

5. The Committee will work to ensure that SKYWARN works closely with the various amateur radio and governmental groups and agencies concerned with emergency communications to provide the most effective integrated communications network possible.
6. The Committee will help to develop, review and update, as needed, the SKYWARN Operations Manual. This includes providing local information for inclusion in the manual.
7. The Committee will work to see that SKYWARN continues to operate in the spirit of public service, and that the network works toward the missions and goals set forth by the National Weather Service.
8. The Committee will help to maintain and improve the NWS amateur radio station by exploring ways to improve the existing station and obtain new equipment.

### **Adoption of New SKYWARN Policies and Recommendations**

SKYWARN is a volunteer organization developed to provide assistance to the National Weather Service. Therefore, the National Weather Service is responsible for SKYWARN policies and actions. As the served agency, the National Weather Service, namely the SKYWARN Program Manager or his designate, will make the ultimate decision as to the acceptance or modification of policies set forth by the SKYWARN Advisory Committee.
