

Storm Data and Unusual Weather Phenomena - October 2010

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
INDIANA, Southeast				
FAYETTE COUNTY --- CONNERSVILLE [39.65, -85.13]				
	10/26/10 10:18 EST		2K	Thunderstorm Wind (EG 60 kt)
	10/26/10 10:22 EST		0	Source: Law Enforcement
Numerous trees were reported down due to damaging thunderstorm winds.				
FRANKLIN COUNTY --- LAUREL [39.50, -85.18]				
	10/26/10 10:20 EST		2K	Thunderstorm Wind (EG 60 kt)
	10/26/10 10:25 EST		0	Source: Law Enforcement
Trees and large tree limbs were reported down due to damaging thunderstorm winds.				
WAYNE COUNTY --- RICHMOND [39.83, -84.90], RICHMOND ARPT [39.75, -84.85]				
	10/26/10 10:30 EST		2K	Thunderstorm Wind (MG 51 kt)
	10/26/10 10:36 EST		0	Source: AWOS
In addition to the wind gust, many trees were also reported down around the area due to the damaging thunderstorm winds.				
DEARBORN COUNTY --- 1.7 NNE UPLAND [39.15, -84.87], 1.8 NNE UPLAND [39.15, -84.87]				
	10/26/10 11:04 EST	0		Tornado (EF0, L: 0.09 mi , W: 10 yd)
	10/26/10 11:05 EST	0		Source: Law Enforcement
A weak tornado was observed moving across State Route 1 between Georgetown Road and Salt Fork Road by a law enforcement officer. The tornado was on the road and in an open field, therefore no damage was reported. Wind speeds were estimated to be around 65 miles per hour.				
A historically deep low pressure system sent a very strong cold front into a marginally unstable, but very sheared environment. A line of storms formed west of the area overnight and moved into the region during the peak heating hours of the day. Severe wind gusts occurred along the entire line with multiple tornadoes occurring around the region as well.				
KENTUCKY, Northern				
CARROLL COUNTY --- CARROLLTON [38.67, -85.17]

Storm Data and Unusual Weather Phenomena - October 2010

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
PREBLE COUNTY --- 1.4 NW EL DORADO [39.91, -84.69], 1.4 NW EL DORADO [39.92, -84.68]				
	10/26/10 10:40 EST		2K	Tornado (EF0, L: 0.29 mi , W: 30 yd)
	10/26/10 10:41 EST		0	Source: NWS Storm Survey

The tornado touched down in Preble County at 1040 EST and continued into Darke County at 1041 EST before lifting at 1048 EST. The path width was 30 yards. The tornado traveled for 0.29 miles in Preble County and then 4.06 miles in Darke County. The damage was consistent with winds around 80 miles per hour in Preble County and 90 miles per hour in Darke County. The tornado was rated an EF0 in Preble County and an EF1 in Darke County. The tornado touched down initially in open farm land north of Eldorado-Whitewater Road. In this area, some farm fences were covered with corn debris. Minor tree damage was also found in this area. The tornado likely lifted for a brief time before touching down in Darke County west of Highway 726, destroying a barn. The tornado continued across Highway 726 where it hit a residence on Preble County-Butler-Township Road. At this location, outbuildings were destroyed and significant tree damage occurred. The tornado continued across farm fields until glancing another residence along Highway 722 where tree damage and minor outbuilding damage occurred. Several utility poles were also snapped in half. The tornado then continued northeast and hit a residence on Emrick Road where the most significant damage occurred. Windows were broken in the house, there was significant outbuilding damage, and several large and healthy trees were snapped off and uprooted. More damage was found to a residence on Otterbein-Ithaca Road near United States Highway 127. Here, a barn was partially collapsed and several trees were snapped. Roofing material was also removed from the house.

DARKE COUNTY --- 3.5 E BRAFFETTSVILLE [39.92, -84.68], 1.4 N CASTINE [39.95, -84.62]				
	10/26/10 10:41 EST		75K	Tornado (EF1, L: 4.06 mi , W: 30 yd)
	10/26/10 10:48 EST		0	Source: NWS Storm Survey

The tornado touched down in Preble County at 1040 EST and continued into Darke County at 1041 EST before lifting at 1048 EST. The path width was 30 yards. The tornado traveled for 0.29 miles in Preble County and then 4.06 miles in Darke County. The damage was consistent with winds around 80 miles per hour in Preble County and 90 miles per hour in Darke County. The tornado was rated an EF0 in Preble County and an EF1 in Darke County. The tornado touched down initially in open farm land north of Eldorado-Whitewater Road. In this area, some farm fences were covered with corn debris. Minor tree damage was also found in this area. Trees were reported down due to damaging thunderstorm winds.

AUGLAIZE COUNTY --- 2.3 WSW CRIDERSVILLE [40.63, -84.17], 0.5 N CRIDERSVILLE [40.66, -84.13]				
	10/26/10 10:59 EST		0.23M	Tornado (EF2, L: 2.53 mi , W: 110 yd)
	10/26/10 11:02 EST		0	Source: NWS Storm Survey

The tornado touched down in Auglaize County at 1059 EST and continued into Allen County at 1102 EST before lifting at 1103 EST. The path width was 110 yards in Auglaize County and 20 yards in Allen County. The tornado traveled for 2.53 miles in Auglaize County and then 1.39 miles in Allen County. The damage was consistent with winds around 110 miles per hour in Auglaize County and 75 miles per hour in Allen County. The tornado was rated an EF2 in Auglaize County and an EF0 in Allen County. The tornado initially touched down southwest of Cridersville where the tornado destroyed a barn. The tornado briefly lifted and then touched down in Cridersville. Damage in Cridersville included roofs blown off of houses, a house shifted off of the foundation, a house with major structural damage, and a half collapsed brick gymnasium. Objects were also impaled into the side of buildings. The tornado again briefly lifted and then touched down again in Allen County near McClain Road, north of Hume Road. At this location a quarter of a metal roof was pulled off of a metal barn. Damage estimates in Auglaize County are 230,000 dollars and in Allen County damage estimates are 8,000 dollars.

	10/26/10 12:20 EST		70K	Tornado (EF0, L: 3.81 mi , W: 200 yd)
	10/26/10 12:24 EST		0	Source: NWS Storm Survey

The tornado touched down in Clinton County at 1224 EST and continued into Fayette County at 1224 EST before lifting at 1225 EST. The path width was 200 yards. The tornado traveled for 3.81 miles in Clinton County and then 0.14 miles in Fayette County. The damage was consistent with winds around 85 miles per hour. The tornado touched down just west of State Route 72, about one mile northwest of the intersection with State Route 729. The tornado was observed on the ground from two separate residences near the initial touch down location. Four utility poles were observed to be broken and briefly suspended in the tornado near one of the residences. An occupant of the other residence observed debris circulating immediately east of State Route 72. At one location east of State Route 72, the tornado pulled a large metal door from a barn and destroyed a portion of the metal roof. Fragments of the roof were carried for approximately a quarter of a mile to the northeast. Field debris was also found wedged between the wall boards of the barn. The tornado continued northeast and next crossed Hornbeam Road approximately three-fourths of a mile northwest of the intersection with State Route 729. Damage on the east side of Hornbeam Road included a horse trailer that was picked up and carried about 100 feet. Numerous trees were also snapped on this same property. The tornado then traveled northeast across open and harvested fields until arriving at Greenfield-Sabina Road, approximately three-fourths of a mile northwest of the intersection with Snow Hill Road. Damage on the east side of the road included damage to a metal roof and a wall of a livestock barn. There was also roof and siding damage to two residences nearby. The concentrated damage path appeared to end just past this location in far western Fayette County.

Power lines were reported down due to damaging thunderstorm winds.

SCIOTO COUNTY --- MINFORD [38.85, -82.85]

	10/26/10 13:42 EST		1K	Thunderstorm Wind (EG 60 kt)
	10/26/10 13:46 EST		0	Source: Emergency Manager

Large tree limbs were reported down due to damaging thunderstorm winds.

A historically deep low pressure system sent a very strong cold front into a marginally unstable, but very sheared environment. A line of storms formed west of the area overnight and moved into the region during the peak heating hours of the day. Severe wind gusts occurred along the entire line with multiple tornadoes occurring around the region as well.
