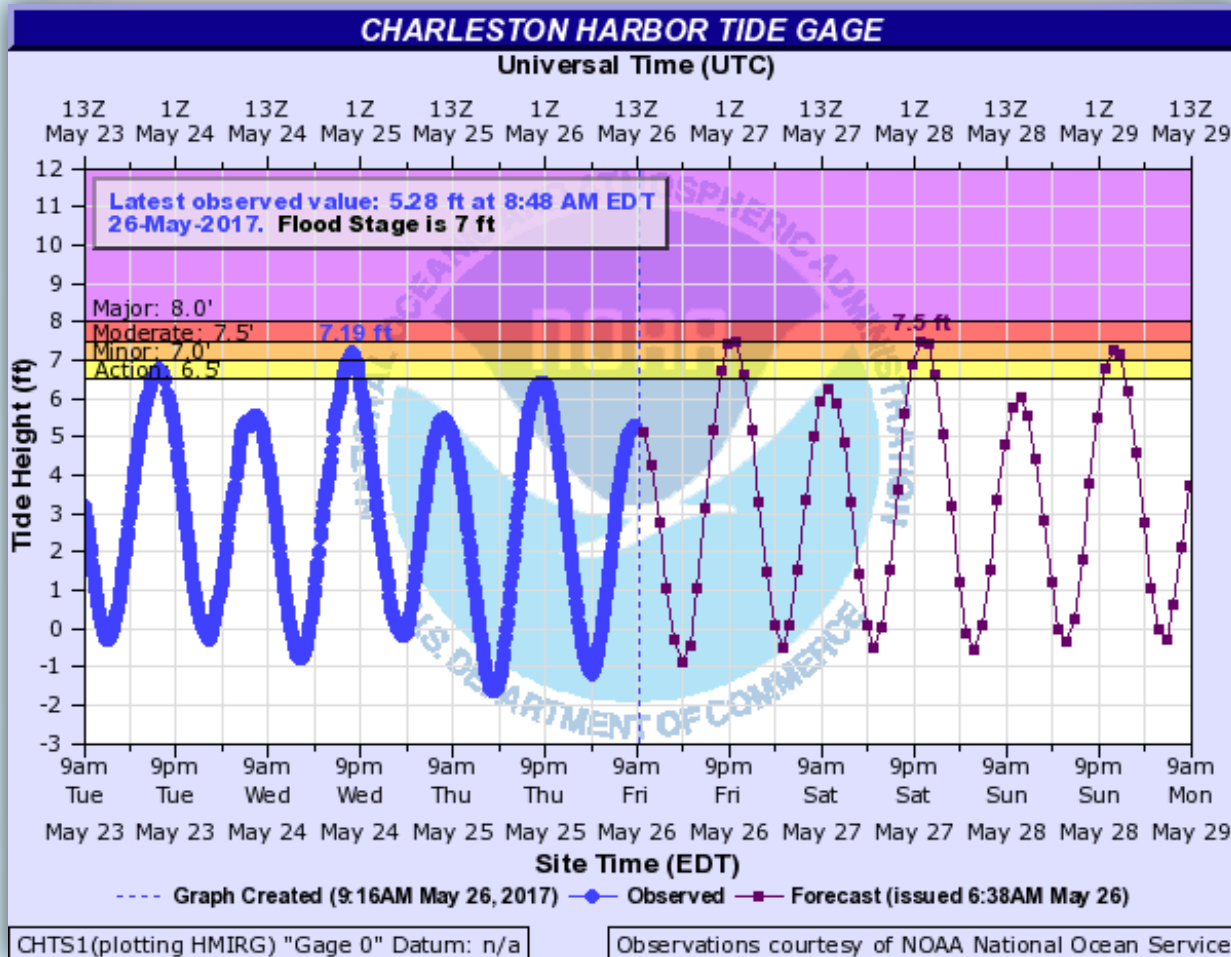

Heat indices as high as 103 forecast for Sunday and Monday. Heat advisories issued prior to July if 105 is reached for at least 2 hours.

Santee River

Minor flooding will continue through at least the middle to end of next week.

Tide Gages

Shallow coastal flooding possible with the evening high tides through Sunday evening, mainly along the southeast South Carolina coast.
