

SAW Snow Climatology - January

KSAW - Jan (2001-2008)
Ceilings in Snow

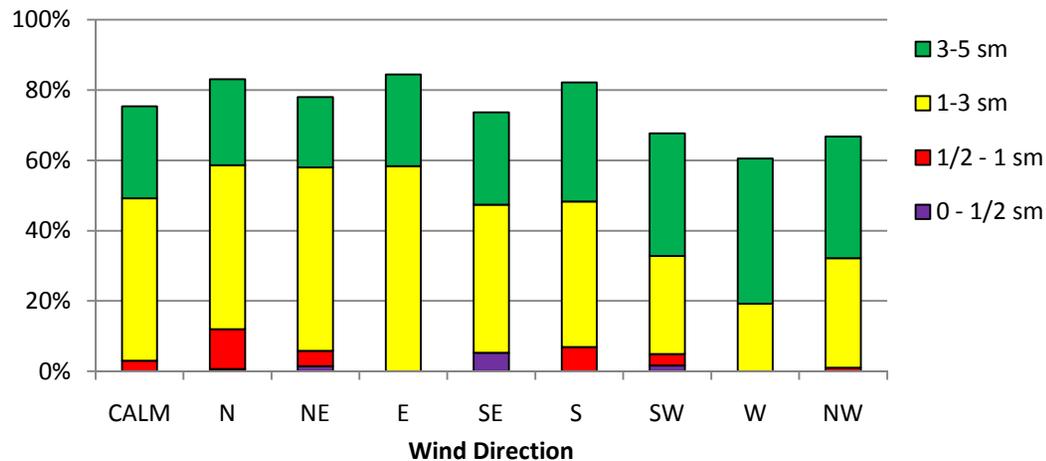

Ceilings:

Majority of ceilings low MVFR (1000 - 2000 ft).

Exception: Observations with SW, W, and NW winds mainly high MVFR (2000 - 3000 ft).

Exception: Observations with NE and S winds mainly IFR (500 - 1000 ft)

KSAW- Jan (2001-2008)
Visibilities in Snow

Visibilities:

Majority of visibilities IFR (1 - 3 miles).

Exception: Observations with SW, W, and NW winds mainly MVFR (3 - 5 miles).

Highest percentage of LIFR (1/2 mile or 3/4 mile) visibility occurred with N winds.

KSAW- Hourly Observations with Snow January (2001-2008)
