May 5, 2015

Dear Ms. Corder,

Thank you for cordinating this wonderful experience for our class. The first thing I learned was that all planes have a symbol on their wing. Also, I learned that FAA stands for federal, administration aviation. The last thing I learned was how hurricane trackers go to the bathroom and sleep on that grant plane. Thank's for the once in a lifetime opportunity, I hope I can come again!

Sincerely,

Katherine

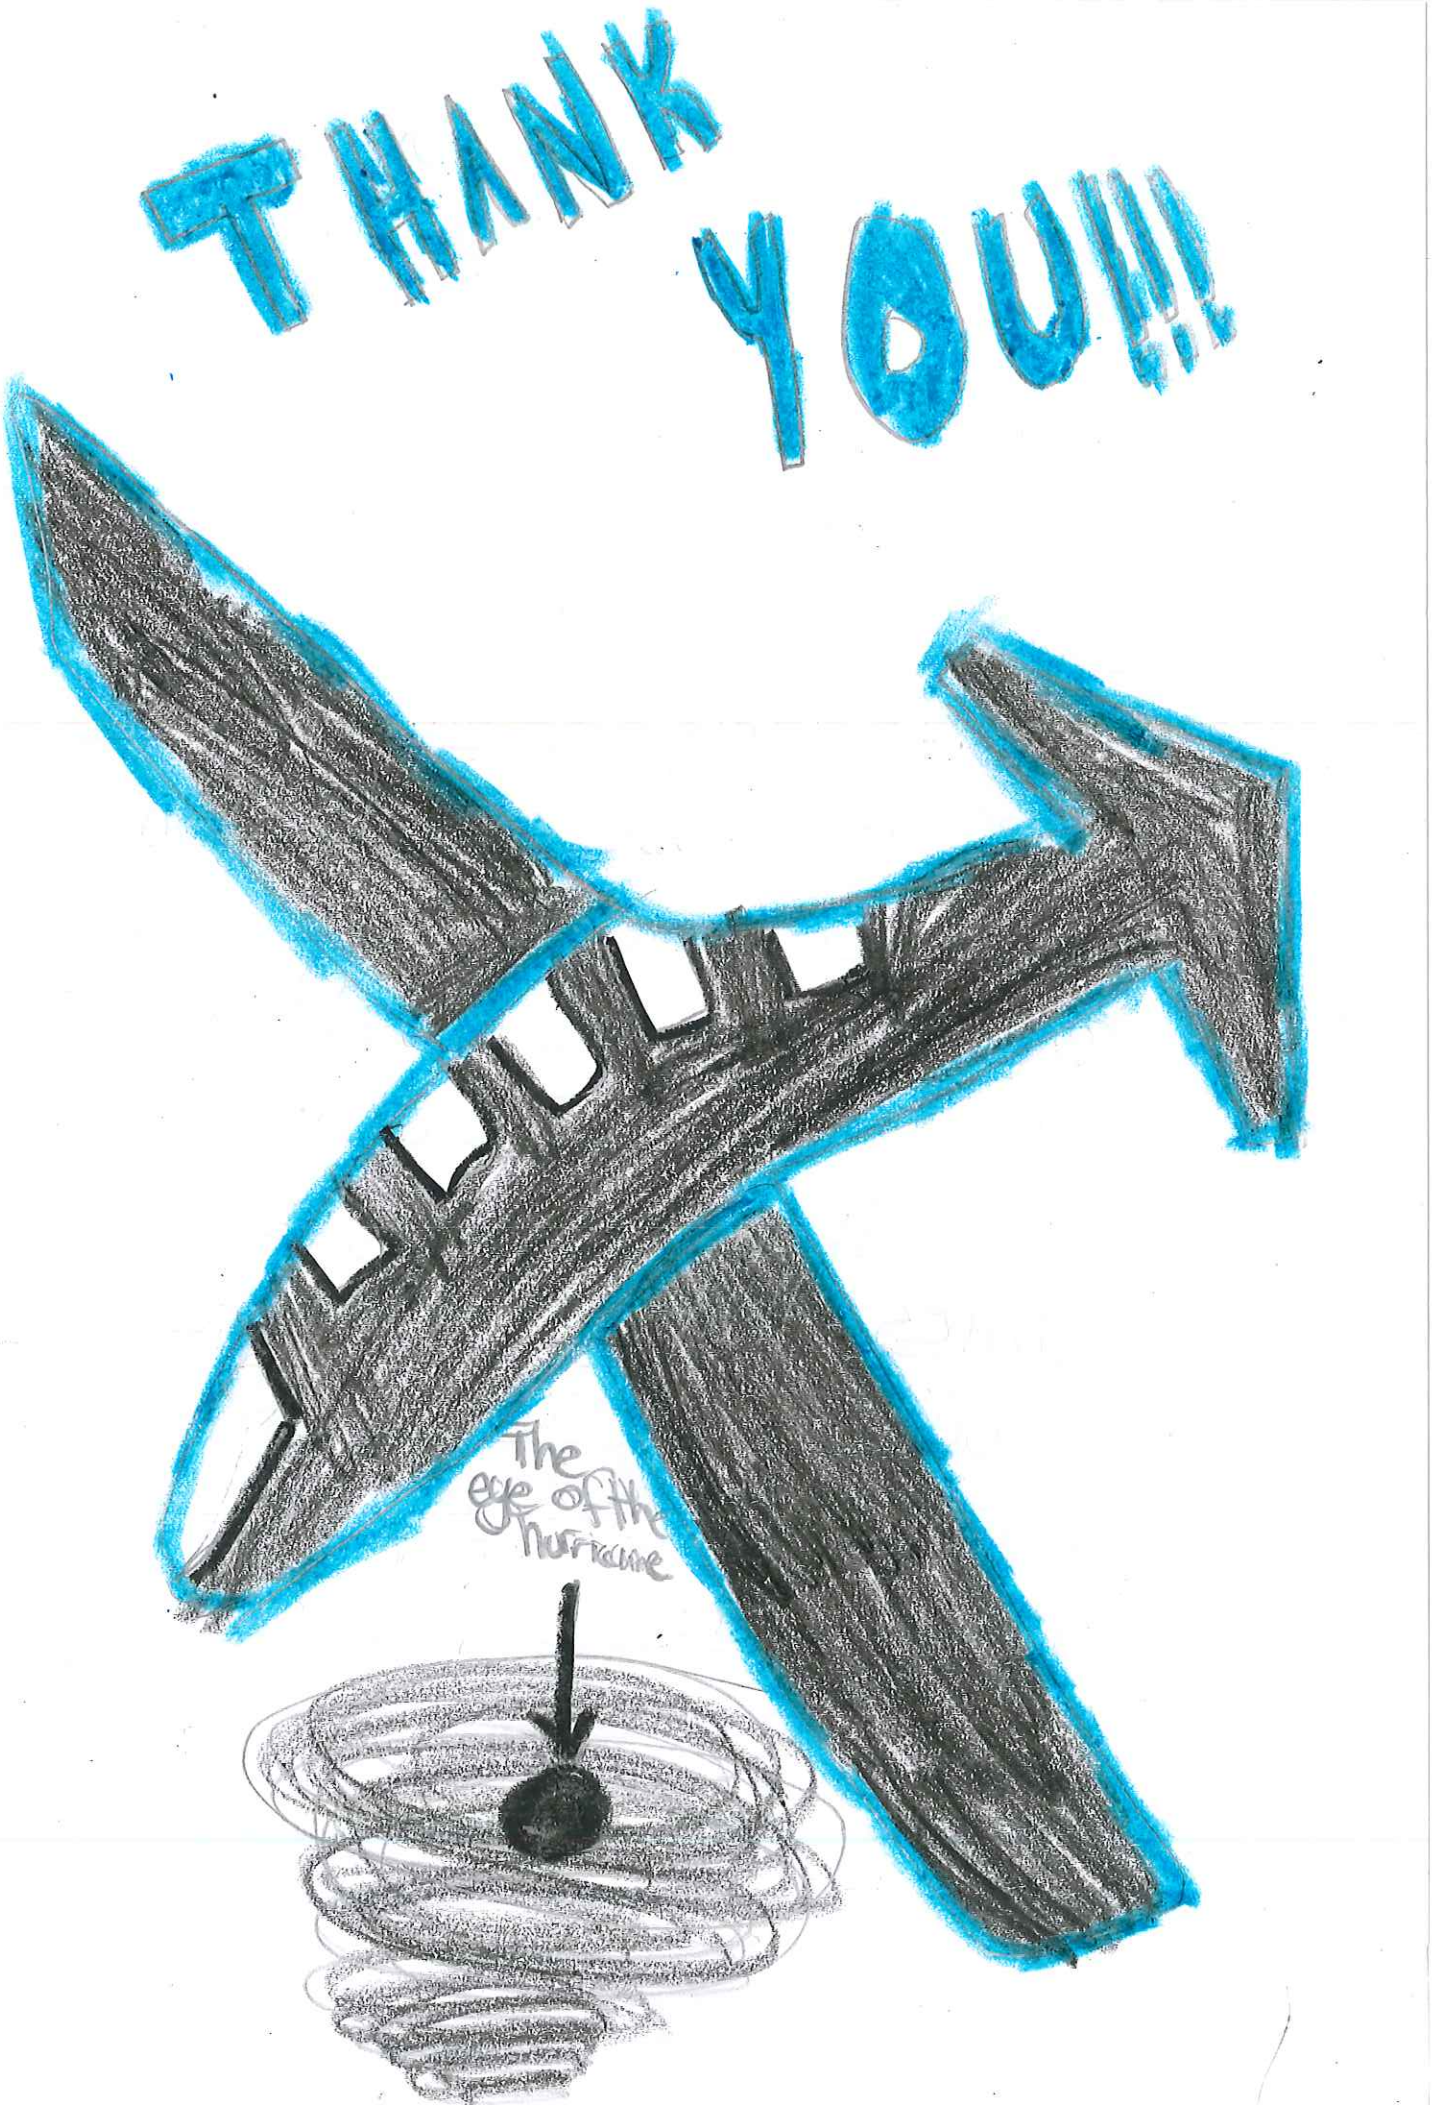
May 5, 2015

Dear Ms. Corder,

Thank you so much for having us at the FAA Tech Center! It was really good expierience for me to learn about hurricanes. It was really fun going in different planes to see what was in them and seeing planes that acutually went into different hurricanes. Again, thank you so much!

Sincerely,

Addison



THANK YOU!!!
The eye of the hurricane

May 5, 2015

Dear Dear Ms. Corder,

Thank You for aranging the trip to tech Center. I had lots of fun. I would like to share with yaa what I have learned.

First, I have been taught how People collect data from the airplane. They drop some device into the water and it has censors that collect the data. Also, they have cushions that they stick in the engines so birds don't fly into them. Then, we learned that they have enough gass in the Planes to fly 13 hours. We had fun, Thankyou!

Sincerely,

Phoebe M.

May 5, 2015

Dear Ms. Corder,

Thank you for inviting us to the F.A.A. I had alot of fun and learned so much. I learned that hurricane Sandy was a category 1 hurricane. I also learned that how they collected information about the hurricane was by dropping a tube in the hurricane. 1 more thing I learned was that hurricanes can have tornadoes in them. Thank you again for inviting us.

Sincerely,

Mackenzee Segick

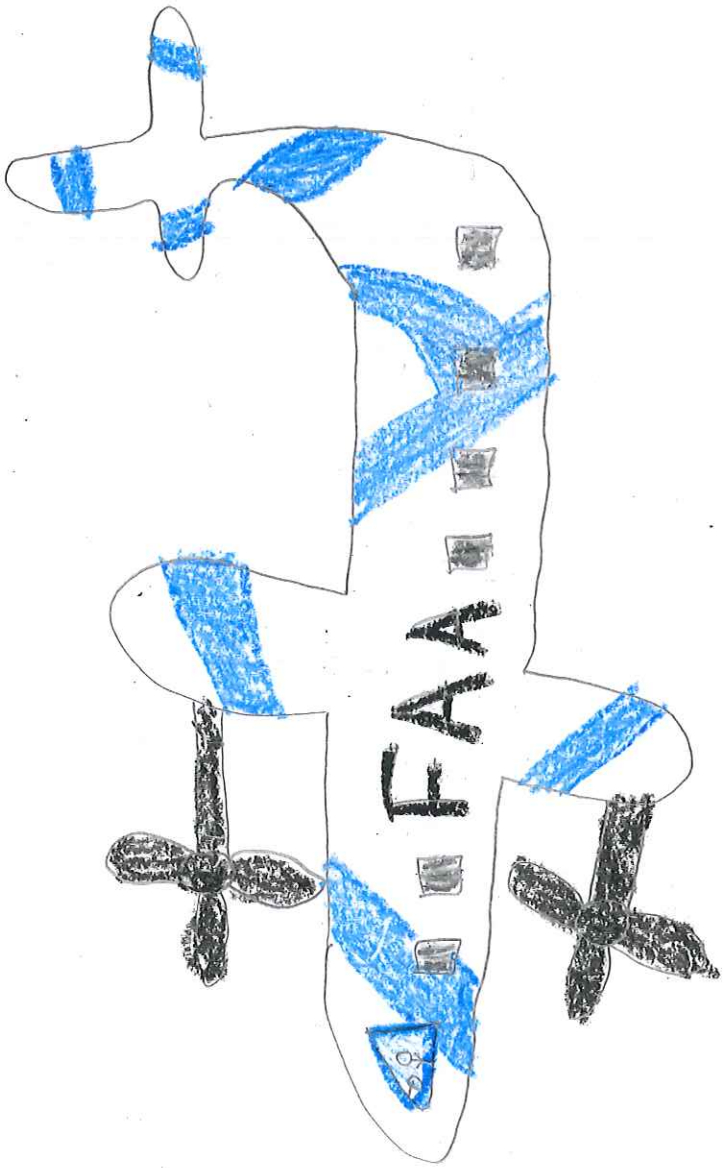
May 5, 2015

Dear Ms. Corder,

Thank you so much for inviting us to the Federal Aviation Association. It was a great opportunity to come see and walk inside the special planes that go through the eye of a hurricane. I got to learn a lot about the tools to measure wind speed and other things. Learning about hurricanes and tornadoes was really fun!

Sincerely,

Lily B.



FAA

May 5th 2015

Dear Ms. Corder,

Thank you for the trip. It was so much fun. I learned that they drop an instrument into the water to gather info. Also, I learned that army people help with hurricanes. And I learned all the different planes. Thanks again.

Sincerely,

Evan Schweibinz

Thank you

Dear Ms. Corder,

I Really learned a lot at the FAA on Hurricanes and Tornadoes, and I really Wanted you to thank Dr. Murphy for letting us go. So now I'm going to tell you some things I learned here.

The first thing I learned that Hurricanes can be Catorized into 1, 2, 3, 4, and 5. Next, I learned that most of the Planes they use are very old.

Lastly, Coast Guards have saved over one million Lives.

Sincerely,

Duke McCarron

Thank you

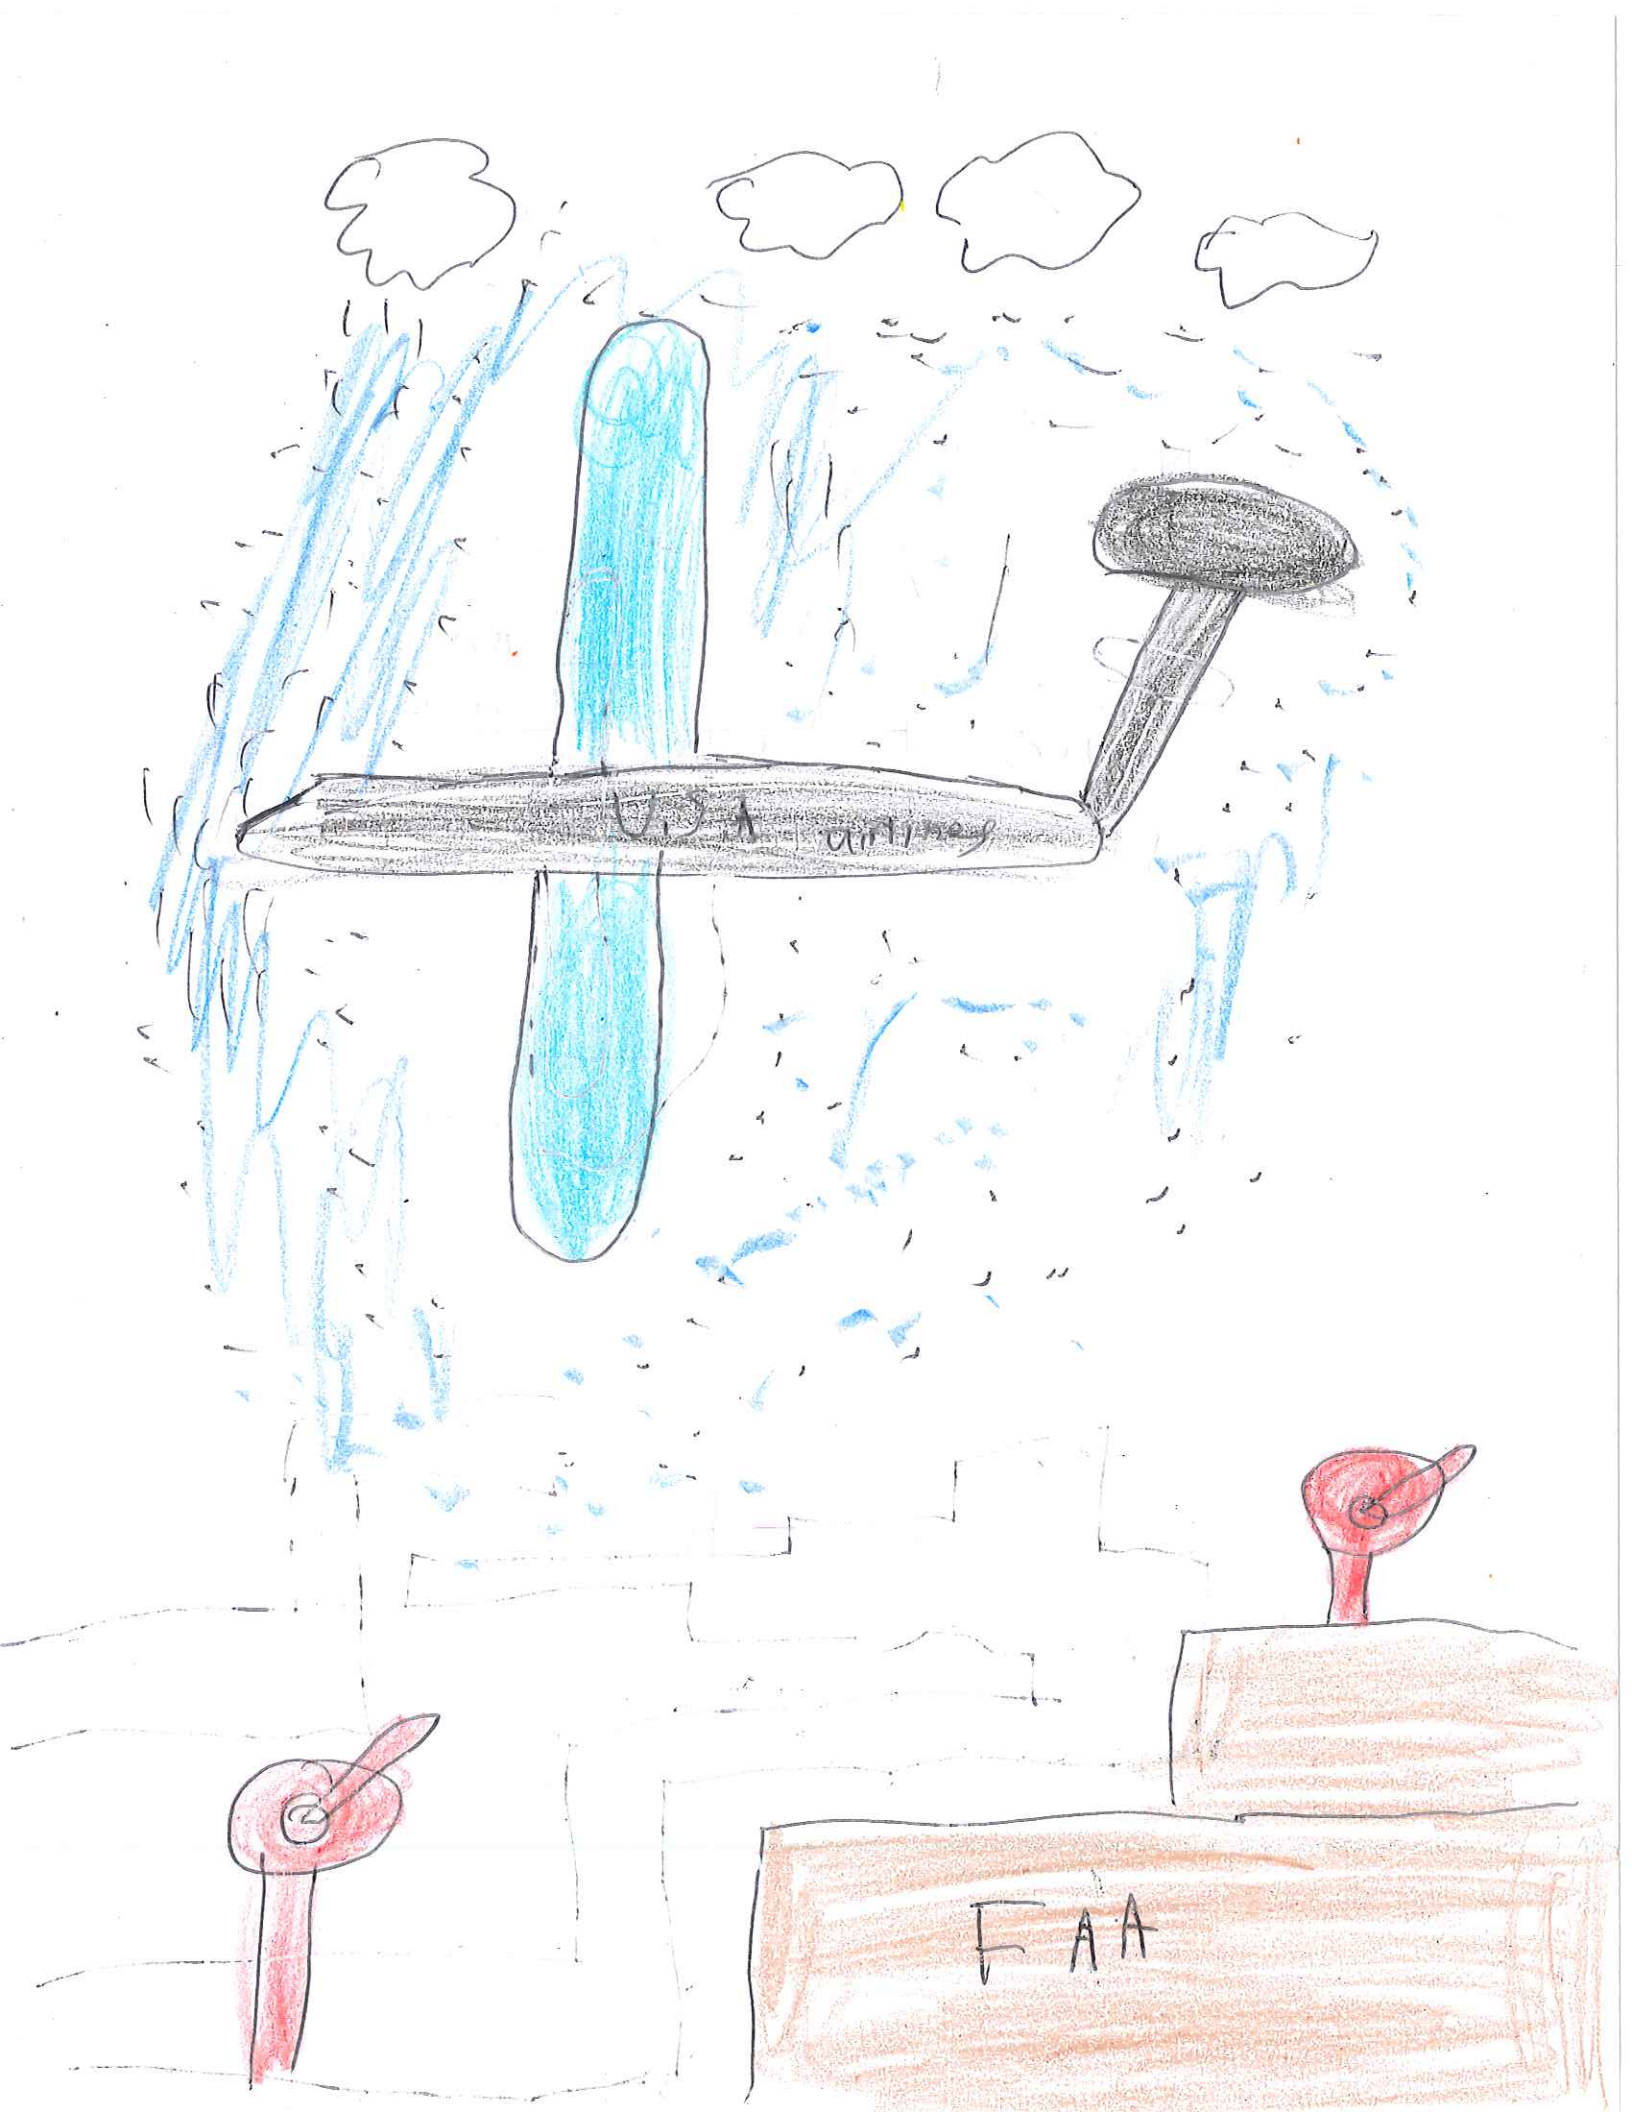
May 5, 2015

Dear Ms. Corder,

I had a great time coming to the FAA center. It was really fun. I will tell you why. This was my first time coming to something like this. I learned new and cool things. So it was a lot of fun. The FAA center was amazing. I hope I can come again soon.

Sincerely,

Winfield



U.P.A airlines
FAA

May 5, 2015

Dear Ms. Corder,

I learned a lot of things at the FAA tech. center and this is what I learned...

one thing I learned was a GPS for a plane is called a radar. Another thing I learned is that without the wing of the plane it cannot fly. The last thing I learned is that they use a certain plane to fly into hurricanes not a regular passenger plane.

Sincerely,

Lauren Doliszny

May 5, 2015

Dear Ms. Corder,

Thank you for scheduling us to be able to go to the FAA Tech Center. I learned that there is a tool that is used to see all of the air planes nearby. That was super cool. They must never interfear with other air planes. I also learned that when hurricane hunters are in a storm they drop a Doppler Tube into the storm to find the temperture and which way the storm is headed. Lastly, I learned that hurricanes have 5 different categories. Category 5 is the worst category.

Sincerely,

Mattea Brozyna

Category 5 Hurricane

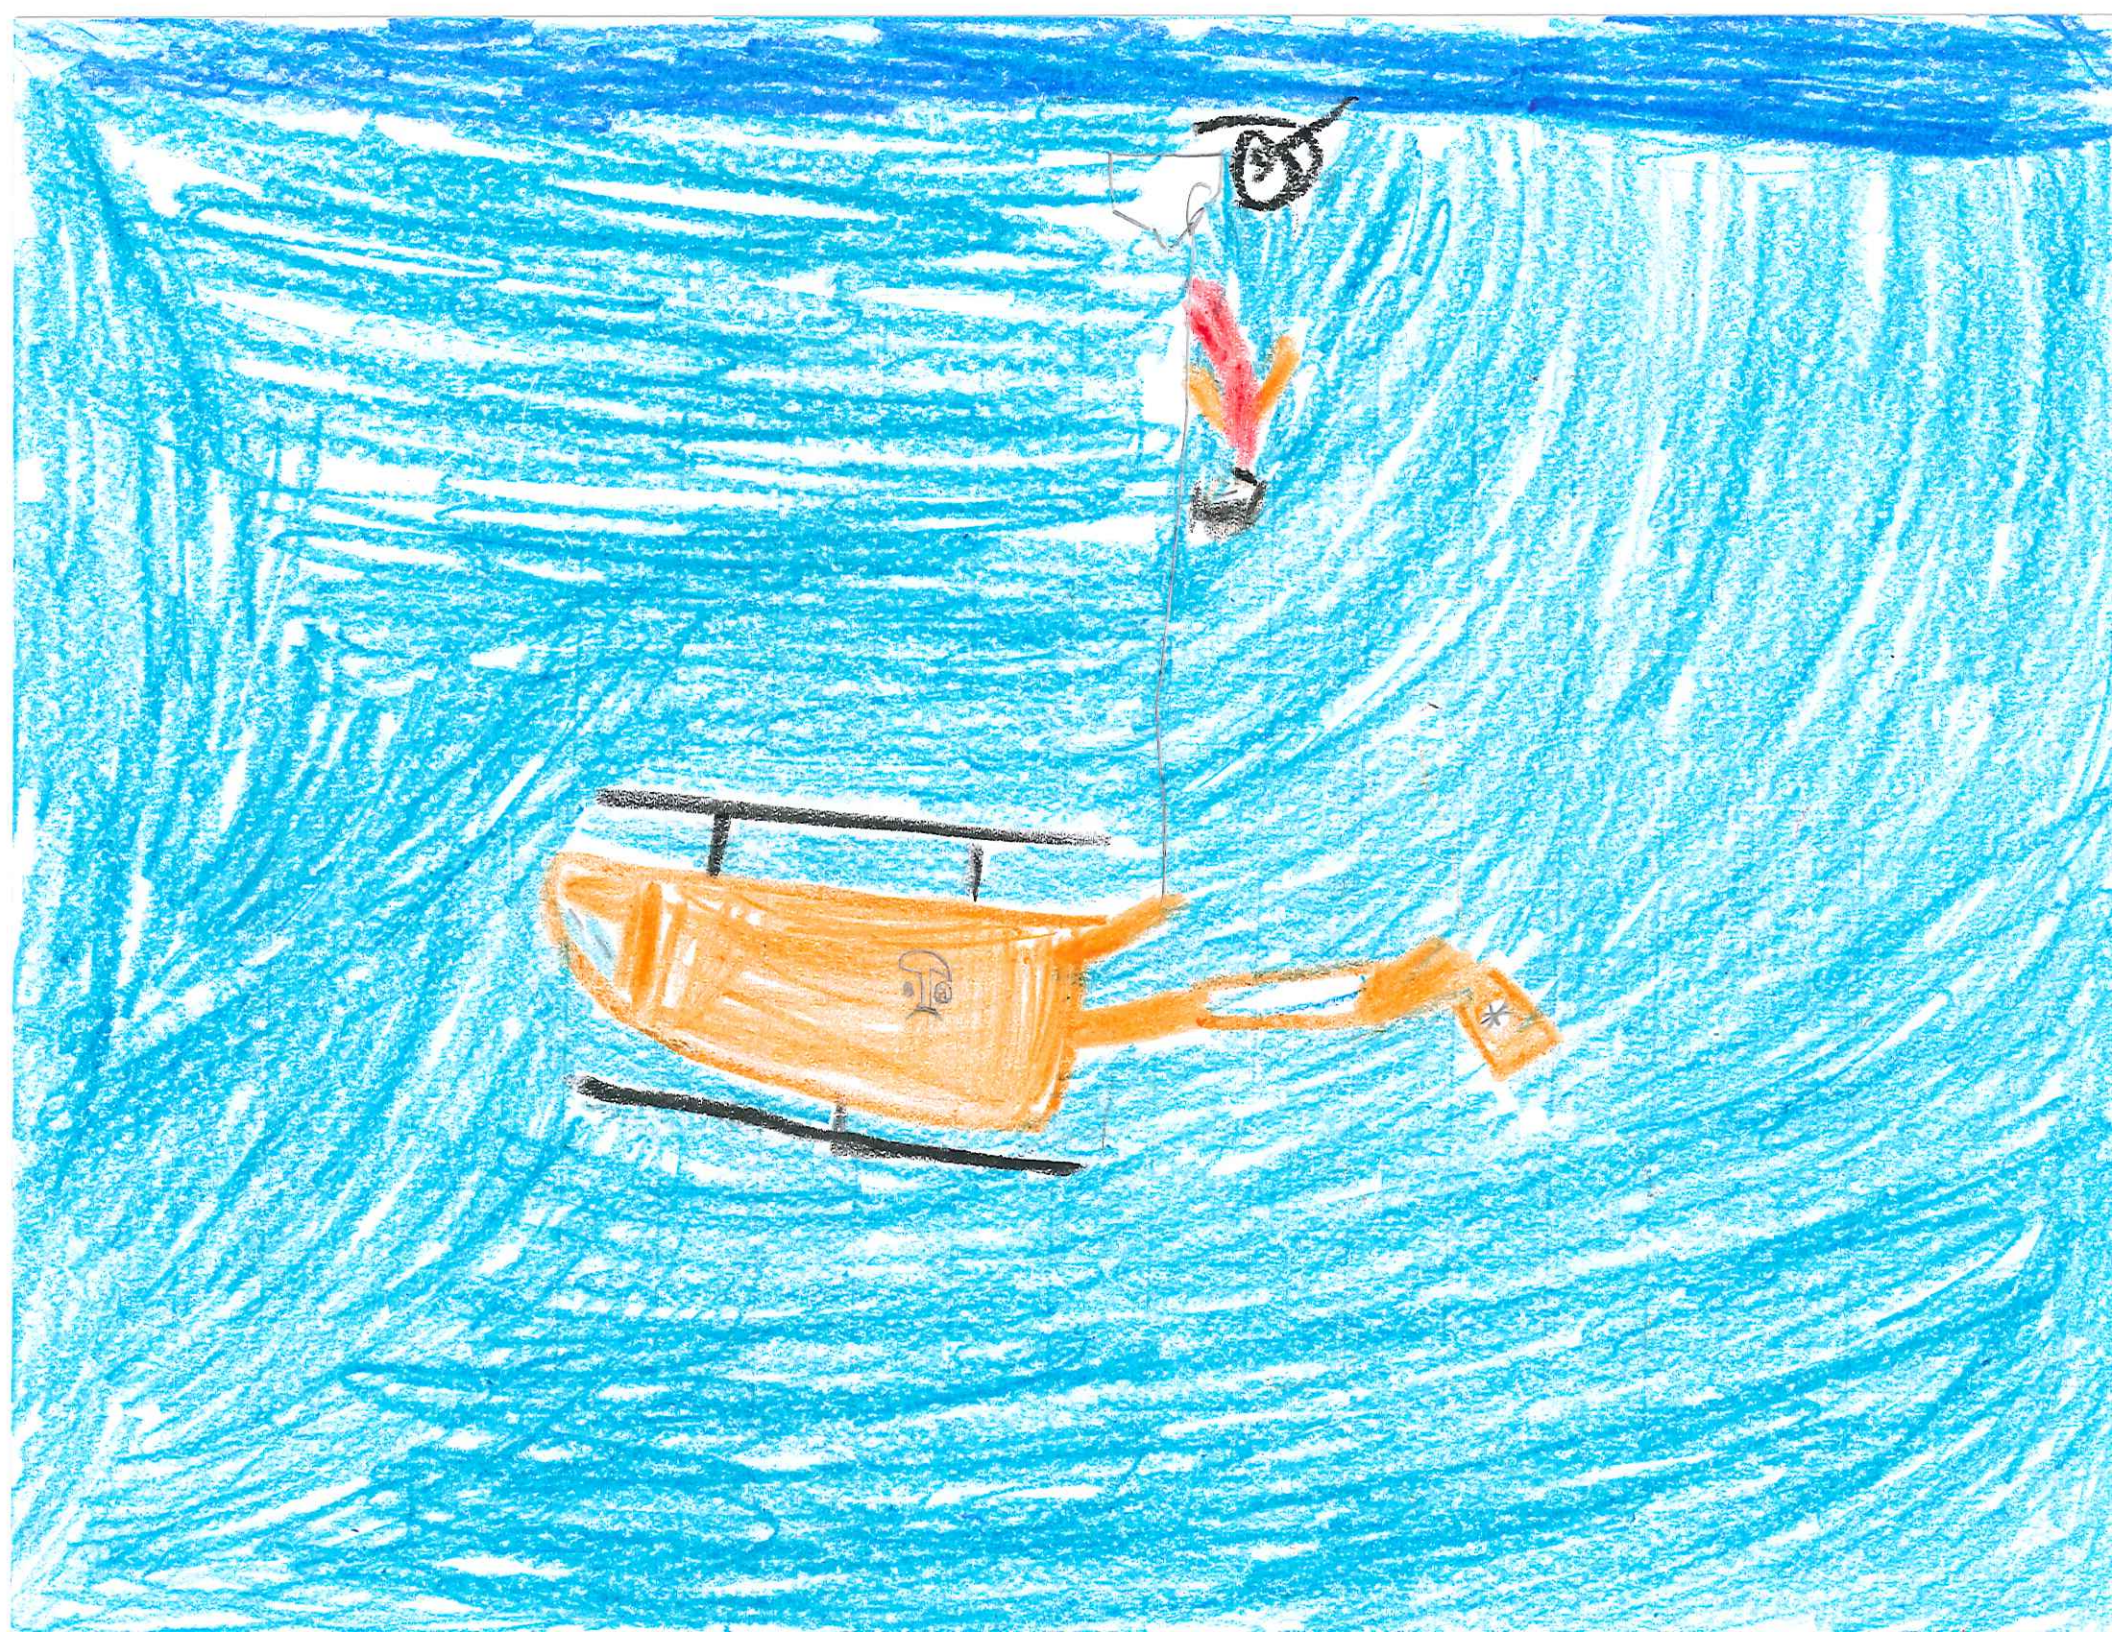
May 5th 2015

Dear Ms. Corder,

Thank Yo r Thank you for helping the fourth grads get in to the technical center, it was really fun. I learned a lot about Air planes and a lot about weather-science. It was really fun to be in all of those cool vechiles. My favorite was the Coast guard helicopter, it looked cool how it takes people out of the ocean and with all the. batters and staff. Thank you for helping us get in :)

Sincerely,

Judah Silkerson



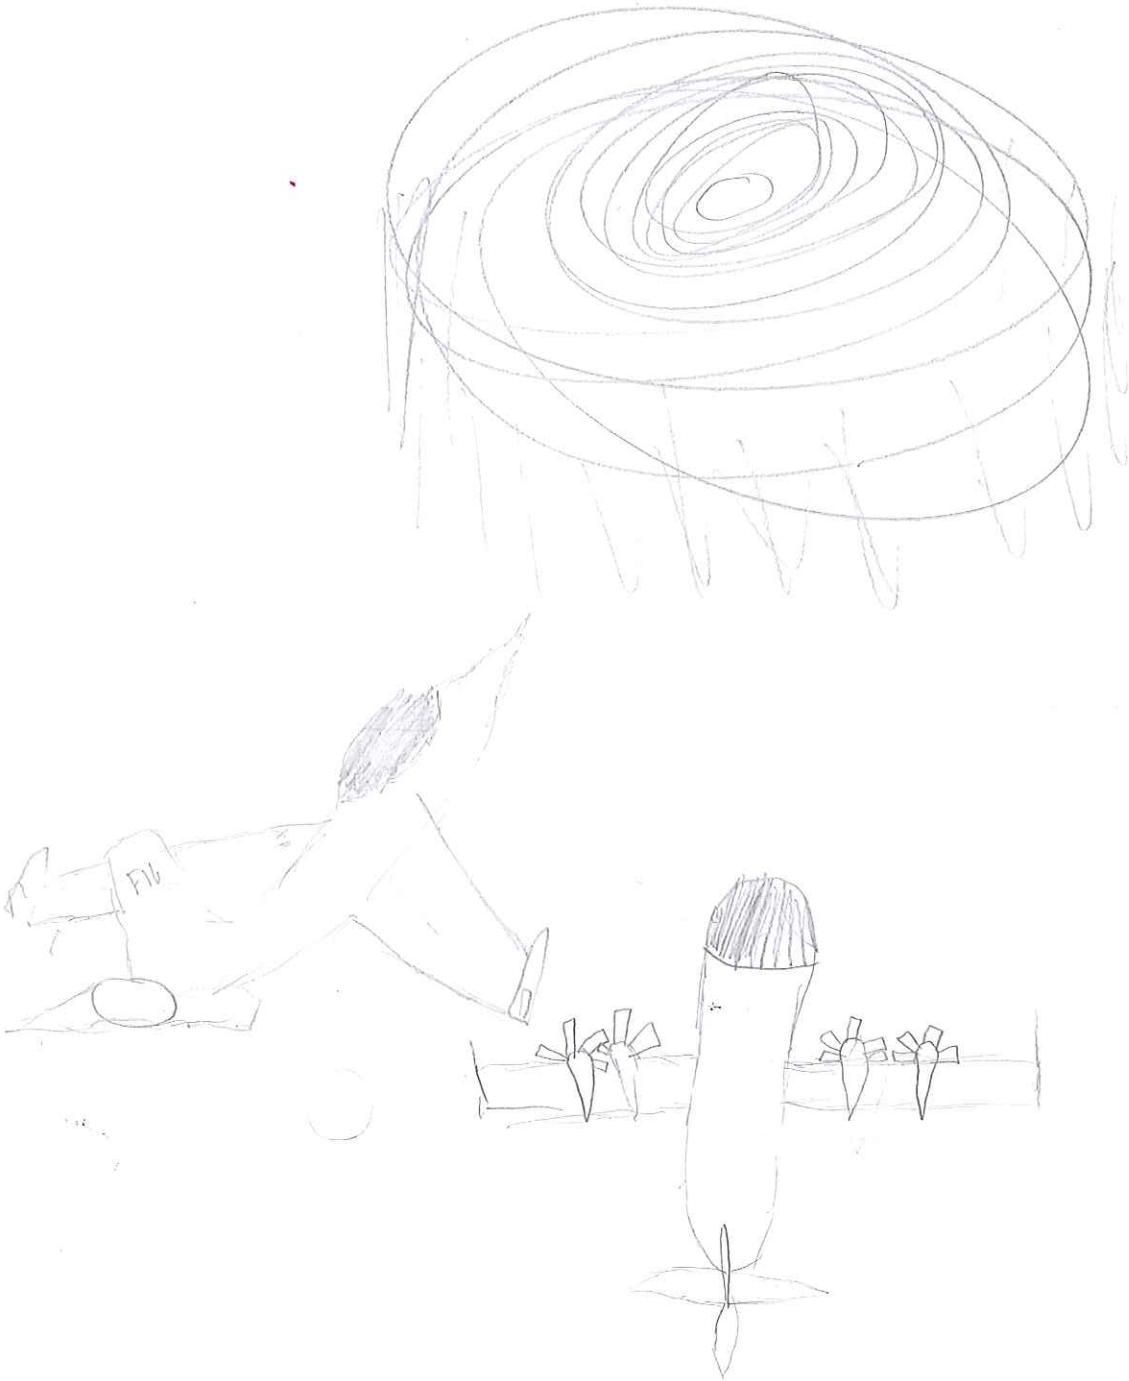
May 5, 2015

Dear Ms. Carder,

Thankyou so much for the opportunity to see FAA tech crew. I loved seeing the F-16 and the hurricane planes and the chopper. I learned what it looks like in a chopper and hurricane plane. Also what the instruments you use look like. Thanks again!!

Sincerely,

Colin O'Brien



May, 5, 2015

Dear Ms. Corder,

Thank you so much for letting me and my friends have the opportunity to go to the FAA Tech Center. I learned many things at the Tech Center and here are a few I know that last year the the coast guards saved 1 million people. Also, if hurricane planes fly above 10,000 ft. ice could frezze on the plane. Lastly, I learned that there are 5 people on the plane when they go into a hurricane. Thank you again, I hope I can come back.

Sincerely,

Ellie Kutschera

May 5, 2015

Dear Ms. Carter,

I was very thankful that I got the opportunity to see your planes and hear your presentation. First, I learned that Hurricane planes fly at only 10,000 feet so that the plane doesn't freeze. In addition, I learned that Hurricane season starts in June and ends in September. Finally, I learned that the eye is very peaceful and you can see straight down to the surface inside of it. Thank you very much for telling me about Hurricanes.

Sincerely,

Steve

USAF

May 5, 2015

Dear Ms. Carder,

Thank you so very much for every-thing you did for us. We much appreciate it and thanks for your help and care to stand by us and gurde us. Thanks to you, I learned a lot of cool things like you have to use headphones and speakers to hear eachother on the planes. Also, I heard that you have to use a GPS and you can see the planes flying (green) and us (darkish red). Lastly, I heard you saved over ONE MILLION peoples lives by the coast gaurd choppers that are so very cool. Thanks for everything.

Sincerely,

Bridget Millar

Guard
chopper

May 5, 2015

Dear Ms. Corder,

My classmates and I enjoyed and were so inspired by the presentations and all the cool planes and equipment! My favorite part were the coast guards. Did you know they have saved over 1 million people's lives! I was also so impressed by how brave and and crazy those people are to fly in a giant plane and zoom right into the eye of a hurricane. P.S. We loved the sunglasses!

Sincerely,

Cameron Keir

May 5th, 2015

Dear Ms. Cordor,

Thank you for organizing the trip to the FAA Tech Center. It was a Cogrecat trip. I learned that the Coast Graurd saves over 1,000,000 people each summer. Also, Only 6 peeps are needed to go inside a hurricane. We also learned that hurricanes start at 74 miles per hour.

Sincerely,

Evan Merritt

6/5/15

Dear Ms. Corder,

It was a very big privilege for my class and I to be able to come to the F.A.A. Technical Center, where we learned how the planes are built to fly through the eye wall of a hurricane. Also how planes don't use radar but use a G.P.S. to navigate. Lastly, to top it off, I learned that last year alone the Coast Guard rescued over 1 million people. This experience was a once in a life time experience and I hope I can do it again.

Sincerely,

Zach M.

yes

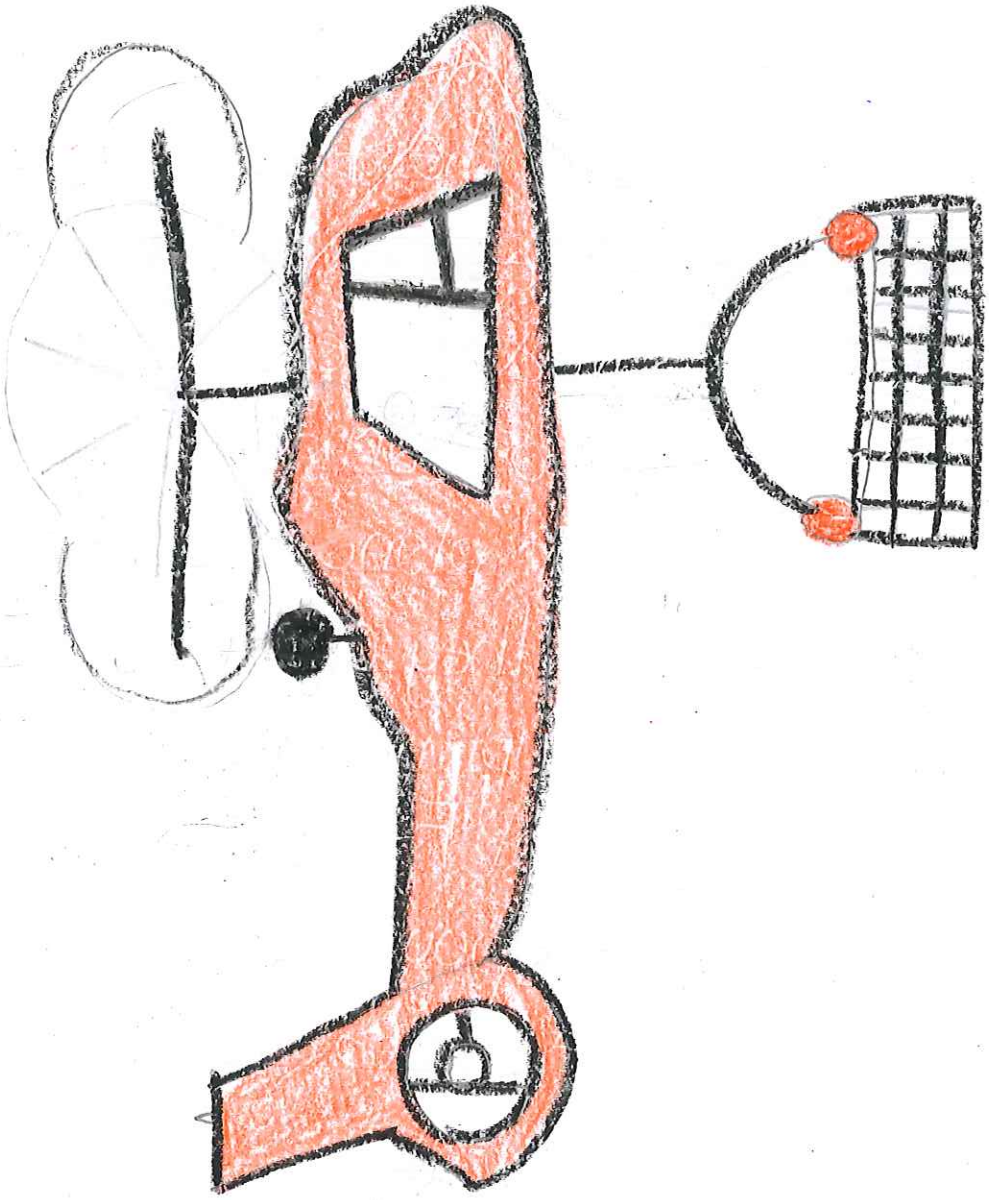
May 5, 2015

Dear Ms. Corder,

Thank you for letting me and my class go to the FAA Center. We learned alot there. I learned that the Coast Guard saved more than one million people last year! I also learned that now if one of your planes go up in a hurricance they can see where other planes are up in the sky. Lastly, I learned that F-16 plane can hold up to 175,000 pounds. So thank you again for letting us go to the FAA and we learned a lot.

Sincerely,

Julia N.



May 15. 2015

Dear Ms. Corder,

Thank You for letting us come It was very exiting. I liked that we could ask a question and it would Be answered. I learned alot about How and why You track hurricanes and Tornadoes. Thank You for giving us things for a Bag That was qBout more hurricanes and Tornados.

Sincerely,

Hosanna.B

coast guard helicopter

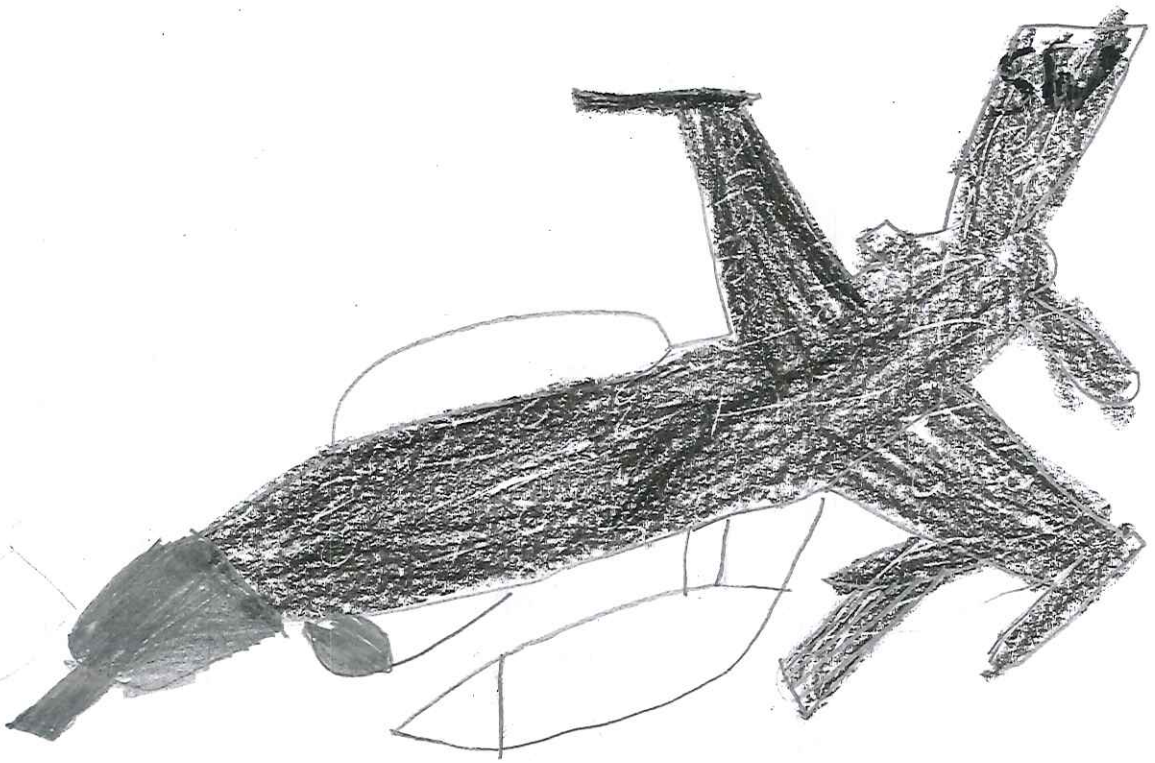
May 5, 2015

Dear Ms. Cordell,

Thank you for letting us come to the FAA Tech Center. There we learned lots of thing like I learned the F-16 can hold up to 175 thousand pounds. Also the planes that fly in hurricanes can hold up to 150 thousand pounds. Last but not least, I learned that there is a tube with all the tools inside and it gets everything they need to study hurricanes.

Sincerely,

Ethan E.



F-16

May 5, 2015

Dear Ms. Corder,

Thank you for giving me the opportunity to visit the FAA Technical Center. It was such a privilege and I learned so much! One thing I learned was FAA stands for Federal Aviation Administration. I also learned that taping your windows does nothing against hurricanes. I now know that before radars, planes had a higher chance of getting into crashes. Thank you so much, once again!

Sincerely,

Andi Helphenstine
