Drought

01/31/14 23:59 CST

14K

Most of north Texas was classified as being drought-free, or experiencing merely "abnormally dry" or moderate/D1 conditions for the month of January 2014. The exceptions included a small section of severe drought over far western portions of the region, and areas along the parched Colorado River Basin.

Winter Weather

01/24/14 02:00 CST

0

Cold arctic air and modest amounts of moisture resulted in light freezing rain, sleet and snow over southern portions of North Texas. Slick roads resulting from the wintry precipitation caused several accidents.
