

# Want to be a Weather Observer?

cocorahs.org

*CoCoRaHS is a grassroots, non-profit, community-based, high-density precipitation network made up of volunteers of all backgrounds and ages who take daily measurements of precipitation, snowfall and snow depth in their backyards.*

**JOIN  
CoCoRaHS**

The National Weather Service is looking for precipitation observers across Minnesota and North Dakota.

All you need is a 4" diameter rain gauge and internet access.

We offer training and guidance on how to observe the weather.

**CoCoRaHS: Community Collaborative Rain, Hail, and Snow Network**

For more information, go to: [www.cocorahs.org](http://www.cocorahs.org)

***Volunteers of all ages and backgrounds already may be measuring precipitation in their own backyards as part of the CoCoRaHS Network. Data are being used by meteorologists, hydrologists, emergency managers, and many others. Data are used for many applications, such as water resource planning, severe storm warnings, or teaching. Interested? Please consider becoming a volunteer at [cocorahs.org](http://cocorahs.org).***
