

Hurricane Safety Tips

BEFORE HURRICANE SEASON STARTS:

- Create a family disaster plan & review all insurance policies.
- Store valuables, papers, and photos in a dry and secure place.
- Trim tree branches close to home.
- If plywood shutters are needed for your home, purchase and cut to fit the plywood to the windows.
- Stock up on canned or prepacked food, water, and other essential items.

BEFORE THE STORM:

- Prepare your home for the storm. Secure outdoor material and put up or close window shutters if needed.
- Fuel vehicles early and get extra cash.
- Plan to evacuate if you live on the coastline, in a mobile home, or a flood plain.
- Notify relatives of your evacuation plan and leave early.

AFTER THE STORM:

- Respond to emergency officials. Be prepared to be away from your residence as long as a couple of weeks or more!
- Once allowed to re-enter area, beware of any remaining debris or flooded areas.
- Most post-hurricane related injuries or fatalities are caused by cleanup or carbon monoxide poisoning from generators.

Terminology

- **TROPICAL DEPRESSION** is a tropical cyclone with maximum sustained surface wind speed (1-minute average) of 33 knots (38 mph) or less.
