

# WANTED!

Volunteers of all ages to report valuable rain, hail, and snow measurements.

The Community Collaborative Rain, Hail, and Snow Network (CoCoRaHS) needs you!

To learn more or to become an observer, please visit the website:

[www.CoCoRaHS.org](http://www.CoCoRaHS.org)

Have additional questions about the program?

E-Mail: [Ashley.Novak@noaa.gov](mailto:Ashley.Novak@noaa.gov)

## Why CoCoRaHS?

You can be a part of the mission!

Provides real time reports of hail and intense rainfall to aid in the issuing and verifying of life-saving warnings

Increases climatological rainfall monitoring network by several hundred %

Provides detail of extremely localized rainfall patterns for drought monitoring

Helps to capture accurate measurements of localized heavy rainfall responsible for deadly flash flooding and river flooding

Provides tremendous amounts of additional data to Regional River Forecast Centers to aid in the monitoring and prediction of river flows and flooding conditions

Establishes a large database of good quality precipitation observations for local analysis and study

Provides additional material for school curriculum to include the measurement of precipitation and standard observing practices into science education
