A cinder block wall collapsed and there was also roof damage to a Big Box retail store in the Brentwood area.

DISTRICT OF COLUMBIA

A strong cold front passed through the region during the early morning morning hours of the 17th. A strong southerly flow ahead of the cold front transported plenty of moisture into the area allowing for limited instability to develop. Strong forcing associated with the frontal passage combined with limited instability to trigger showers and thunderstorms. Thunderstorms were able to mix down very strong winds aloft causing damaging winds across some locations.

Trees were down along the 5500 Block of North 14th Road in Arlington. Some of the trees fell onto cars.

A strong cold front passed through the region late during the evening of the 16th into the early morning morning hours of the 17th. A strong southerly flow ahead of the cold front transported plenty of moisture into the area allowing for limited instability to develop. Strong forcing associated with the frontal passage combined with limited instability to trigger showers and thunderstorms. Thunderstorms were able to mix down very strong winds aloft causing damaging winds across some locations.
