FOR THE 00Z TAFS...

FAIRLY QUIET WEATHER CONDITIONS ARE EXPECTED THROUGH MUCH OF THE PERIOD. A CLIPPER SYSTEM IS EXPECTED TO MOVE OVER THE UPPER MIDWEST ON WEDNESDAY. HOWEVER, IT APPEARS THAT THE PRECIPITATION ASSOCIATED WITH IT WILL REMAIN NORTH OF THE AREA. AS A RESULT, ONLY SOME MID-LEVEL CLOUDINESS IS EXPECTED DURING THE DAY. SOUTH-SOUTHWESTERLY WINDS CAN BE EXPECTED, WITH A FEW GUSTS AT TIMES UP TO AROUND 16 KT ON WEDNESDAY. A COLD FRONT WILL SHIFT ACROSS THE AREA WEDNESDAY EVENING, AND THIS COULD RESULT IN A PERIOD OF MVFR CIGS WEDNESDAY NIGHT. OTHERWISE, EXPECT THE WINDS TO BECOME WESTERLY IN THE WAKE OF THE FRONTAL PASSAGE.
