# *Some Final Points*

- Thunderstorms are expected to move north from Kansas into southeast Nebraska after 3 pm.
- The storms will spread northeast across the remainder of eastern Nebraska and southwest Iowa this evening into tonight.
  - The tornado threat appears to be decreasing, but an isolated tornado or two still appears possible in a small part of southeast Nebraska.
  - Large hail appears to be the main threat. Some very large, greater than 2 inches in diameter.
  - Isolated damage wind is possible in southeast Nebraska.
  - Isolated locally heavy rainfall is likely with the thunderstorms.
- Additional severe weather is possible on Wednesday
