Picnic areas 7 and 10 in Rock Creek Park.

Date/Time **Event Type and Details** Location Deaths & Property & Injuries Crop Dma An upper-level trough and a weak cold front triggered some showers and thunderstorms. With deep moisture an a weak flow aloft, slow moving storms caused heavy rainfall that led to areas of flooding and flash flooding. DISTRICT OF COLUMBIA COUNTY --- 0.5 NNE TENLEYTOWN [38.96, -77.07] 06/25/20 17:45 EST 25K Thunderstorm Wind (EG 50 kt) 06/25/20 17:45 EST 0 Source: Broadcast Media There were multiple reports of trees, branches, and wires down across Northwest DC, including on 36th Street Northwest between Garrison Avenue Northwest and Nevada Avenue Northwest, on Fessenden Street Northwest between 36th Street Northwest and 34th Street Northwest, and on Linnean Terrace Northwest between 33rd Street Northwest and Linnean Avenue Northwest. A tree fell on a house in the 3600 block of Chesapeake Street Northwest. An unseasonably strong upper-level trough interacted with a modestly unstable environment over the Middle Atlantic to produce several supercell thunderstorms which transitioned into small bowing line segments across far eastern West Virginia, central Maryland and northern Virginia. The storms produce substantial and relatively widespread wind damage and some hail along their path, though the storms themselves were isolated to widely scattered in nature. DISTRICT OF COLUMBIA COUNTY --- 0.7 NW WALTER REED [38.99, -77.04] 06/27/20 16:05 EST 10K Thunderstorm Wind (EG 50 kt) n 06/27/20 16:05 EST Source: 911 Call Center There were seven reports of trees blown down in Northeast DC. A few isolated severe thunderstorms developed near the Washington, DC, metro area during the late afternoon hours of Saturday, June 27th. 2020. A weak pressure trough/surface front ignited a cluster of strong to severe thunderstorms. The storms moved over eastern West

Virginia during the early afternoon hours, producing scattered damaging downburst wind gusts.
