

Weather Overview

Sunday, Jun 14

Monday, Jun 15

Tuesday, Jun 16

Wednesday, Jun 17

Thursday, Jun 18

Friday, Jun 19

⚡ ■ Scattered to numerous thunderstorms will produce dangerous lightning, posing a threat to anyone outdoors.

⚡ ■ Isolated severe storms may produce large hail capable of damaging vehicles and/or damaging wind gusts capable of downing tree limbs and causing isolated power outages.

☁ ■ [Burn Scar]: A low to moderate risk of flash flooding exists near burn scars; resulting debris flows may damage roadways and structures.

⚡ ■ Isolated to scattered thunderstorms will produce dangerous lightning, posing a threat to anyone outdoors.

☁ ■ [Burn Scar]: A low risk of flash flooding exists near burn scars; resulting debris flows may damage roadways and structures.

🌡 ■ Increased risk of heat-related illness for those extremely sensitive to heat and individuals spending extended time outdoors.

🔥 ■ Brief, localized critical fire weather increases the growth potential of new starts, potentially leading to rapid spread.

🌡 ■ Elevated risk of heat-related illness for sensitive groups and individuals without effective cooling or adequate hydration.

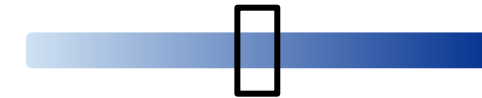

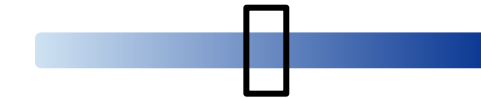

🔥 ■ Brief, localized critical fire weather increases the growth potential of new starts, potentially leading to rapid spread.

🌡 ■ Increased risk of heat-related illness for those extremely sensitive to heat and individuals spending extended time outdoors.

⚡ ■ Isolated to scattered thunderstorms will produce dangerous lightning, posing a threat to anyone outdoors.

🌡 ■ Increased risk of heat-related illness for those extremely sensitive to heat and individuals spending extended time outdoors.

⚡ ■ Isolated to scattered thunderstorms will produce dangerous lightning, posing a threat to anyone outdoors.
