	07/01/15 21:03 CST		0	Source: NWS Storm Survey
A NWS storm survey concluded that a EF-1 tornado touched down on the west side of Warsaw. The estimated maximum wind speeds were up to 95 mph. The tornado touched down about 3 miles northwest of Warsaw and lift just west of downtown Warsaw. The path width was estimated to be around a quarter of a mile wide and was on the ground for over 3 miles. Numerous trees were uprooted along the path. A metal building was damaged. A boat dock was flipped and heavily damaged with 7 boats sunk at the dock. A fireworks tent was blown over. There were a couple of trees that fell on to recreational vehicles at a RV park.
