----------	-----------	-------------------	---------------------	------------------------

ILLINOIS, Central

(IL-Z066) EFFINGHAM, (IL-Z071) CLAY

03/02/14 06:00 CST	0	Sleet
03/02/14 21:30 CST	0	

A storm system tracking from the Plains eastward across the Midwest brought a mixed bag of wintry precipitation to central and southeast Illinois on March 2nd. The precipitation was mainly in the form of snow north of the I-70 corridor, where between 1 and 4 inches accumulated. Further south, the snow was mixed with sleet and freezing rain. A significant accumulation of sleet was observed in a few locations south of I-70, with parts of Clay County seeing amounts as high as 1.3 inches.
