May 5, 2015

Dear Ms. Corder,

Thank you for having us at the Tech Center! I learned so many cool things like how the military plane is about 175,000 pounds. Also, I learned how hurricanes usually happen in the spring and summer. Next, I learned how the eye wall is the strongest part of a hurricane.

Thank you! I had a great experience and learned so many things!

Sincerely,

Grant Friedland

Dear Mrs Corder,

Thank you so much for this one of a kind experince of getting to see the F.A.A. Tech Center. I have learned a lot from coming.

First, I learned the airplanes that fly into the hurricanes fly low so that they won't have ice freezing to the plane. Next, I was suprized when I discoverd that the F.A.A. was part of the Cost Guard. Lastly, I learned that the tubes that you send down measure the weather with very small instruments inside.

Agian, thank you for this very special opertunity!

Sincerely,

Arden Nussey

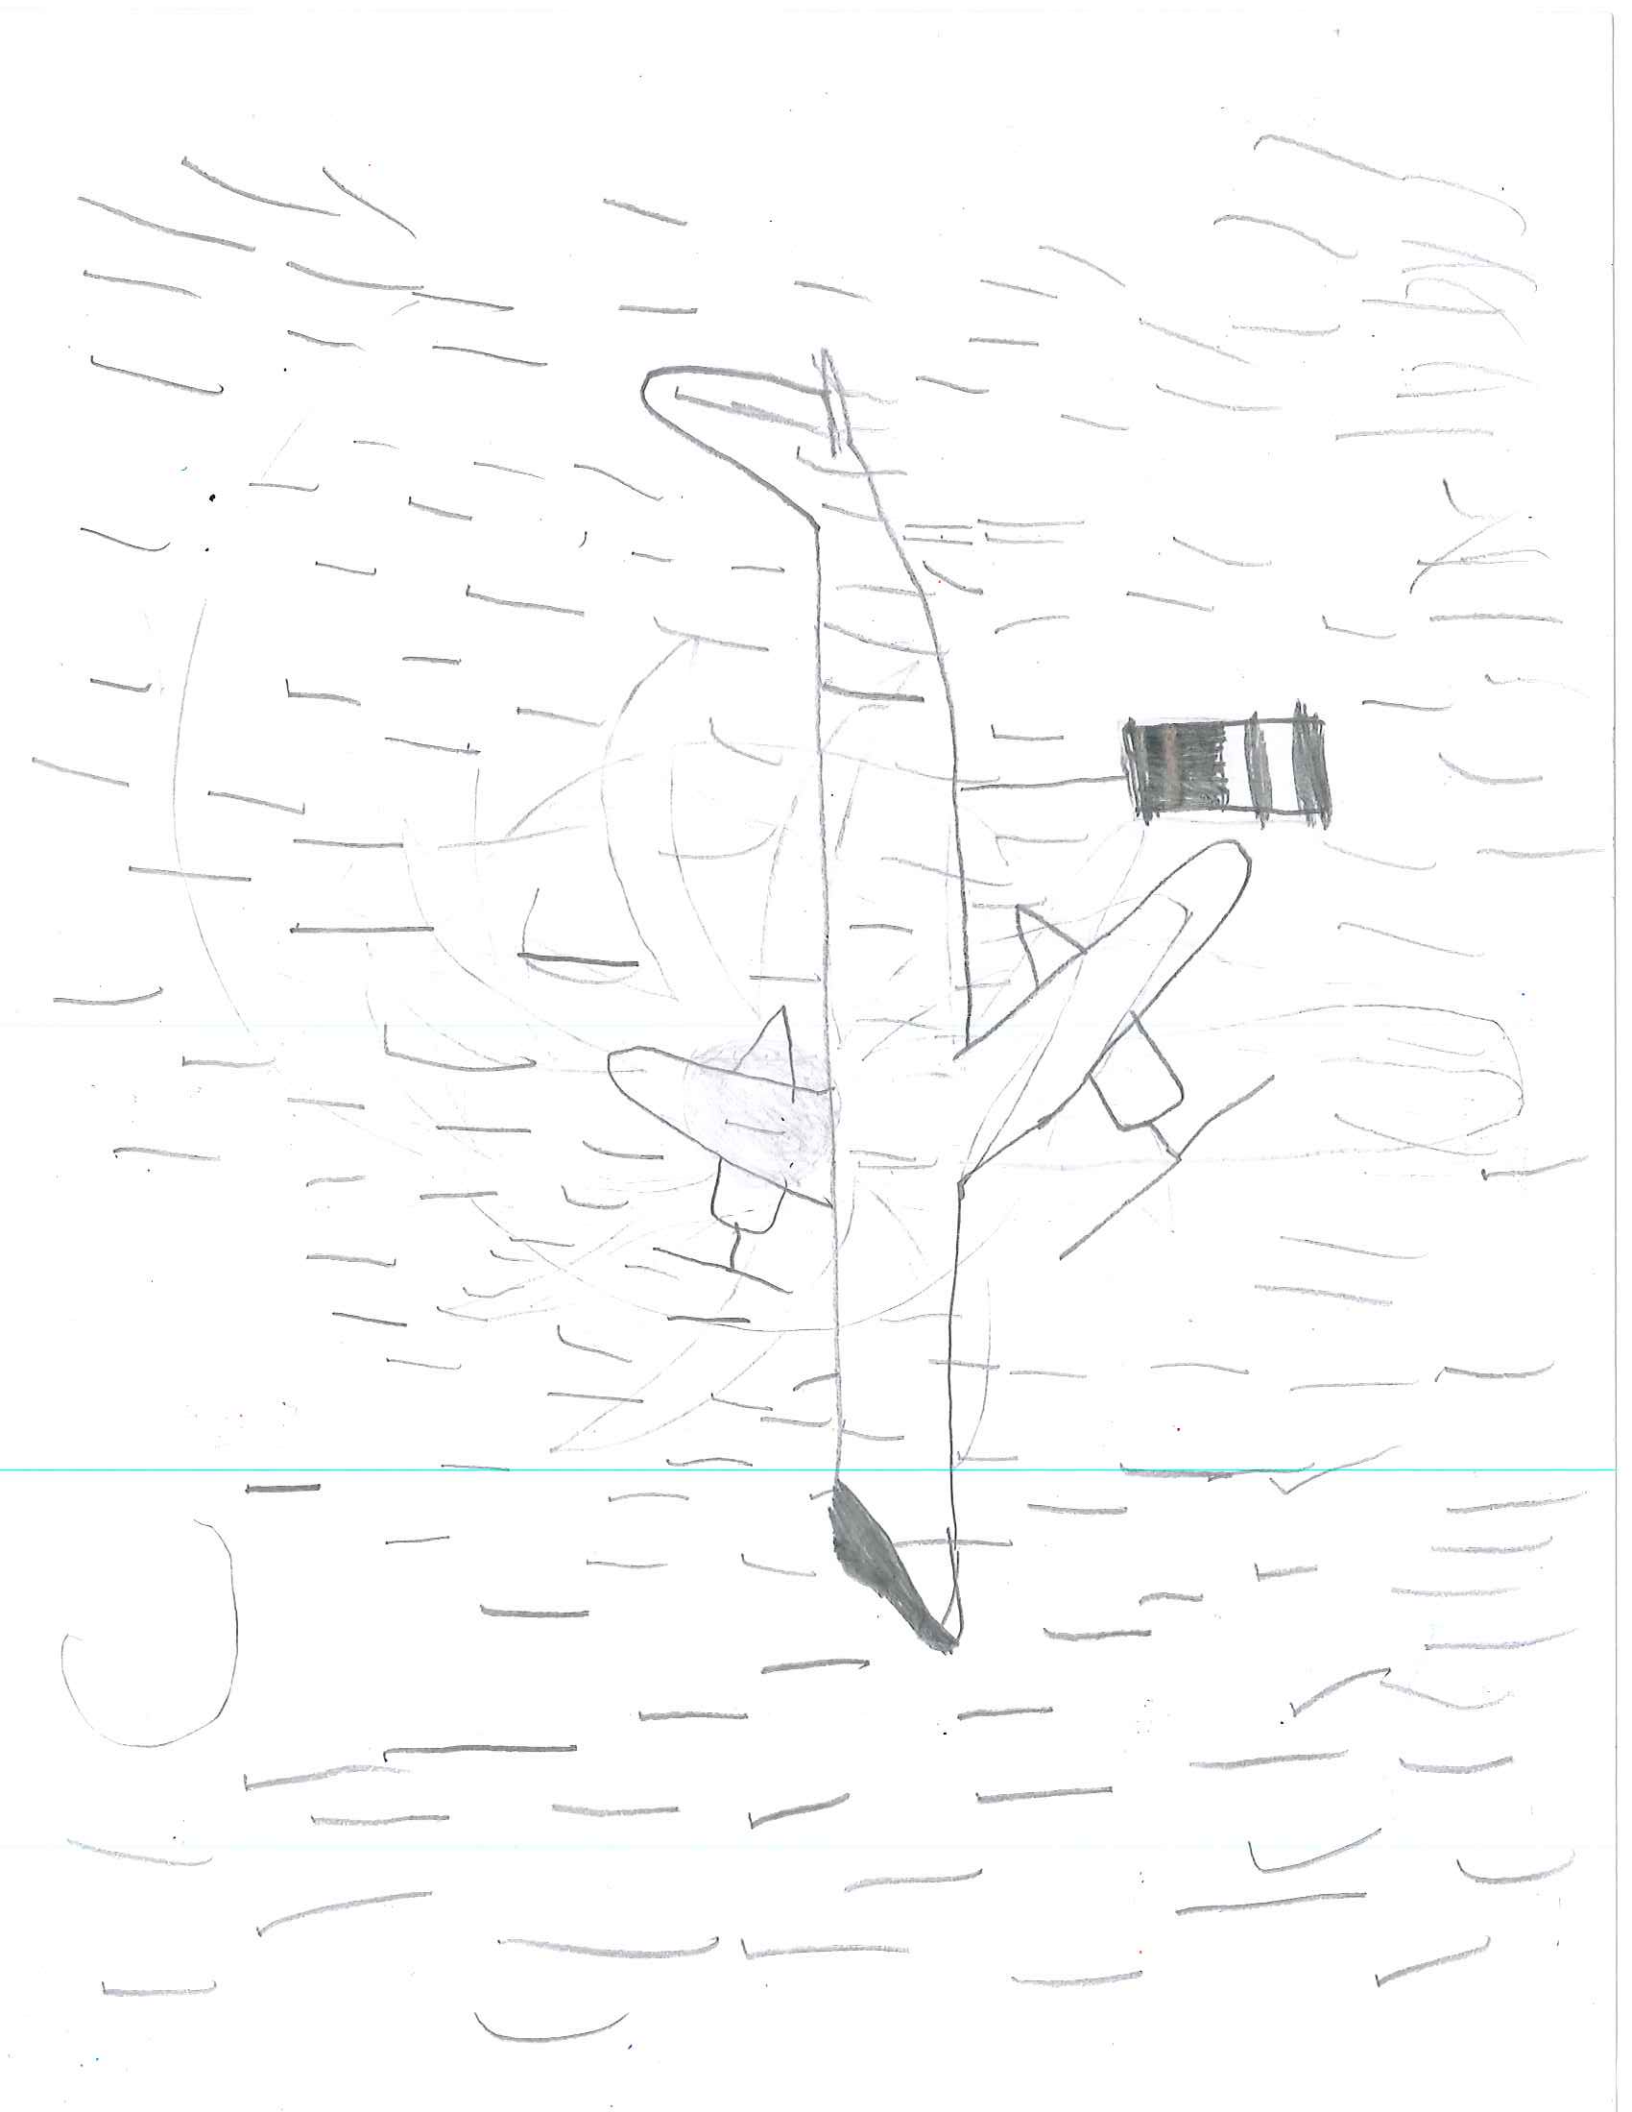
May 4, 2015

Dear Ms. Corder,

Thank you for recieving us at the FAA Tech Center. This was an amazing opportunity to learn about hurricanes. I didn't know they used a tube to collect information. Or that there were 2 kinds of Hurricane Hunter aircraft. Also I learned that hurricanes can be big and small. Thank you so much for teaching us about hurricanes!

Sincerely,

Philip P.



May 5, 2015

Dear Ms. Corder,

Thank you so much for having us! I learned so much! And everything I learned was fascinating. Like a cow can get picked up by a tornado, if windows and doors are open during a storm the roof can fly off, and hurricane season starts June and ends in September. Thank you so much I had tons of fun!

Sincerely,

Julia Young

May 5th 2015

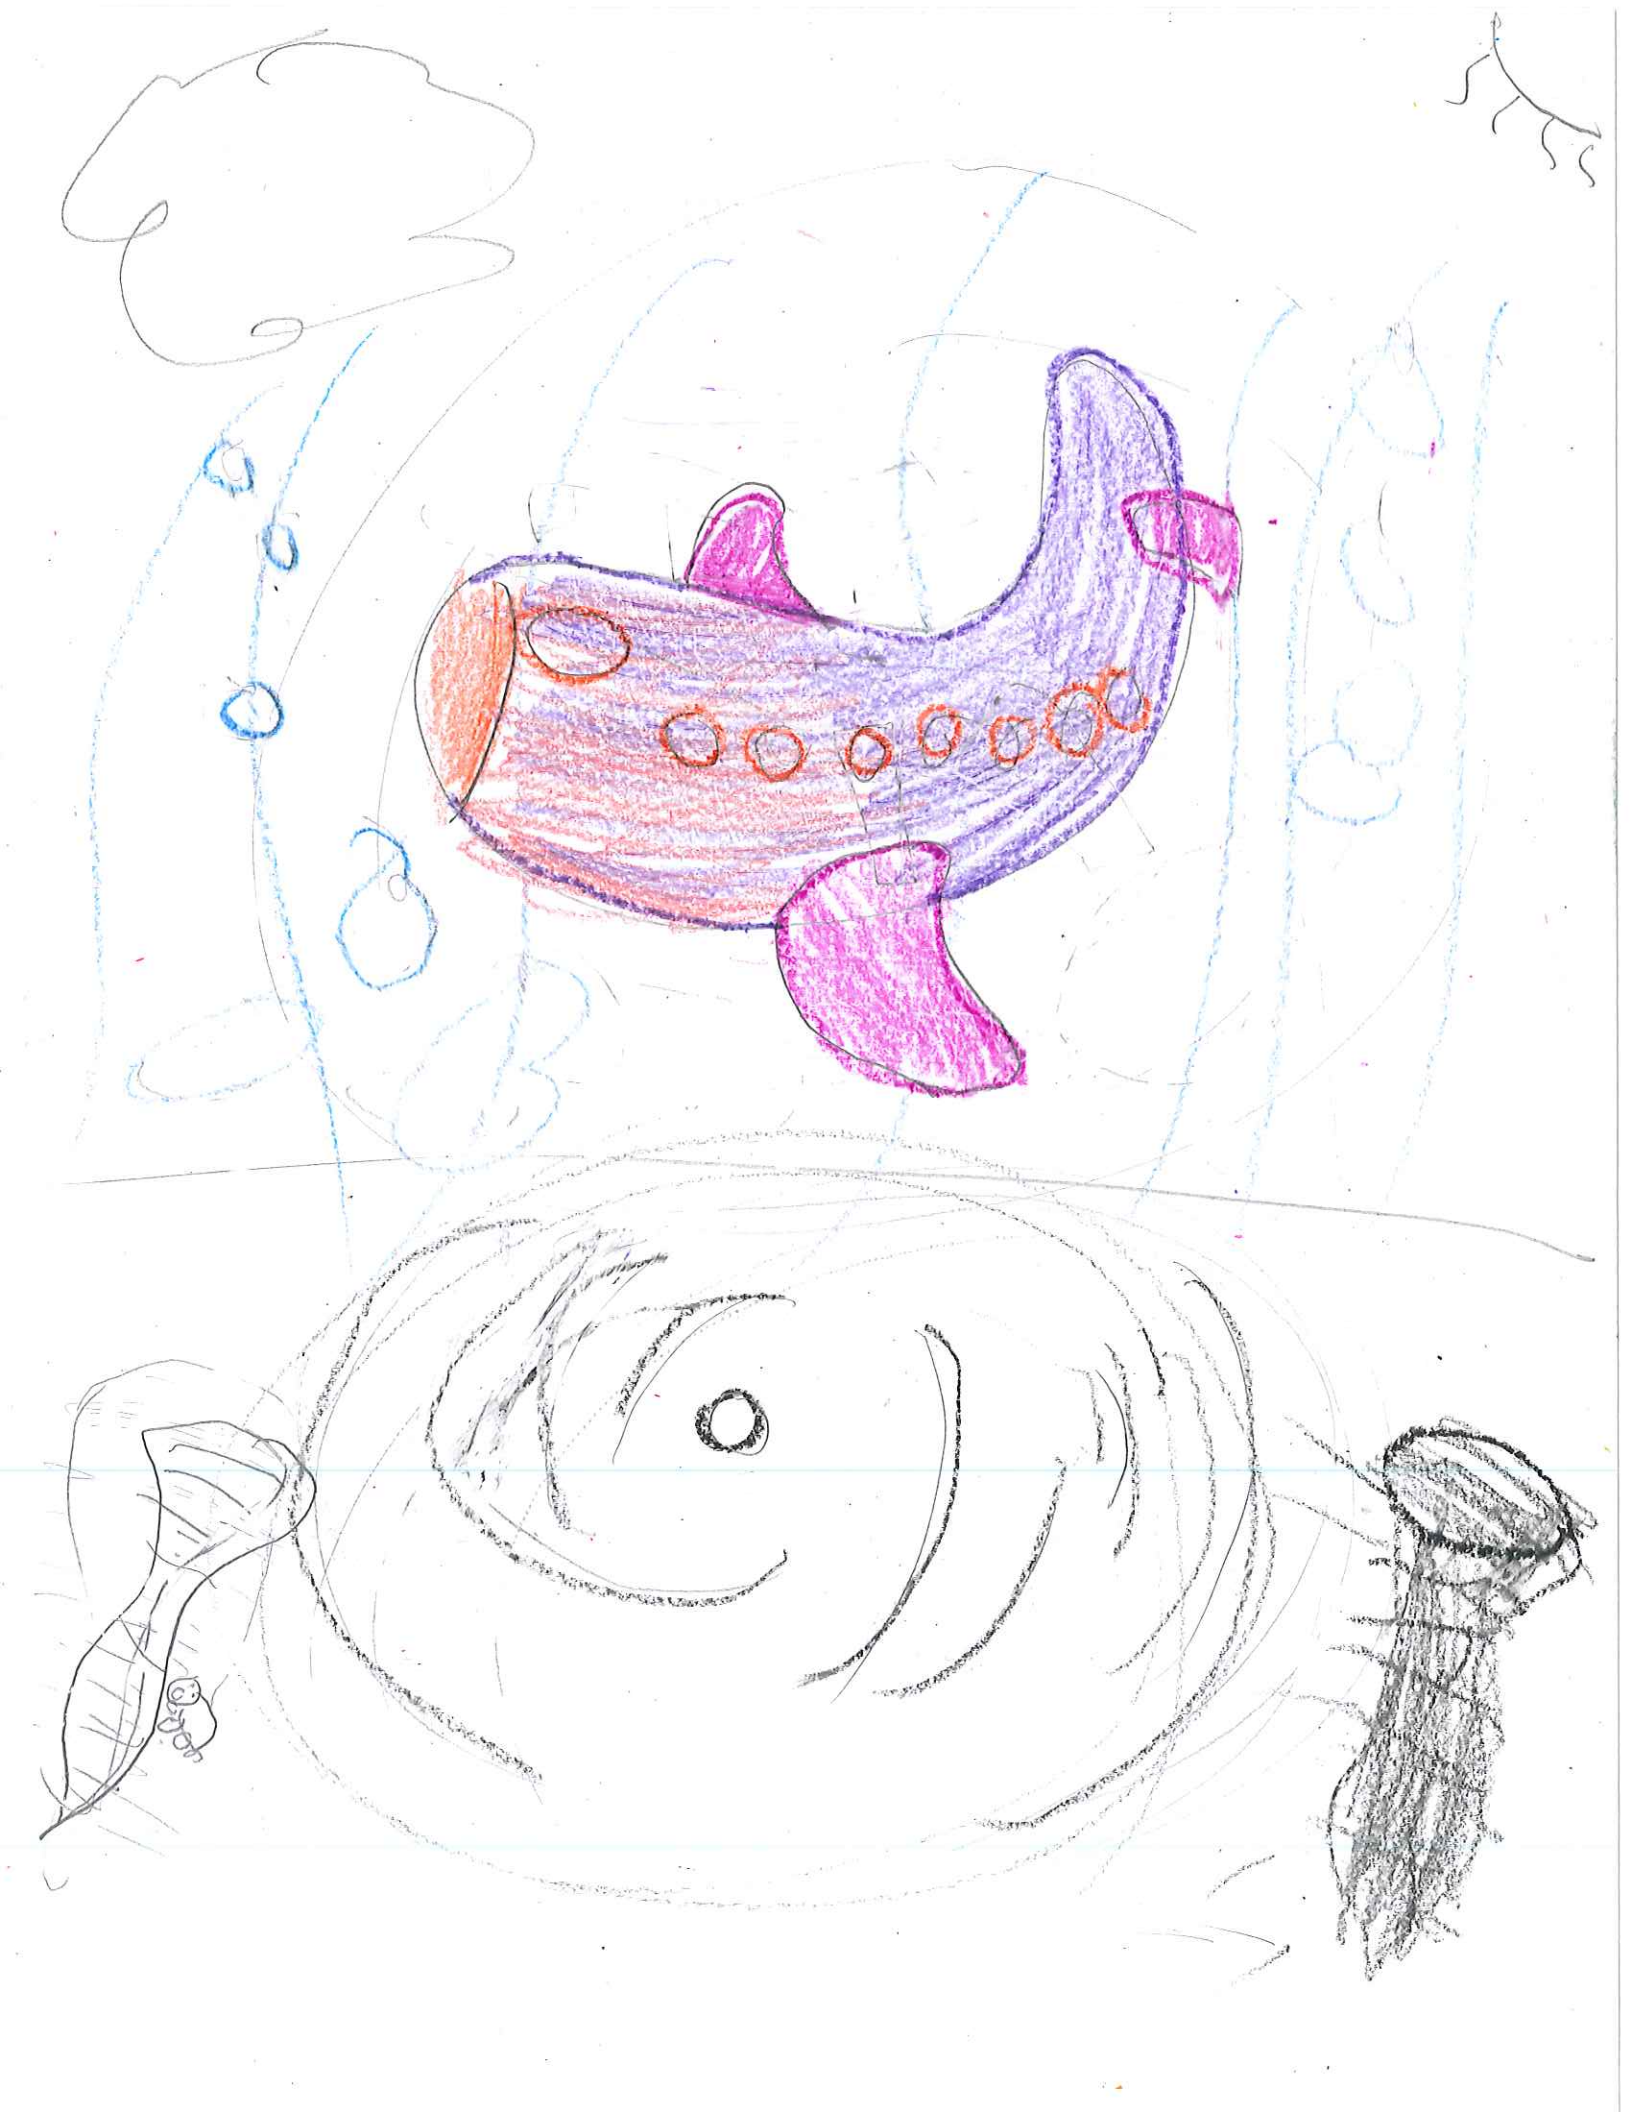
Dear Ms. Corder,

Thank you for inviting my class to the FAA Tech Center. I learned a lot of cool things. I'll tell you some.

1. NOAA stands for National Oceanic Atmospheric Administration.
2. The Salvation army can make 10,000 meals a day.
3. You should always have a hip roof and to never keep your windows and doors open.

Sincerely,

Ashly



May 5, 2015

Dear Ms. Corder,

Thank you so much for having us come! I learned so much like that a hurricane season starts in June and it ends in September, also that one of those guns can spin and shoot 6000 times a minute. I learned that you would not put wood on a window for a hurricane, you would do it with metal too. It was a very big privilage for me.

Sincerely,

Elaina

Dear Ms. Corder,

I Appreciated
Every Second I Was
at the William J
Tec. center. I learned
that People Used
tubes and shot it
down 10,000 feet. The tube
measures the weather.
I am very happy
to have this experience.

Sincerely,

Taylor P.

Dear Ms. Corder,

Hi my name is Kayleigh, I am a 4th grader. I wanted to thank you for letting us go to the FCA Technical Center. Here is a couple things I learned while I was there.

First, dopplers scanner type. What it does is collect all of the data. Next, you should board your windows with medal or wood, not tape. Lastly, it is more safe to have a hip roof, so your roof doesn't fall off.

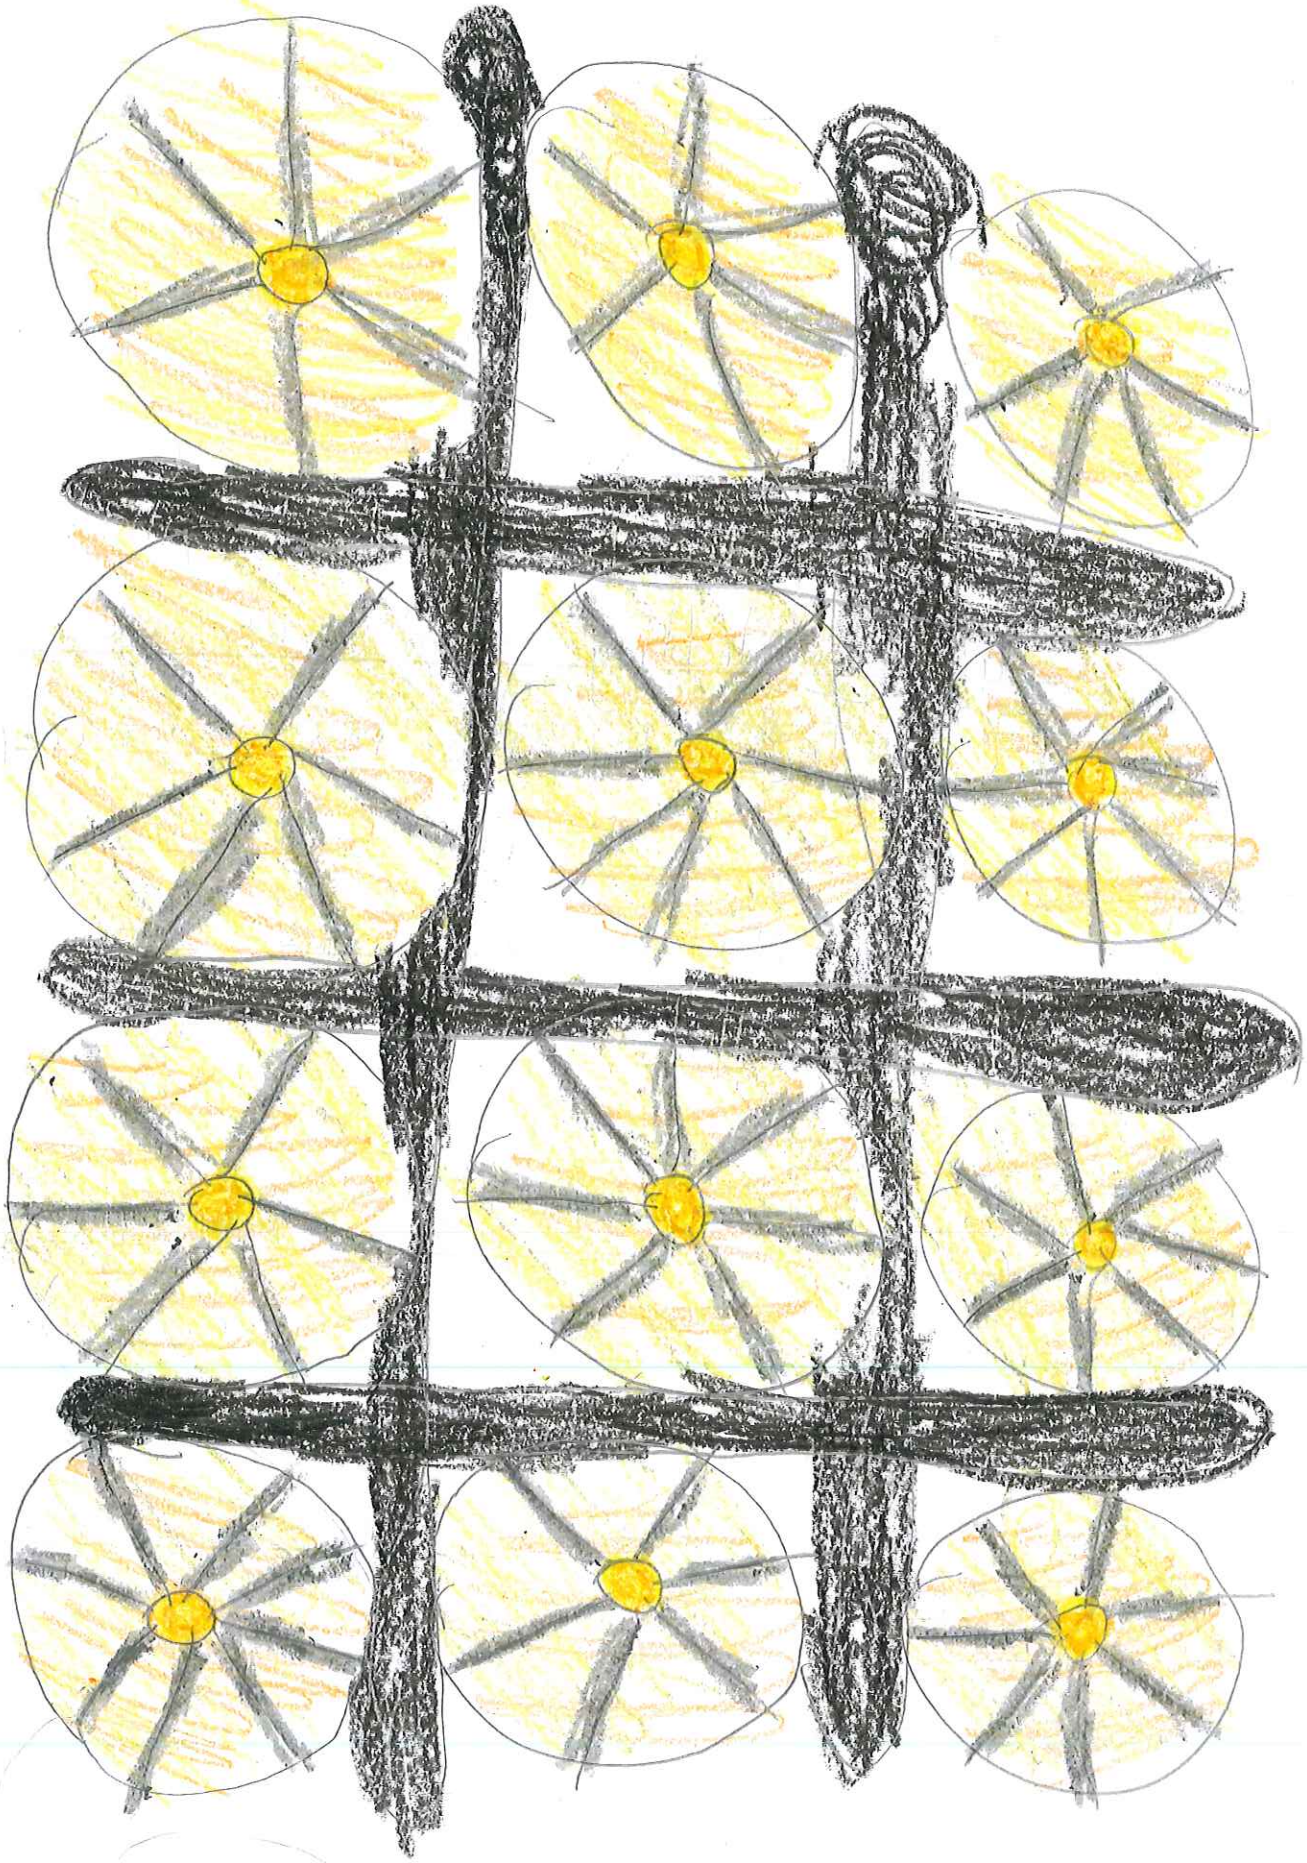
Those are a couple things I learned.

Sincerely,

Kayleigh

P.S. It was a great experience thank you.

The Wall of Wind



May/15/2015

Dear Ms. Corder,

Thank You for letting us go to the F.A.A. I told my family all about it, everone was intested in it, everone exept my sisters. Of coarse. Its amazing how the Planes can check every fright from there about to New York. Also Its amazing how Big the hurricane hynter airplanes are, I didnt know they where that big. I also loved making whirlpools, like the rarest natural disaster ever, out of two two liter water bottles.

Sincerely,

William Brody McGrath

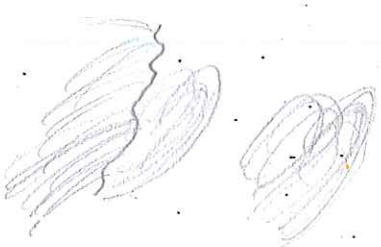
May 5, 2015

Dear Ms. Corder,

I had a wonderful time at the F.A.A tech center. Thank you for making this trip possible. I learned what F.A.A means Fedral Aviation Administration. Another of my favirite things about the tech center was seeing the storm Searcher plane and getting to go inside of it and see what its like.

Sincerely,

Constantine Besers



Dear Ms. Corder,

I enjoyed my trip to the FAA center, and it couldn't have happened without you! Let me tell you the fun things I did!

First, we got to go into the plane that flew into hurricane sandy.

secondly, I got to make a tornado!

Lastly, we got to see people that fly into storms.!

thank you I had so much fun!

Sincerely,

Frankie Wright

5/5/15

Dear Ms. Corder,

Thank you letting us come to the FAA center. It was so fun. I might want to work there someday. I learned a lot about the planes the tech center uses. I now know you use planes from the 1950's, but put new technology on them.

Sincerely,

Alec Wisneski

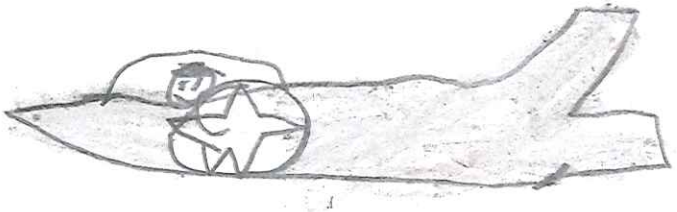
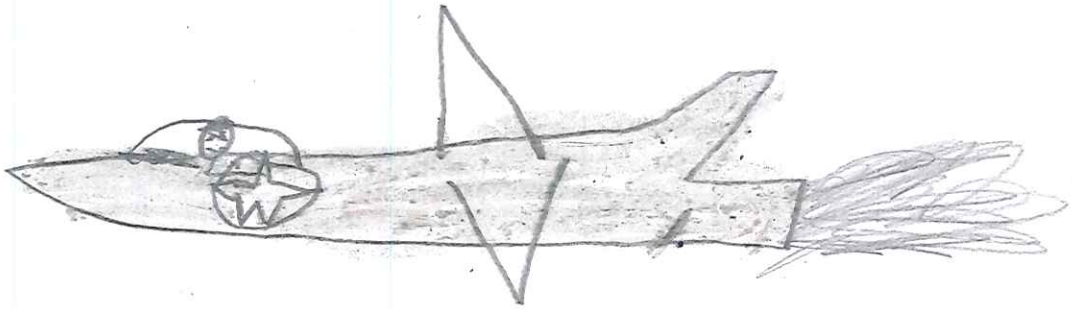
guard





May 5, 2015

Dear Ms. Corder,

Thank you so much for having us go on a great field trip. I have learn so much and it is so nice of you that you had us go on this trip. I have learned that a sonde goes into the storm. Also how many people can fit in those planes. Again thank you!

Sincerely,

Taryn Cupit

May 5, 2015

Dear Ms. Carter,

Thank you for the amazing opportunity to visit the Federal Atmospheric Administration (FAA) center. During this trip we went in all of the machinery that they use in situations like hurricans and natural disasters.

Sincerely,

Timothy S. Lee

Dear Ms. Corder,

Thanks for inviting my class and I to the Federal Aviation Administation Technical Center. I speak for my class when I say I learned a lot. One thing I learned was that Hurricane Hunter planes go up to 10,000 feet in the air! Also, I learned that Hurricane Hunter planes only have 5 people at a time. Finally, I learned that Fighter Planes only have One person in it at a time!

Thanks for your time.

Sincerely,

Blake Newcomb

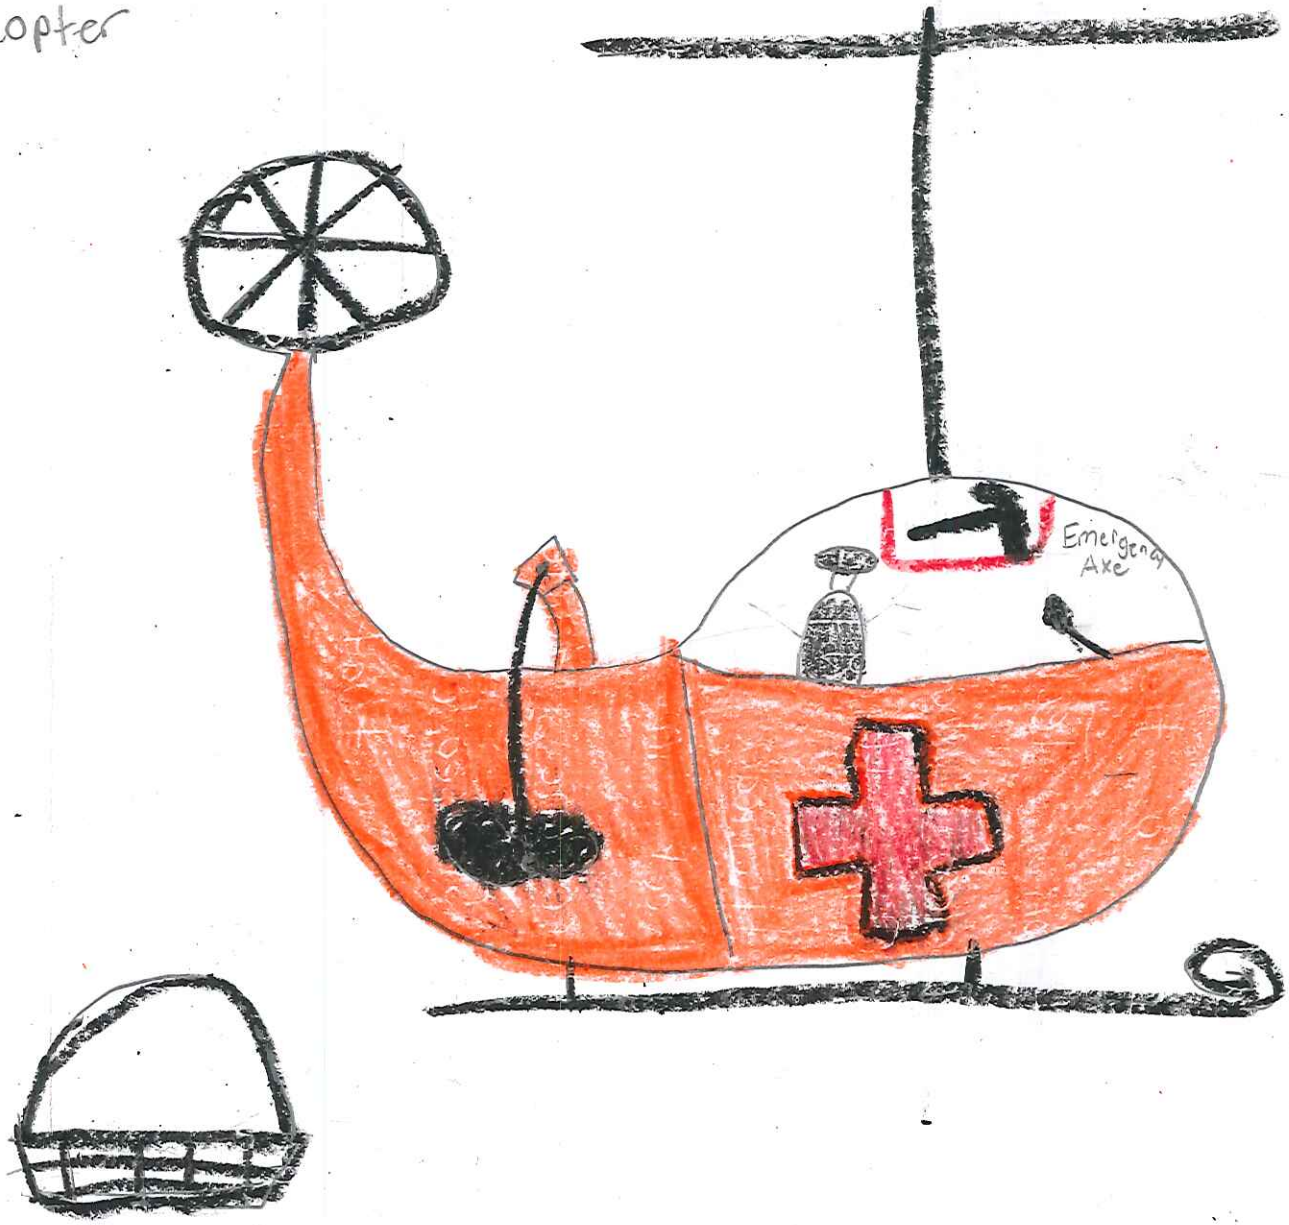
Coast Gaurd Helicopter



May 5th, 2015

Dear Ms. Corder,

Thank you so much for having us @ the FAA Tech Center. This was an incredible opportunity and im glad the Ocean City Intermediate school took place in it. Everyone was welcoming and kind. The three things that really interested me was the cost gaurd and that they saved over 1million lives in the summer, also the Salvation Army can make 10,000 meals a day, lastly when the meteroligist go into the hurricane they go slow and 5,000 to 10,000 feet high to collect data. I am so lucky I had this once in a life time experience. Also a big thanks to our awesome hosts Barbra and Philip.

Sincerely,

Bridget N.

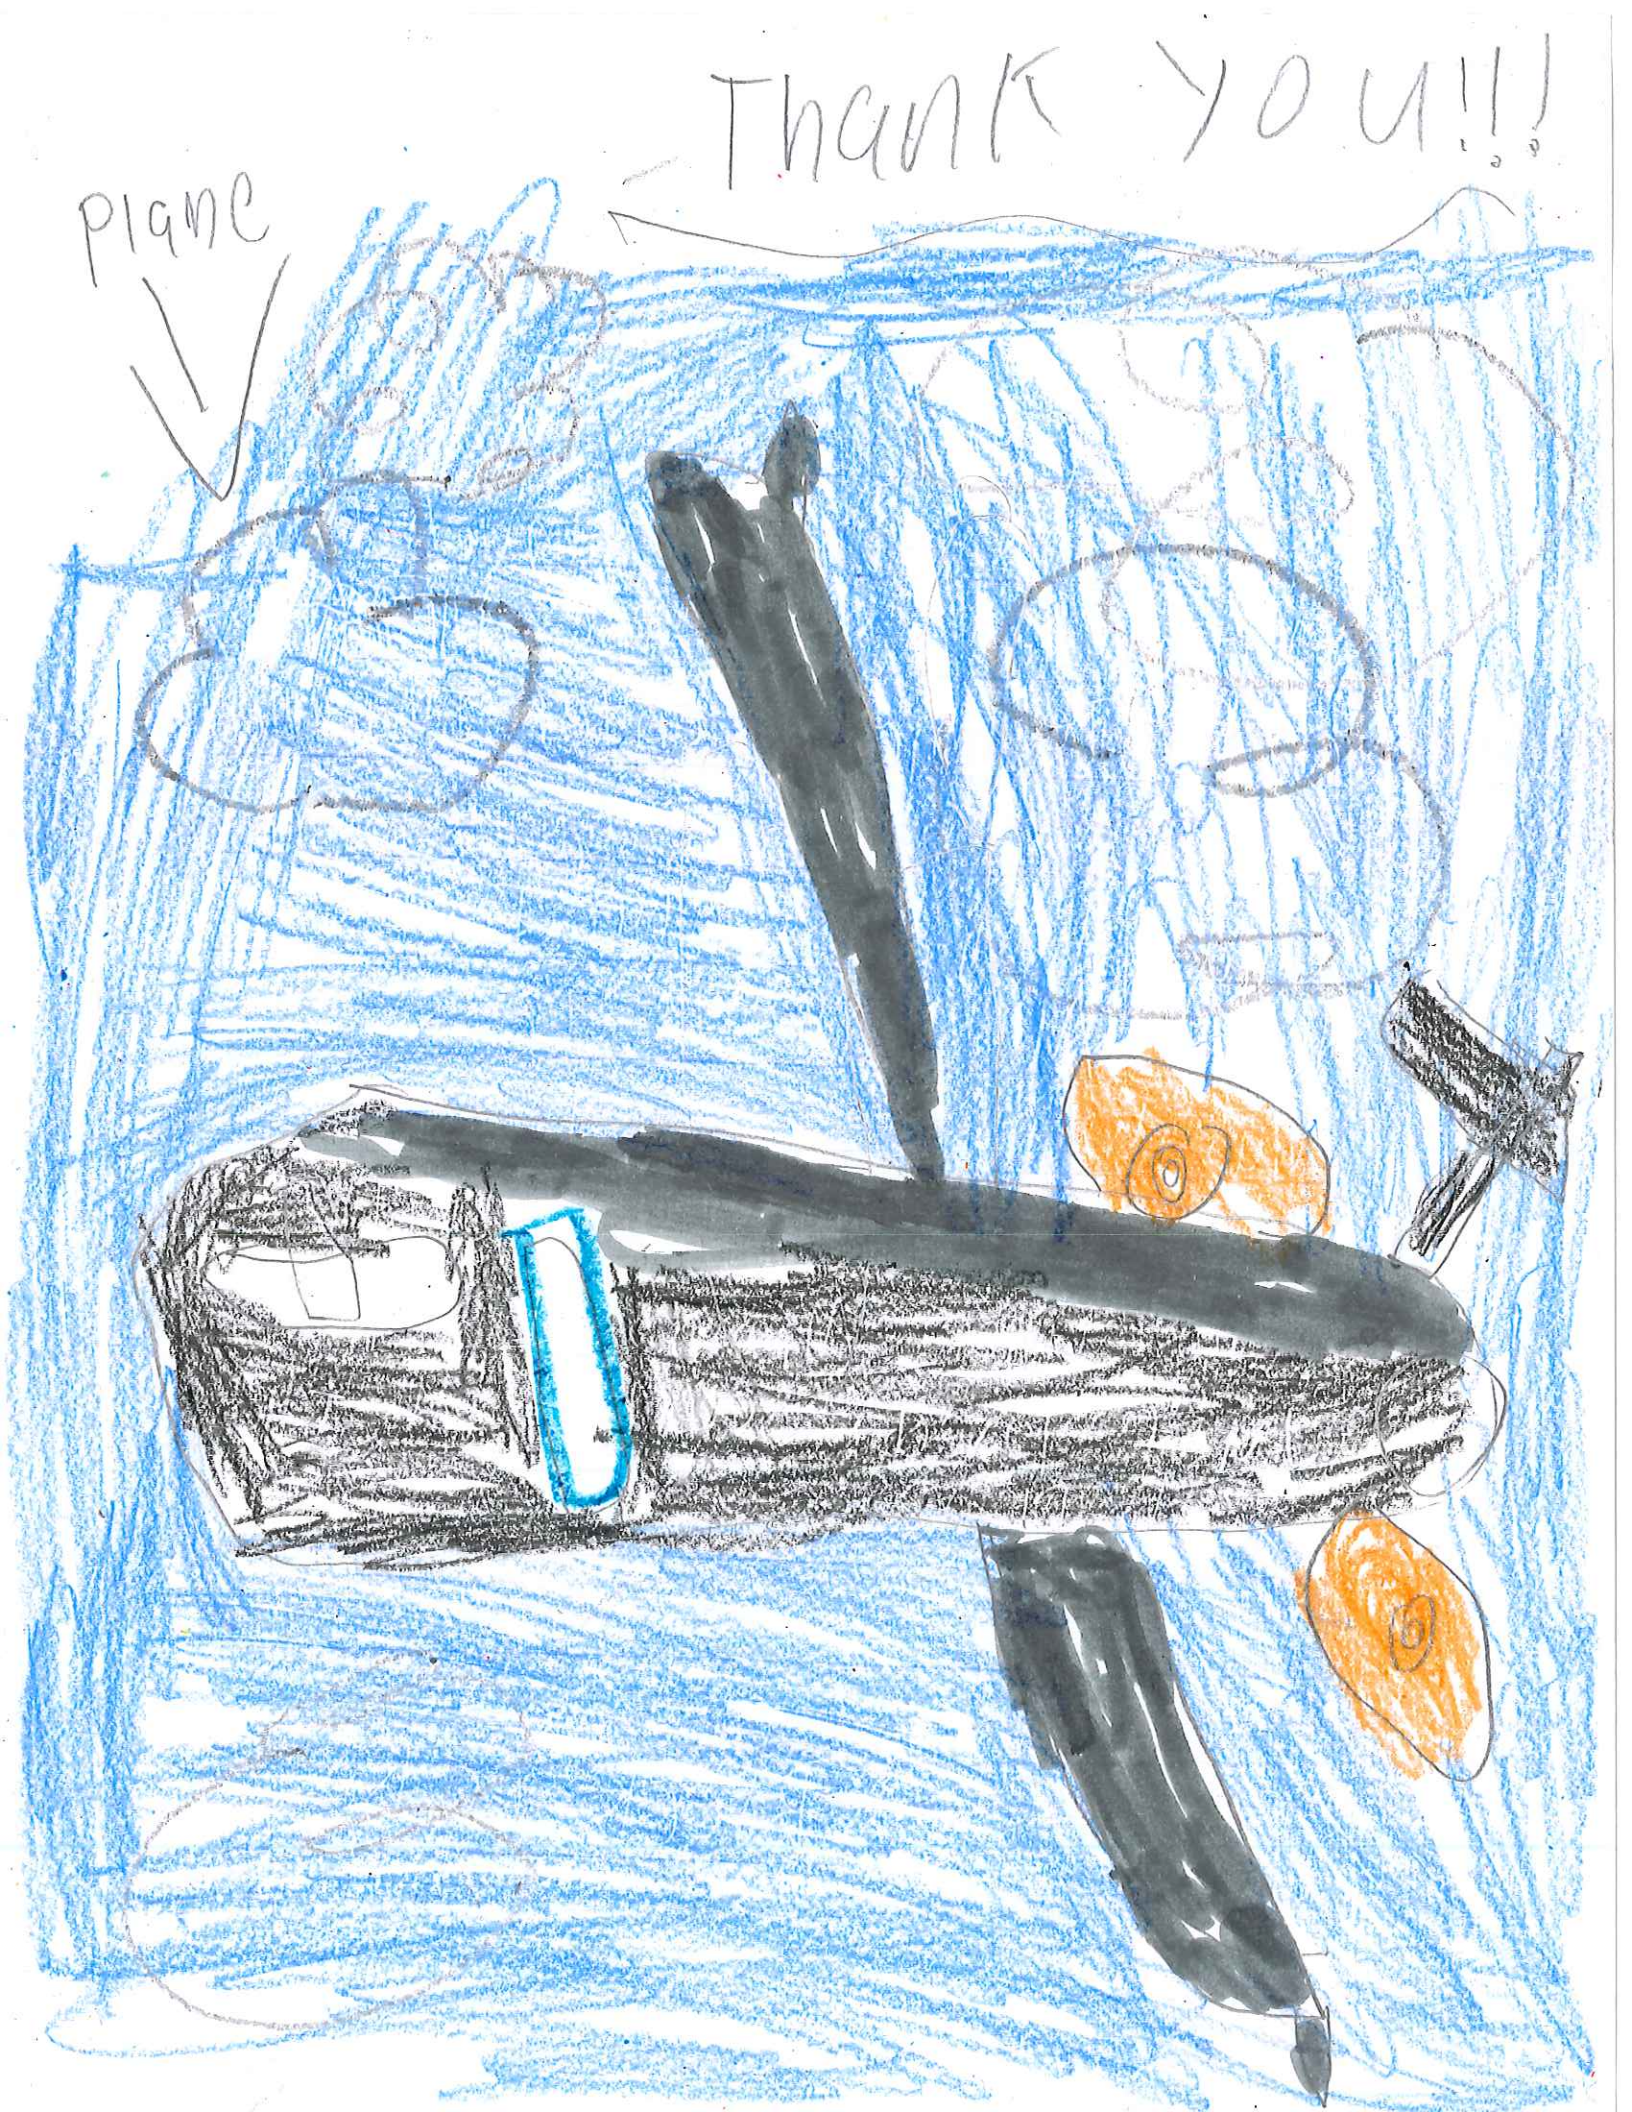
U.S. Coastguard
HELP!

Dear Ms. Corder,

Thank you so much for letting us go to the FAA Technical Center. I learned so many cool facts about hurricanes and tornadoes that I never knew. My favorite part was when we got to see an actual fighter jet with guns and missles. I also just loved seeing all the cool planes and jets.

Sincerely,

Brock Cook



Thank you!!!
plane

May 5, 2015

Dear Ms. Corder,

Thank you so much for letting our classes come to the F.F.A Center. It was a huge honor to be able to board the airplanes & learn new things from the experts theirselves.

While I was there, I learned about all the different instruments that meteorologists use to collect information about the weather conditions. I never knew it was such a complicated job to predict the weather, I always thought it was just by magic!

Flip page

Sincerely,

Valentina

Asenov

One of the most interesting subjects to me is how things produce & work. I learned how tornados form with a visual. And by visual, in a water bottle! I always thought tornados only happened in the sky, but I guess not! I'd never thought a small torndo could accur without natural weather products...

My favorite part was when we went on the planes. The different switches they use to fly the plane is mind blowing! Even though I'd never see myself as a pilot, I will always remember how much knowledge it takes to fly a plane.
