				` '

High pressure was in control while a warm and very moist air mass was in place across the Mid-Atlantic. Showers and thunderstorms formed and heavy rain caused localized flash flooding in Baltimore County, MD.

07/29/15 17:00 EST

There was five inches or more of flowing water across Padonia Road at Tullamore Road.

The stream gauge on Passage Creek at Buckton reached a flood stage of 9 feet. It peaked at 9.10 feet at 18:15 EST. Fields near the creek began to flood.

A shortwave trough moved through the region in the morning hours and showers and thunderstorms formed in a humid air mass. Heavy rain led to flash flooding which led to many areas in the Shenandoah Valley flooded through the day.
