Storm Data and Unusual Weather Phenomena - April 2007

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>A small tornado touched down at Route 126 and Eastern Avenue in Plainfield and continued for 3.2 miles to near Patrick Henry Parkway and Essington Road in Bolingbrook. The tornado path width was only about 5 yards wide. The tornado was rated EF0 with winds estimated at 65 to 80 mph. The first damage was at a nursing home just northeast of downtown Plainfield. A minivan in the parking lot was flipped on its side and a couple other vehicles were jostled. There was roof damage to the nursing home where shingles and a couple small sections of roofing were torn off. The funnel then passed over an older neighborhood with mature trees and ranch homes. There was no visible damage in this area. The large trees may have sheltered the neighborhood. The funnel then moved over an area of lakes with very few homes. The next signs of damage were in a subdivision just southwest of the corner of Essington Road and 127th Street. This is a new subdivision with large two story homes and only small trees. These homes were more exposed. Here there was minor damage to several homes. Most of the damage was to shingles and playground equipment. The tornado continued into another subdivision north of 127th where trampolines and lawn furniture were blown around by the tornado. The flying debris damaged siding on a few homes. The tornado damage ended in a subdivision under construction on the east side of Essington Road where a construction trailer was damaged. The funnel dissipated over Bolingbrook golf club.</p>				

A tornado touched down in Plainfield and Bolingbrook.

INDIANA, Northwest

LAKE COUNTY

LOWELL	04/25/07 18:25 CST	0	Flood (due to Heavy Rain)
	04/25/07 23:00 CST	0	41.28N, 87.42W
