A buoy from Piney Point measured wind gusts in excess of 30 knots.

A hot and humid air mass developed over the Mid Atlantic ahead of a cold front on August 25th. Showers and thunderstorms developed across northern Virginia and central Maryland during the late afternoon and pushed east towards the Tidal Potomac River and Maryland Chesapeake Bay during the evening and overnight hours. Some of these storms became severe, producing wind gusts in excess of 30 knots.

DISTRICT OF COLUMBIA

(DC-Z001) DISTRICT OF COLUMBIA

	08/01/07 00:00 EST		0	Drought
	08/21/07 23:59 EST		0	

Washington DC experienced severe agricultural drought conditions from August 1st through August 21st. Using a combination of rainfall measurements and radar precipitation estimates, some locations averaged rainfall totals as high as 6 inches below normal. This led to some jurisdictions restricting water use. Damage estimates were not available. Several locations were included in primary natural disaster areas due to reductions in farm production. Sources of information included the National Drought Monitor.

(DC-Z001) DISTRICT OF COLUMBIA

	08/25/07 17:00 EST		0	

DISTRICT OF COLUMBIA COUNTY

BENNING	08/25/07 22:06 EST		2K	Thunderstorm Wind (EG 50 kt)
	08/25/07 22:10 EST		0	38.88N, 76.95W

Washington DC Emergency Management reported trees down on Central Avenue NE and Dubois Street SE.

A hot and humid air mass developed over the Mid Atlantic ahead of a strong cold front on August 25th. Temperatures climbed into the mid 90s by noon. These temperatures combined with high humidity created heat index values around 105. Showers and thunderstorms developed during the late afternoon as the cold front approached the region. Some of these storms became severe, producing damaging winds that downed trees and power lines.

Storm Data and Unusual Weather Phenomena - August 2007

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

MARYLAND, Central

(MD-Z003) WASHINGTON, (MD-Z004) FREDERICK, (MD-Z009) MONTGOMERY, (MD-Z010) HOWARD, (MD-Z014) ANNE ARUNDEL, (MD-Z018) CALVERT

08/01/07 00:00 EST	0	Drought
08/14/07 23:59 EST	0	

A portion of the Mid Atlantic hydrologic service area experienced severe agricultural drought conditions from mid July through August 14th. This area extended from Washington County south east across the southern Baltimore metro into Calvert County. Using a combination of rainfall measurements and radar precipitation estimates, some locations averaged rainfall totals as high as 6 inches below normal. This led to some jurisdictions restricting water use. Damage estimates were not available. Several locations were included in primary natural disaster areas due to reductions in farm production. Sources of information included the Maryland Farm Service Agency and the National Drought Monitor.

(MD-Z016) CHARLES, (MD-Z017) ST. MARY'S

08/01/07 00:00 EST	0	Drought
08/28/07 23:59 EST	0	

A portion of the Mid Atlantic hydrologic service area experienced severe agricultural drought conditions from mid July through August 28th. This area included Charles and St Mary's Counties in lower southern Maryland. Using a combination of rainfall measurements and radar precipitation estimates, some locations averaged rainfall totals as high as 6 inches below normal. This led to some jurisdictions restricting water use. Damage estimates were not available. Several locations were included in primary natural disaster areas due to reductions in farm production. Sources of information included the Maryland Farm Service Agency and the National Drought Monitor.

BALTIMORE COUNTY

WHITE MARSH	08/03/07 14:34 EST	0	Thunderstorm Wind (EG 50 kt)
	08/03/07 14:35 EST	0	39.38N, 76.43W

Baltimore County officials reported a tree down in White Marsh.

BALTIMORE COUNTY

ROSEDALE	08/03/07 15:03 EST	0	Thunderstorm Wind (MG 50 kt)
ESSEX	08/03/07 15:07 EST	0	39.33N, 76.52W ~ 39.32N, 76.48W

A Trained Spotter measured a wind gust of 58 mph, as well as half inch hail, in Rosedale. A Baltimore County official reported a tree down on Crafton Road in Essex.

Widely scattered showers and thunderstorms developed in a hot and humid air mass on the afternoon of August 3rd. A storm in Baltimore County became severe, downing trees and producing small hail.

PRINCE GEORGE'S COUNTY

LARGO	08/05/07 17:30 EST	5K	Thunderstorm Wind (EG 50 kt)
	08/05/07 17:35 EST	0	38.9N, 76.83W

Prince Georges Emergency Management had multiple reports of downed trees and power lines in central Prince Georges County near Largo, MD.

A cold front stalled over the Mid Atlantic kept moisture and unsettled conditions across the region. Scattered showers and thunderstorms developed across central Maryland, including near the Baltimore and Washington DC suburbs. A storm in Prince Georges County became severe, downing several trees and power lines near Largo.

(MD-Z501) EXTREME WESTERN ALLEGANY, (MD-Z502) CENTRAL AND EASTERN ALLEGANY

08/07/07 01:00 EST	0	Dense Fog
08/07/07 08:00 EST	0	

A warm and humid air mass over the region allowed dense fog to develop along the Allegheny Front in western Maryland. Automated Surface Observations reported dense fog, reducing visibilities to a quarter mile or less during the early morning hours of August 7th.

WASHINGTON COUNTY

HALFWAY	08/09/07 10:30 EST	1K	Thunderstorm Wind (EG 50 kt)
	08/09/07 10:30 EST	0	39.62N, 77.73W

Washington County Emergency Management reported a power line down in Halfway, MD.

FREDERICK COUNTY

Storm Data and Unusual Weather Phenomena - August 2007

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details

	08/09/07 13:56 EST		0	38.57N, 77.33W

Penny size hail was reported in Dumfries, VA.

FREDERICKSBURG (C) COUNTY

FREDERICKSBURG	08/09/07 15:30 EST		0	Hail (0.88 in)
	08/09/07 15:30 EST		0	38.3N, 77.47W

An Amateur Radio Operator reported dime to nickel size hail at Route 1 and Route 3 in the City of Fredericksburg.

ALBEMARLE COUNTY

CISMONT	08/09/07 16:15 EST		1K	Thunderstorm Wind (EG 50 kt)
	08/09/07 16:15 EST		0	38.07N, 78.32W

An Albemarle County Official reported trees down at Gordonsville Road and Cismont Road in Cismont, VA.

A strong cold front combined with a humid and unstable air mass across the Mid Atlantic on August 9th. Scattered showers and thunderstorms developed across western and northern Virginia during the late morning and spread east towards the Washington DC metro and into the northern Piedmont region during the early and mid afternoon. Several of these storms became severe, producing large hail and damaging winds that downed trees and power lines.

MADISON COUNTY

HAYWOOD	08/25/07 18:35 EST		0	Hail (0.75 in)
	08/25/07 18:35 EST		0	38.45N, 78.27W

A Trained Spotter reported penny size hail in Haywood, VA.

GREENE COUNTY

4.0 N RUCKERSVILLE	08/25/07 19:10 EST		2K	Thunderstorm Wind (EG 50 kt)
	08/25/07 19:15 EST		0	38.2878N, 78.37W

Broadcast media contact reported trees down north of Ruckersville, VA. Route 29 was closed north of Route 33 due to downed trees on the road.

FAIRFAX COUNTY

BURKE	08/25/07 21:36 EST		10K	Thunderstorm Wind (EG 50 kt)
	08/25/07 21:36 EST		0	38.8N, 77.27W

A Trained Spotter reported a tree down on a house near the intersection of Burke Road and Burke Lake Road.

FAIRFAX COUNTY

SPRINGFIELD	08/25/07 21:53 EST		10K	Thunderstorm Wind (EG 50 kt)
	08/25/07 21:53 EST		0	38.78N, 77.18W

Fairfax County Emergency Management reported a tree down on a house on Hamlet Street in Springfield, VA.

A hot and humid air mass developed over the Mid Atlantic ahead of a strong cold front on August 25th. Temperatures climbed into the mid 90s by noon. These temperatures combined with high humidity created heat index values around 105. Showers and thunderstorms developed during the late afternoon as the cold front approached the region. Some of these storms became severe, producing large hail and damaging winds that downed trees and power lines.

WEST VIRGINIA, East

(WV-Z052) BERKELEY, (WV-Z053) JEFFERSON

	08/01/07 00:00 EST		0	Drought
	08/21/07 23:59 EST		0	

A portion of the Mid Atlantic hydrologic service area experienced severe agricultural drought conditions from July 24th through August 21st. This area included Berkeley and Jefferson Counties in the eastern pan handle of West Virginia. Using a combination of rainfall measurements and radar precipitation estimates, some locations averaged rainfall totals as high as 6 inches below normal. This led to some jurisdictions restricting water use. Damage estimates were not available.

(WV-Z501) WESTERN GRANT, (WV-Z502) EASTERN GRANT, (WV-Z503) WESTERN MINERAL, (WV-Z504) EASTERN MINERAL

	08/07/07 01:00 EST		0	Dense Fog
	08/07/07 08:00 EST		0	

A warm and humid air mass over the region allowed dense fog to develop along the Allegheny Front in the eastern pan handle of West Virginia. Automated Surface Observations reported dense fog, reducing visibilities to a quarter mile or less, during the early morning hours of August 7th.

HARDY COUNTY

4.0 SW MOOREFIELD	08/09/07 18:30 EST		1K	Thunderstorm Wind (EG 50 kt)
	08/09/07 18:30 EST		0	39.0291N, 79.0827W

A Hardy County official reported trees down on South Fork Road southwest of Moorefield, WV.

A strong cold front combined with a humid and unstable air mass across the Mid Atlantic on August 9th. Scattered showers and thunderstorms developed across the eastern pan handle of West Virginia during the late morning and spread east to the Blue Ridge during the early and mid afternoon. A storm moving over Hardy County became severe, producing damaging winds southwest of Moorefield.

BERKELEY COUNTY

Storm Data and Unusual Weather Phenomena - August 2007
