

9. Coordinate simple and effective procedures for communication between the primary SKYWARN net and local nets through the use of all possible frequencies, modes and bands.
10. Coordinate SKYWARN activities with ARES, RACES and other amateur radio and governmental groups and agencies to best fulfill the goals of the National Weather Service SKYWARN program.
11. Maintain the NWS amateur radio station and assist in the acquisition of new equipment, when necessary.
12. Coordinate with SKYWARN nets in NWS warning areas adjacent to the Memphis county warning area to establish back-up procedures and to share ideas and strategies.
13. Attend and participate in SKYWARN Advisory Committee meetings.

Role of Assistant Coordinator

The SKYWARN Amateur Radio Operations Coordinator may appoint, in consultation with the SKYWARN Program Manager, one or more Assistant Coordinators to assist him in his role as Coordinator. The Assistant Coordinator's duties are essentially the same as those of the Coordinator.
