Law enforcement reported 8 trees down between Franklin and Bremond, TX, with some of them blocking roads.				
<p>Thunderstorms developed across north Texas around midday Thursday as a cold front plowed into a warm, moist and unstable air mass in place across the region. Storms began scattered in nature near the Red River and extended south-southwest to just west of the Dallas-Fort Worth Metroplex along the front. Activity intensified as the front pushed southeast into the Metroplex, with storms becoming severe and producing a large swath of wind damage along the I-20 corridor. Large hail along with damaging winds also occurred in northern portions of the Metro area in Denton County. Storms eventually organized into a squall line, which produced additional areas of wind damage farther south across central and southern portion of the region.</p>

(TX-Z118) TARRANT, (TX-Z133) JOHNSON				
	10/13/14 13:30 CST		3K	Strong Wind (MAX 45 kt)
	10/13/14 15:05 CST		0	
The combination of an upper trough and a cold front resulted in a squall line during the overnight hours Sunday night/early Monday morning, which produced sporadic wind damage across north Texas. Strong gradient winds on Monday behind the cold front also produced minor wind damage across the area.
