The body of a rancher was found in flood waters along Big Creek after the creek rose up onto the rancher's property. The rancher disappeared on the evening of the 9th when we went out to move cattle out of the flood waters. His body was recovered on his property under 5 feet of water on the 11th.				
Direct Fatalities: M56OU				
<b>This was a multi-day severe weather and flood event. It started with a large-scale upper level low pressure system which deepened over the Four-Corners region. Moisture and instability increased in advance of this system. Storms developed along a dry line Monday afternoon, many of which produced severe weather or flash flooding or both. Another area of storms formed ahead of the upper trough over northwest Texas Monday night and pushed east-southeast across the area Tuesday, producing severe weather and flooding. A third round of storms produced flooding across mainly the southern half of the region Tuesday night into Wednesday.</b>

## Storm Data and Unusual Weather Phenomena - March 2016

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A region of intense warm advection led to thunderstorm development over western counties of North Texas Wednesday Night in advance of a developing upper trough across the western United States. Storms were able to rotate and maintain strong updrafts as they propagated east along a warm front into the Dallas-Ft Worth Metroplex Thursday morning. Damaging hail up to the size of tennis balls pounded the Fort Worth area from multiple supercells, causing an estimated 600 million dollars in damage in Tarrant County alone. Fortunately, storms were able to weaken before they reached the Dallas area after sunrise.

**LAMAR COUNTY --- PARIS [33.65, -95.53]**

03/18/16 11:30 CST	0	Hail (1.00 in)
03/18/16 11:35 CST	0	Source: Social Media

Hail up to the size of quarters was reported in Paris by several sources.

Showers and storms developed along a cold front as it pushed south of the Red River on Friday, March 18. A few storms produced hail as they moved across Lamar County.
