04/05/23 03:00 CST	0	Source: Emergency Manager

BOONE COUNTY --- 2.1 NNW OLVEY [36.21, -92.98]

04/05/23 07:18 CST	0	Hail (1.00 in)
04/05/23 07:18 CST	0	Source: Public

This report was received via a social media message.

STONE COUNTY --- 0.7 N FOX [35.79, -92.30]

04/05/23 08:49 CST	0	Thunderstorm Wind (EG 61 kt)
04/05/23 08:49 CST	0	Source: Public

A report from a truck driver driving along Hwy. 263 through Fox witnessed trees being blown down along the highway in the town of Fox.

CONWAY COUNTY --- 1.8 NE CENTER RIDGE [35.39, -92.55]

04/05/23 09:05 CST	0	Thunderstorm Wind (EG 70 kt)
04/05/23 09:05 CST	0	Source: Trained Spotter

A report was received of a downed tree blocking Hwy. 9, north of Center Ridge.

Cooling took place overhead during the early morning hours of the 5th, and this allowed scattered severe thunderstorms to pop up in northern Arkansas. Straight-line wind estimated at 75 to 85 mph roughed up homes and barns around Sydney (Sharp County). Tennis ball size hail occurred at Ash Flat (Sharp County), with hen egg size stones at Cherokee Village (Fulton/Sharp Counties).

After sunrise, a line of showers and strong to severe thunderstorms surged through the state from the west. This happened as a powerful storm system in the upper Midwest dragged a cold front across the region. Trees were blown down near Center Ridge (Conway County) and Fox (Stone County).

The front eventually stalled along the Gulf Coast. North of the front, areas of heavy rain were noted in southeast Arkansas through the overnight hours of the 5th and into the 6th. More than three inches of precipitation dumped in places, including Cane Creek State Park (Lincoln County) and Monticello (Drew County). At the latter location, a portion of Highway 278 was closed due to flooding. Conditions were much cooler, with temperatures largely in the 50s at 100 pm CDT on the 6th.

OUACHITA COUNTY --- 1.7 SE LESTER [33.64, -92.90], 0.7 ESE HARMONY GROVE [33.65, -92.77], 4.8 ENE FRENCHPORT [33.50, -92.71], 3.4 WSW RENDEZVOUS [33.48, -92.88]

04/06/23 02:45 CST	0	Flood (due to Heavy Rain)
04/10/23 19:15 CST	0	Source: River/Stream Gage

Heavy rain brought flooding to the Ouachita River at Camden.

Heavy rain brought flooding to the Ouachita River at Camden.

POPE COUNTY --- 3.6 SE SIMPSON [35.56, -93.09]

04/15/23 14:30 CST	0	Hail (1.75 in)
04/15/23 14:30 CST	0	Source: Trained Spotter

Storm Data and Unusual Weather Phenomena - April 2023

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
A storm spotter reported 1.75 inch hail 9 miles northwest of Hector, AR...or 3 miles northwest of Tag.

This is a correction to a previous non-thunderstorm wind gust report from 3 S McCreanor. A personal weather station measured 61 mph.

Storm Data and Unusual Weather Phenomena - April 2023

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

As of 100 pm CDT, there were no storms yet. A sounding (temperature and dewpoint profile with height) revealed plenty of instability, and it was just a matter of time before the fireworks began. There was also a lot of dry air aloft, and forecasters knew this would likely lead to very large hail. Low level moisture driven into this dry environment overhead would create a lot of evaporation/cooling, making it easy for ice to form.

Between 230 pm and 330 pm CDT, thunderstorms developed rapidly in northwest and west central Arkansas. South and east, hen egg to tennis ball size hail occurred near Botkinburg (Van Buren County) and south of Joan (Clark County), and golf ball size stones occurred in Shirley (Van Buren County) and northwest of Tag (Pope County).

A 66 mph wind gust was measured at Newport (Jackson County), with a 61 mph gust at McCreanor (Lonoke County), and a gust to 60 mph at Russellville (Pope County). At College City (Lawrence County) and Little Rock (Pulaski County), 56 mph gusts were recorded.

Trees were toppled at Conway (Faulkner County), northeast of Russellville (Pope County), Swifton (Jackson County), Walnut Ridge (Lawrence County), and northwest of Wilburn (Cleburne County). Outbuildings were damaged east of Jerusalem (Conway County).

Much cooler air followed the storms. By 500 pm CST, temperatures were in the 50s and 60s across much of northern and western Arkansas. At Little Rock (Pulaski County), the thermometer showed 81 degrees at 555 pm CST. Fifteen minutes later, the mercury dropped to 60 degrees! In addition, 1.71 inches of rain fell in an hour (ending at 653 pm CST). While this was a lot of precipitation in a short time locally, most locations did not receive nearly this much liquid (quarter to three quarter inch totals were common).

BOONE COUNTY --- 1.5 SSW OMAHA [36.43, -93.19]

04/20/23 14:45 CST	0	Hail (1.50 in)
04/20/23 14:45 CST	0	Source: Trained Spotter

This report was on Hwy. 65 south of Omaha.

BOONE COUNTY --- 2.6 ENE SUGARLOAF [36.49, -92.88]

04/20/23 15:30 CST	0	Hail (1.75 in)

Crystal Valley received 3.50 inches of rain in a 24 hour period ending at 600 am CST.				
There was nearly a week between storm systems with temperatures again warming into the 80s from the 17th through the 20th across much of the state. Before cool temperatures were seen across the state, a couple more rounds of thunderstorms were expected. The first of which took place from April 20-22. A few reports of severe weather were received with some locally very heavy rainfall observed as well. Little Rock received more than 3 inches of rain in a 24 hour period. A lightning strike occurred very close to the NWS office in North Little Rock on the evening of April 20th which damaged some equipment.

Trees and power lines were down.

While cool temperatures and rainy conditions were in place for the last several days of the month, there was one more round of strong to severe thunderstorms to move across the state on April 27th. A few storms produced hail from central into eastern Arkansas. A few brief funnel clouds also occurred across northeast Arkansas beneath an upper level storm system that rotated its way east of the area.
