	03/02/23 22:50 CST		0	Tornado (EF2, L: 1.80 mi , W: 300 yd)
	03/02/23 22:53 CST	5	0	Source: NWS Storm Survey

## Storm Data and Unusual Weather Phenomena - March 2023

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>This tornado started just north of Kirby, completely destroying two chicken houses on the west side of Arkansas Highway 27. The tornado moved north-northeast along highway 27, causing moderate roof damage to a home, and snapping several large trees at their trunks. The tornado continued to move north-northeast, paralleling Ebenezer Road where it did the most significant damage. Several tree lines along the road had snapped trunks. A mobile home on Ebenezer Road, which had securing tie-down straps, was completely lofted, rolled, and tossed approximately 100 feet into a tree line, completely destroying it. There were 4 occupants, two only had minor injuries. Farther east on Ebenezer road, the tornado damaged a few more mobile homes. The first one was shifted off of it's supporting blocks, and some roof and siding damage was observed. There were three minor injuries noted among the occupants, and were transported to a local hospital. In the neighboring lot to the east, a large oak tree was uprooted onto a brand new mobile home, smashing the structure in the middle, twisting the supporting frame, snapping two of the tie-down straps, and effectively destroying the unit. There were no occupants at the time of the tornado. The tornado continued moving northeast of Ebenezer road, snapping several trees and power poles along the road. Damage was observed along Mason Road, with numerous large trees uprooted and snapped. A few large trees were blown onto a home on Mason Road, but only minor damage was observed on the home. The tornado dissipated shortly thereafter. This tornado was rated an EF2 with estimated peak winds of 135 mph.</p>

<b>YELL COUNTY --- 0.6 W DANVILLE [35.05, -93.39], 1.0 NNE DANVILLE [35.06, -93.37], 0.5 ESE DANVILLE [35.05, -93.37], 0.8 WSW DANVILLE [35.05, -93.39]</b>	03/02/23 22:51 CST	0	Flash Flood (due to Heavy Rain)
	03/03/23 01:51 CST	0	Source: Law Enforcement

Street flooding was reported in Danville. Park Ave. was closed among other roads.

---

<b>VAN BUREN COUNTY --- 0.9 SE DAMASCUS [35.37, -92.41]</b>	03/02/23 23:05 CST	5K	Thunderstorm Wind (EG 61 kt)
	03/02/23 23:05 CST	0	Source: Emergency Manager

Shingles were blown off a house in Damascus. Multiple trees were blown down across northern Faulkner County.

---

<b>VAN BUREN COUNTY --- 1.6 E DAMASCUS [35.38, -92.39], 1.4 N GRAVESVILLE [35.40, -92.35]</b>	03/02/23 23:05 CST	0	Thunderstorm Wind (EG 70 kt)
	03/02/23 23:09 CST	0	Source: NWS Storm Survey

Peak winds were estimated to be between 70 and 80 mph. Damage occurred along and parallel to US 65 S, along Gravesville Cutoff Road between Highway 124 and Black Hill Road, and portions of Black Hill Road east of Gravesville Cutoff Road. Along the damage path, softwood trees were uprooted and snapped with several small outbuildings either completely destroyed or missing significant portions of the roof. Roofing material was scattered downstream into a field in the direction of storm movement. The swath of wind damage was estimated at 1000 yards wide and 3.2 miles in length with maximum winds of 80 mph.

---

<b>FAULKNER COUNTY --- ENOLA [35.20, -92.20]</b>	03/02/23 23:13 CST	0.10M	Thunderstorm Wind (EG 70 kt)
	03/02/23 23:13 CST	0	Source: Emergency Manager

A recreational vehicle was crushed by a fallen tree.

---

<b>FAULKNER COUNTY --- 6.0 E ENDERS [35.33, -92.12], 6.6 E ENDERS [35.33, -92.11]</b>

### NEWTON COUNTY --- 1.4 N COMPTON [36.10, -93.30]

03/03/23 10:33 CST	0	Heavy Rain
03/03/23 10:33 CST	0	Source: Public

The public reported 2.07 inches of rain.

March certainly roared in like a lion across the state with back to back severe weather events on March 1st and 2nd into the 3rd. Storms on these days led to a few tornadoes as well as hail as large as 3 inches in diameter. Very heavy rainfall was noted across the area as well which led to flash flooding and widespread river flooding. One fatality occurred because of the flooding in Scott County on March 2nd.

As the air heated up, and the atmosphere destabilized, severe thunderstorms were triggered by the front during the late afternoon and evening. The storms produced very large hail, and also caused spotty wind damage. Hail slightly larger than baseballs was reported at Woodlawn (Cleveland County), with ping pong ball size stones near Benton (Saline County) and west of Stuttgart (Arkansas County), and half dollar size hail a few miles north of Norman (Montgomery County). At Rison (Cleveland County), wind gusts up to 85 mph ripped the roof off of a church and a strip mall. Part of a brick facade was removed from latter structure. Trees were also toppled, with one tree blocking Highway 79.

The front on the 1st advanced toward the Louisiana border and stalled. The front was followed by cooler air. On the 2nd, all eyes were on a powerful storm system in the southern Rockies. In response to the approaching system, the front began lifting back to the north. By 400 pm CST, the front cleared the southern counties, and temperatures warmed into the 70s. However, readings north of Little Rock (Pulaski County) were mostly in the 50s.

As the system neared in the late afternoon, it interacted with the front and round two of thunderstorms commenced from central/northeast Texas into southeast Oklahoma. Eventually, storms congealed into a line and raced toward Arkansas. As the storms progressed into the state after dark, it was clear that severe weather (including tornadoes) was most likely south of the front (in mild air), with mainly heavy to excessive rain farther north (where cooler conditions existed).

Between 900 pm and 1000 pm CST, trees were pushed over by straight-line winds west of Y City (Scott County). About this time, rain was coming down in buckets across Scott and Yell Counties, and numerous roads were flooded/about to flood. At Boles (Scott County), there was a report of people surrounded by water and unable to leave their home.

As the night wore on, the Poteau River at Cauthron (Scott County) rose 15 feet in a hurry. The same swollen river swept a pickup truck off of Highway 80 on the east side of Waldron (Scott County). Tragically, the driver (a grandfather trying to visit his grandson) drowned. A traffic camera (provided by the Arkansas Department of Transportation) along Highway 71 south of Boles (Scott County) showed the Fourche La Fave River almost as high as the bridge over the tributary. Eventually, the pavement was inundated and became impassible. As roads turned into lakes, a vehicle stalled at Parks (Scott County), and two individuals were rescued. Similar rescues were ongoing in Yell County, and one person was transported from Corinth to a hospital in Danville (both in Yell County).

Shortly before 1100 pm CST, a tornado (rated EF2) was spawned just to the north of Kirby (Pike County). A few mobile homes were heavily damaged (resulting in three injuries). One mobile home was rolled and obliterated. Miraculously, two of the four occupants only had minor injuries. Several homes suffered roof damage, and two chicken houses were destroyed.

## Storm Data and Unusual Weather Phenomena - March 2023

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A couple of hours later, thunderstorm winds downed/snapped trees along Highway 229 about four miles north of Carthage (Dallas County). A few minutes before 200 am CST on the 3rd, a brief weak tornado (rated EF0) touched down in open fields east of Altheimer (Jefferson County). The tornado took out some trees along Highway 58.

Elsewhere, a weak tornado (rated EF1) was identified west of Fouke (Miller County). More trees were blown down southwest of Hope (Hempstead County) and northeast of Nashville (Howard County). Wind gusts as high as 70 to 80 mph roughed up barns, outbuildings, and signs between Damascus (Faulkner/Van Buren Counties) and Rose Bud (White County). A recreational vehicle was crushed by a fallen tree at Enola (Faulkner County).

As far as rain, there was a lot of it. Two to more than four inches of rain was common across the northern half of the state in the twenty four hour period ending at 600 am CST on the 3rd. Waldron (Scott County) had 4.90 inches of precipitation, with 4.88 inches at Blue Mountain Dam (Yell County), 4.72 inches at Danville (Yell County), 4.45 inches at Abbott (Scott County), 4.22 inches at Dardanelle (Yell County), 3.87 inches at Booneville (Logan County), 3.70 inches at Mountain View (Stone County), 3.65 inches at Gilbert (Searcy County), 3.57 inches at Calico Rock (Izard County), 3.54 inches at Mena (Polk County), 3.50 inches at Damascus (Van Buren County), 3.47 inches at Marshall (Searcy County) and Morrilton (Conway County), and 3.40 inches at Conway (Faulkner County).

Given so much rain, there was a landslide near the intersection of Highways 103 and 215 west of Oark (Johnson County). Before dawn on the 3rd, the Spring River at Hardy (Sharp County) went up six feet in two hours, was in danger of reaching a level of 14 feet (four feet above the flood stage). As a precaution, folks in homes near the river were asked to evacuate.

The rain on the 2nd/early on the 3rd was in addition to the precipitation that fell on the 1st, especially from central into southeast Arkansas. In this part of the state, two or more inches of liquid was measured in places. This included Cane Creek State Park (Lincoln County), Keo (Lonoke County), Marianna (Lee County), Pine Bluff (Jefferson County), Sheridan (Grant County), and Stuttgart (Arkansas County).

On the 3rd, there was moderate to major flooding on the Petit Jean River, and minor to moderate flooding on the Black, Cache, Fourche La Fave, Little Red, Ouachita, Saline, Spring, and White Rivers. Concerns were growing that river levels could go even higher if a wet pattern continued into early spring.

### MONTGOMERY COUNTY --- 0.9 NW CADD0 GAP [34.41, -93.63]

03/11/23 21:10 CST	0	Hail (1.00 in)

## Storm Data and Unusual Weather Phenomena - March 2023

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

This tornado started just southwest of the Colonel Glenn and Marsh Road intersection in Martindale, west of Marsh road, uprooting trees and ripping a portion of a roof off an outbuilding . The tornado then continued northeast across a forested area, uprooting several more trees before crossing into a neighborhood off Capitol Hill Boulevard near Hartford and Denver Streets. More trees were uprooted as it moved northeast towards Kanis Road.

The tornado rapidly intensified as it passed northeast over Chenal Parkway, severely damaging several apartment buildings off of Napa Valley Drive. The most severe residential damage occurred at these apartments, and along and west of North Shackleford Road along Jamestown Drive and Cobble Hill Road. Most exterior walls had collapsed on several homes, leaving just some interior walls standing.

The tornado then crossed Interstate 430 near the North Rodney Parham Road interchange, damaging a shopping center and a Kroger. Between Interstate 430 and Cantrell Road, many homes and apartments were severely damage, with roofs ripped off and hundreds of trees uprooted . The tornado crossed Cantrell Road near Foxtrot Road, damaging more apartments and many businesses. Between Cantrell Road and the Arkansas River , many more homes were damaged from the tornado winds or trees falling onto those homes in the Cammack Village neighborhood . Before crossing the river, many trees were uprooted or trunks snapped at Murray Park. The tornado then uprooted or snapped hundreds, if not thousands of trees at Burns Park, both north and south of Interstate 40. The tornado crossed Interstate 40 just west of exit 150, passing over ball fields and recreation areas west of Military Drive. A new fire station still under construction was also damaged along Military Drive.

The tornado then passed over MacArther Drive near the Military Drive intersection in Amboy, severely damaging many more homes and businesses. Several more homes and apartments were damaged between Military Drive and Remount Road, with the tornado passing over Remount Road between Kierre Drive and Camp Robinson Road. Most of the damage in these areas consisted of severe roof damage and uprooted trees, though there were some homes who completely lost their roofs.

The tornado then moved into the Indian Hills neighborhood of North Little Rock, with more damaged roofs. A few homes along Flintrock Road near Osage Drive lost their entire roofs, along with many homes damaged by trees falling onto homes. The tornado seemed to weaken a bit as it passed over North Hills Boulevard, with some less severe roof damage and many uprooted trees. The tornado crossed over John F. Kennedy Boulevard near Club Road, traveling northeast through Sherwood generally along Lee Avenue, damaging many more homes as it continued towards Kiehl Avenue. The tornado crossed over Kiehl Avenue near Northgate Drive and Woodridge Lane , damaging more homes and some businesses. This tornado passed over Brockington Road north of Kiehl Avenue, ripping a roof off an apartment building along Calloway Avenue, then passing over Indianhead Lake uprooting several more trees and damaging more roofs.

The tornado then passed over rural marsh land just northwest of U.S. Highway 67 near the Interstate 440 interchange, uprooting more trees before crossing U.S. Highway 67 near the Redmond Road exit at Jacksonville. A tractor-trailer was flipped over along U.S. Highway 67, along with damage to signage along the road. The tornado moved over the ball fields south of Redmond Road, then into some neighborhoods where the tornado seemed to strengthen, severely damaging more homes and businesses along Stone and McHenry Streets, Eastview Drive and South 1st Street. A church was completely destroyed along North Elm Street south of

## Storm Data and Unusual Weather Phenomena - March 2023

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>Graham Road. More homes were damaged north of Graham Road west of J. P. Wright Loop Road before the tornado passed over the Holland Bottoms State Wildlife Area west of Kerr Station Road. Many trees were snapped or uprooted in this wildlife area. This tornado was rated an EF3 with maximum estimated winds of 165 mph within Pulaski County. This tornado continued into Lonoke County.</p>				
<b>LONOKE COUNTY --- 2.7 NW SOUTH BEND [34.88, -92.07], 1.2 NW OAK GROVE [34.94, -91.94]</b>				
	03/31/23 13:47 CST		0	Tornado (EF2, L: 8.50 mi , W: 800 yd)
