## Weather Summary

A slow moving low pressure center and its associated stationary front stalled over the Northeast during the first few days of September. Rain showers moved into the area on the 1st of the month and lingered all the way through the 5th. Several locations across the region received at least 1.00 inch of rain with certain areas in Southern New York receiving much more. Over 4.50 inches of rain fell in Monticello, NY from this storm. All of this heavy rain resulted in minor flooding at two nearby points in the Delaware Basin.
