## **Synopsis**

November 2022 started out with active weather focused across northern NM as several storms brought snow, freezing fog, strong winds, and much colder temperatures. The active weather spread to more of the state by the Thanksgiving holiday with widespread strong winds, periods of rain, and some heavy snow for southeast NM. High winds impacted the state again on the 29<sup>th</sup> but most areas remained dry.

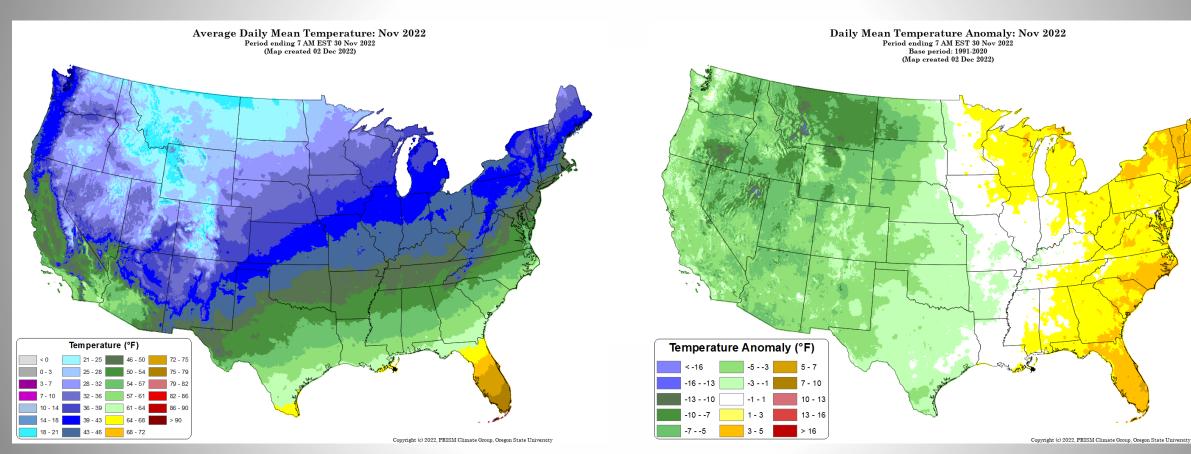

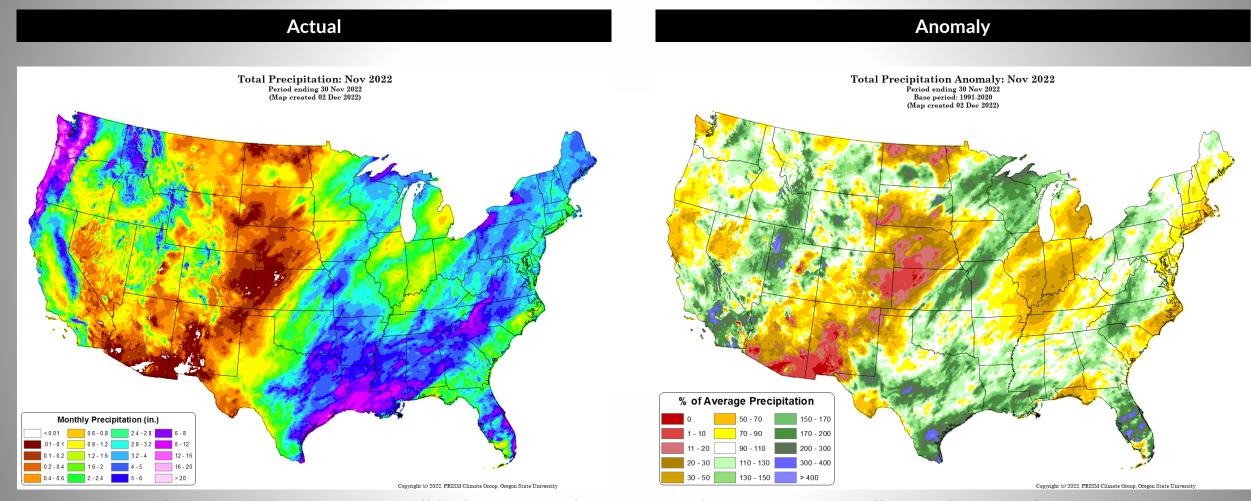

#### **Anomaly**

November temperatures were below normal across all of NM. November 2022 was the coolest November in nearly 20 years in many locations.

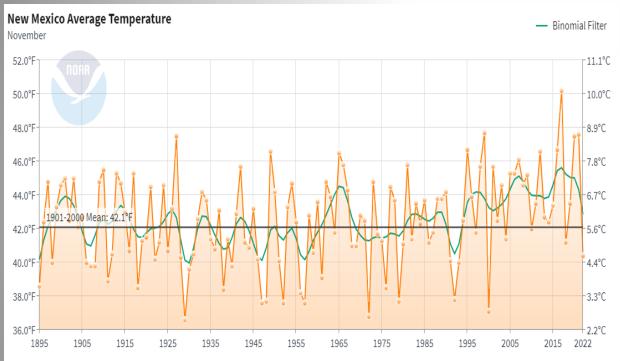

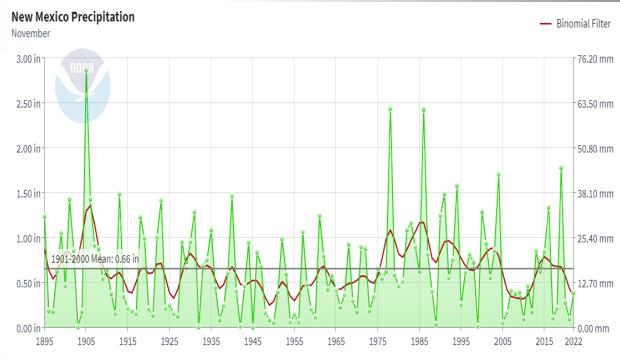

November precipitation was well below normal across much of NM, especially southern and central areas.

#### **Precipitation**

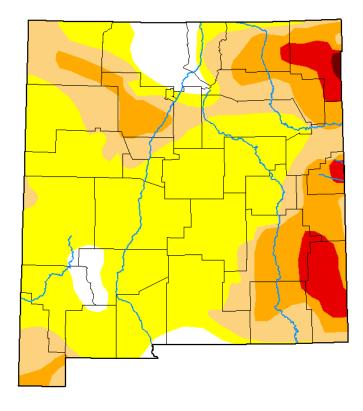

The November 2022 average statewide temperature was 40.4°, which was 1.7° below the long-term normal of 42.1° (1901-2000). This ranked as the 29<sup>th</sup> coolest November on record (1895-2022). November 2022 was the coolest November in 22 years.

The November 2022 average statewide precipitation was 0.39", which was 0.27" below the long-term normal of 0.66" (1901-2000). This ranked as the 48<sup>th</sup> driest November on record (1895-2022).

#### Author:

David Simeral

Western Regional Climate Center

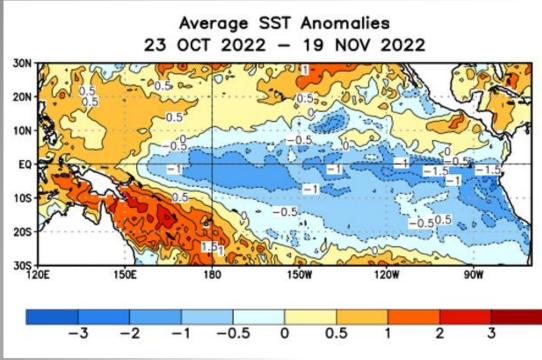

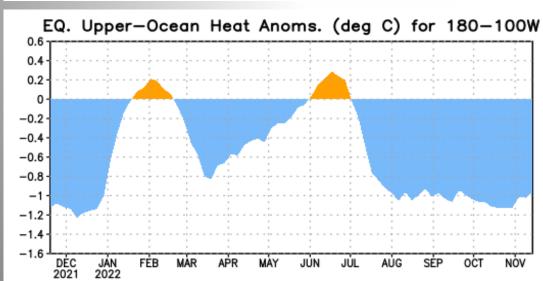

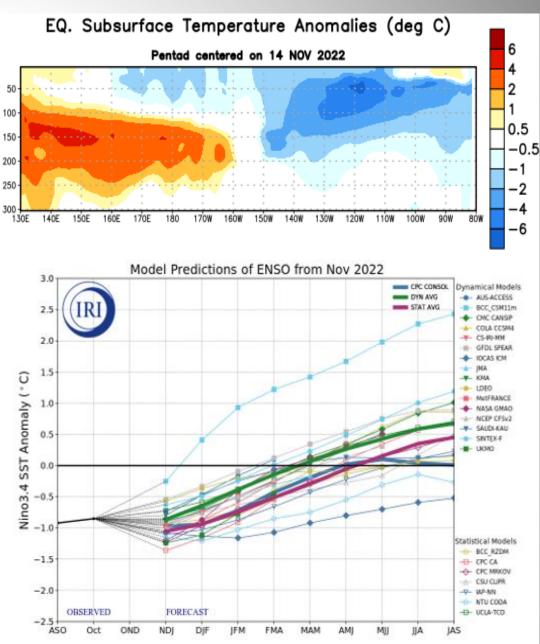

droughtmonitor.unl.edu

Drought conditions in November improved only very slightly across the state. Despite several rain and snow events that impacted the region, precipitation amounts were fairly light with most areas picking up less than one-half inch. The exception was for the snow event across southeast NM over Thanksgiving that led to above normal precipitation for November 2022.

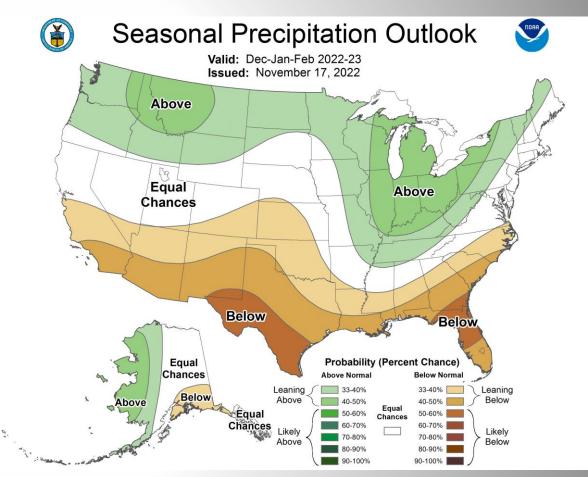

# Seasonal Temperature Outlook Valid: Dec-Jan-Feb 2022-23 Issued: November 17, 2022 **Below** 53 Equal Chances **Above** Above Probability (Percent Chance) Chances

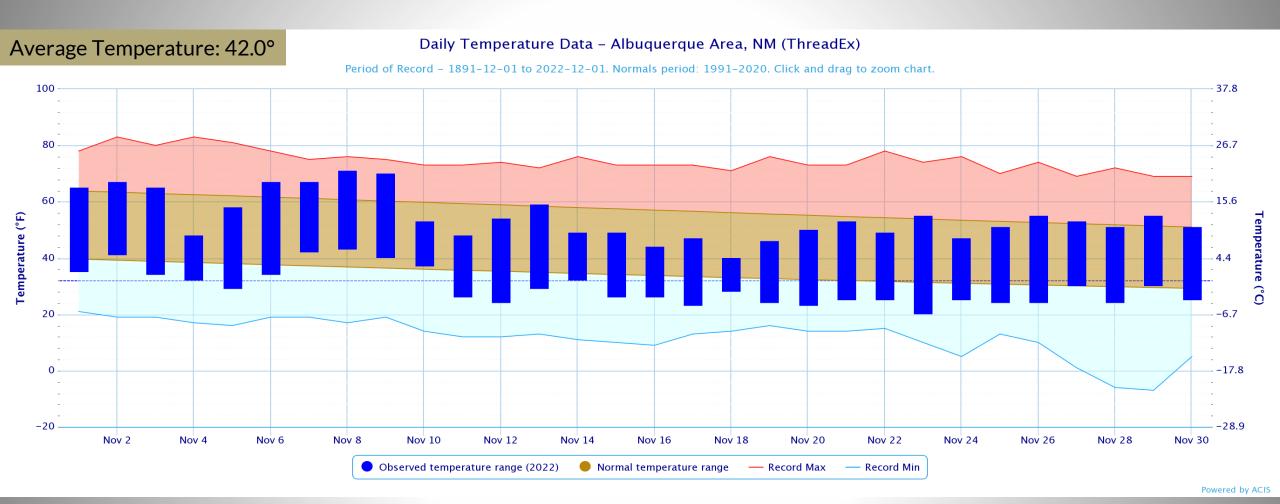

# **Precipitation December-January-February**

The Climate Prediction Center is highlighting above normal temperatures and below normal precipitation as the most likely weather regime for the winter season, especially across southern New Mexico.

#### **Albuquerque Sunport Temperatures**

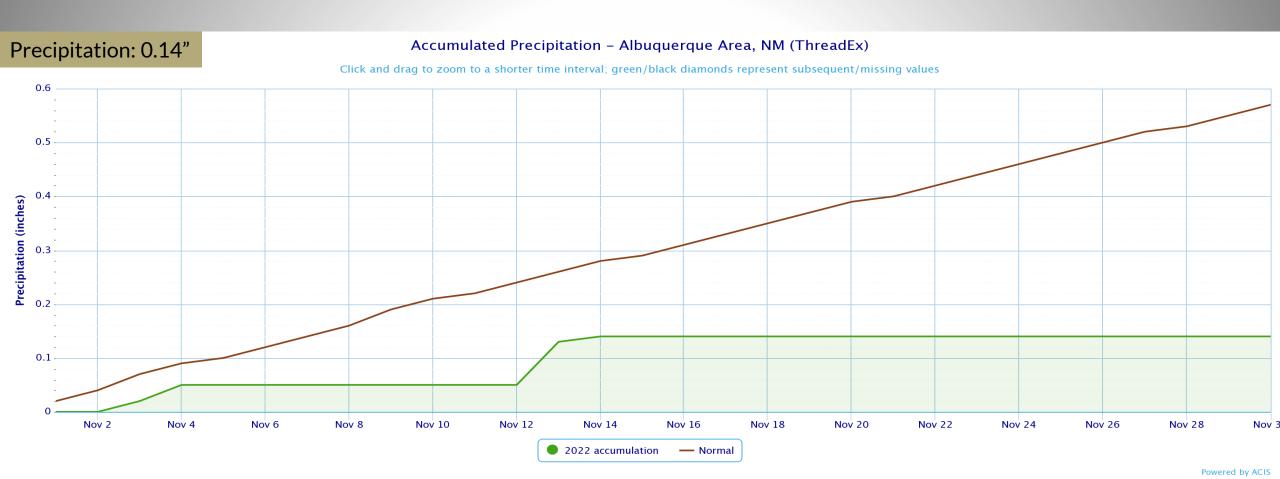

The November 2022 average temperature for Albuquerque was 42.0°, which was 3.7° below the normal of 45.7°. The average maximum temperature for the month was 54.6°. This was 2.7° below the normal average maximum temperature of 57.3°. The average minimum temperature for the month was 29.3°. This was 4.8° below the normal average minimum temperature of 34.1°. This ranked as the 27<sup>th</sup> coolest November on record and the coldest since 2000.

## **Albuquerque Sunport Precipitation**

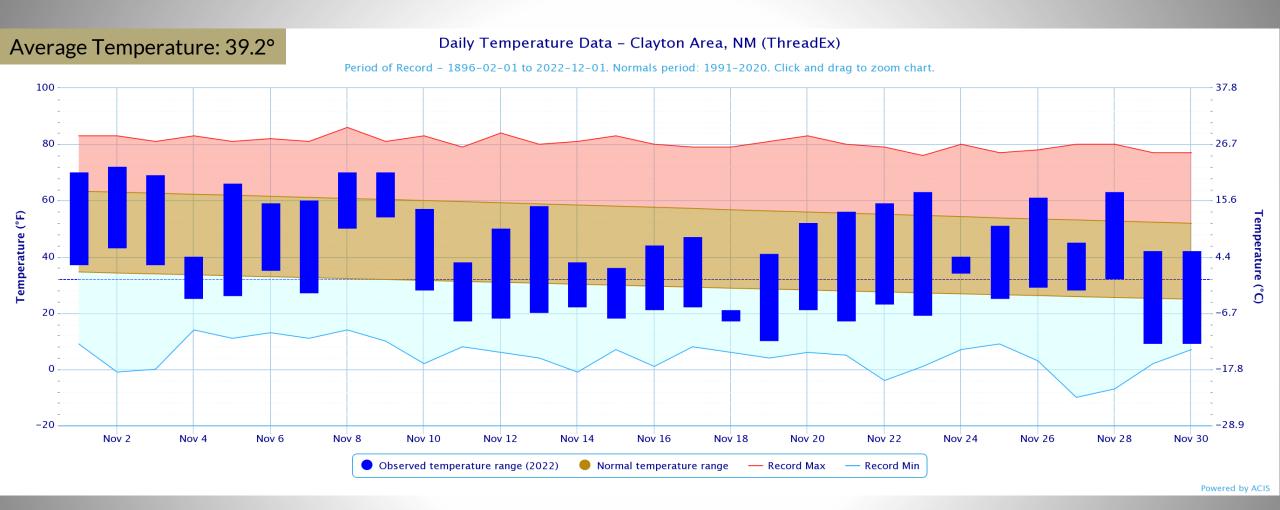

The November 2022 precipitation for Albuquerque was 0.14", which was 0.43" below the normal of 0.57". This ranked as the 47<sup>th</sup> driest November on record.

There was a trace of snow, compared to the normal of 0.9".

#### **Clayton Temperatures**

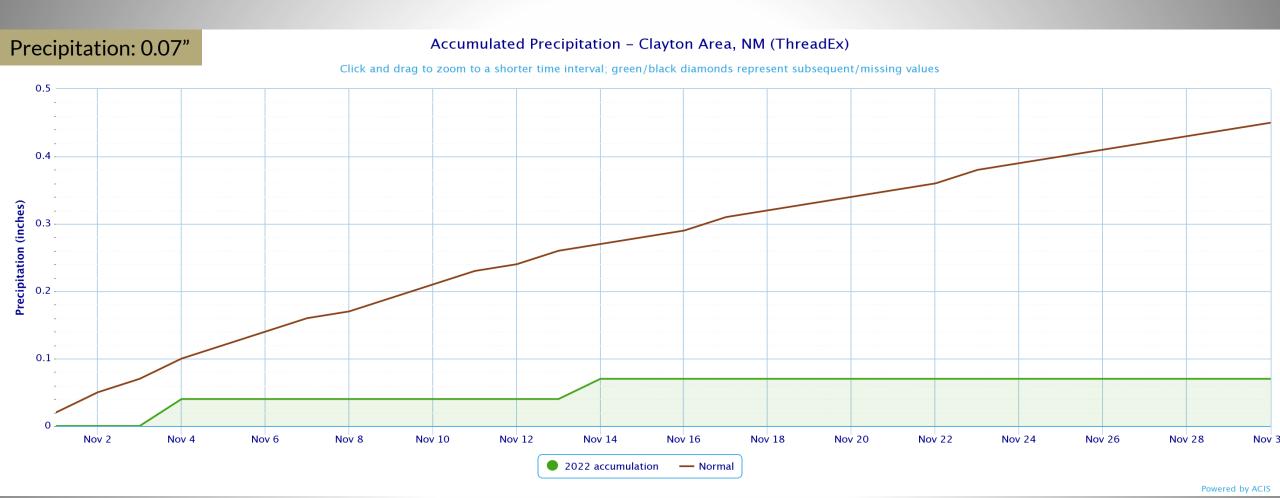

The November 2022 average temperature for Clayton was 39.2°, which was 4.5° below the normal of 43.7°. The average maximum temperature for the month was 52.7°. This was 5.0° below the normal average maximum temperature of 57.7°. The average minimum temperature for the month was 25.8°. This was 3.9° below the normal average minimum temperature of 29.7°. This ranked as the 18<sup>th</sup> coolest November on record and the coldest since 2000.

## **Clayton Precipitation**

The November 2022 precipitation for Clayton was 0.07", which was 0.38" below the normal of 0.45". This ranked as the 31st driest November on record.

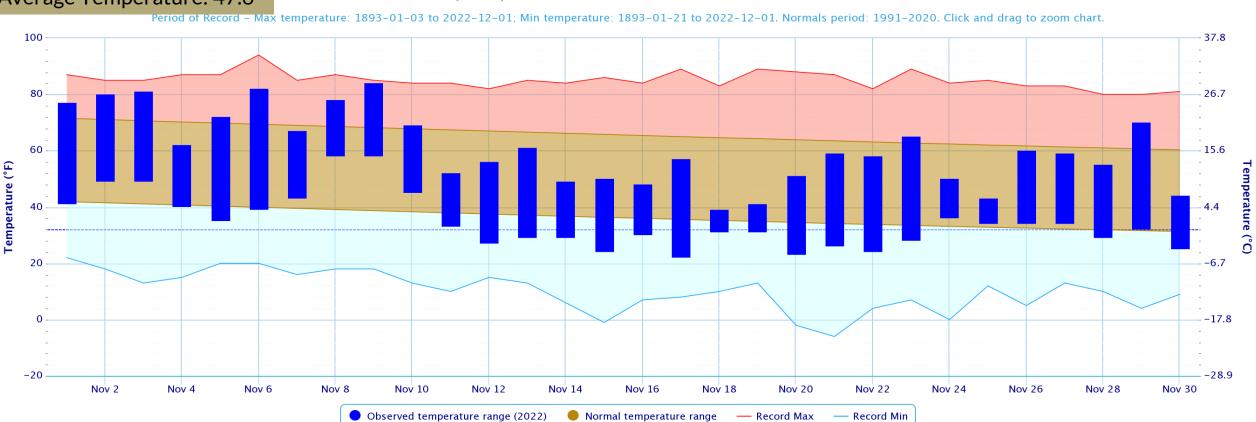

There was 0.7" of snow, compared to the normal of 2.7".

#### **Roswell Temperatures**

#### Daily Temperature Data - Roswell Area, NM (ThreadEx)

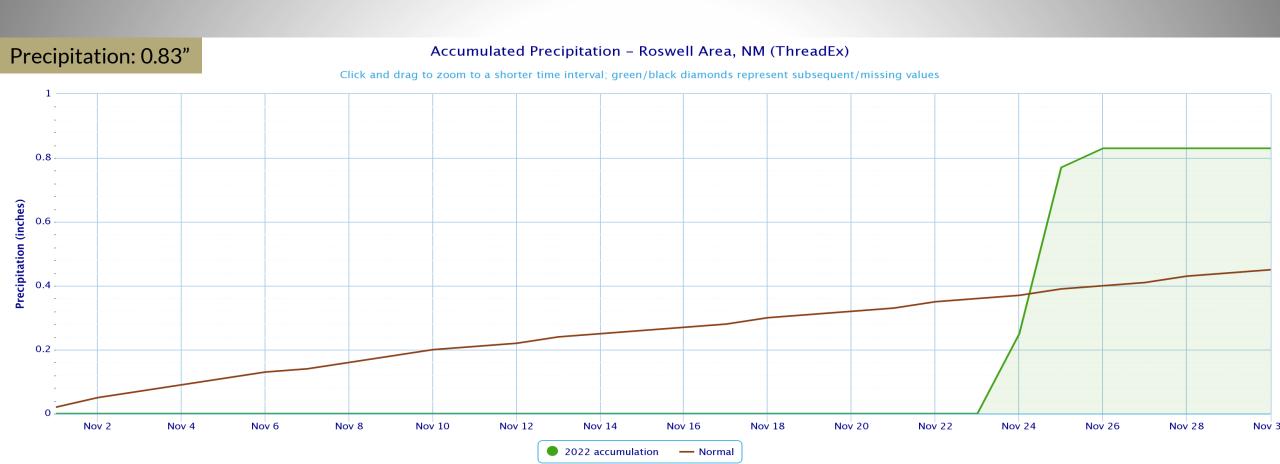

Powered by ACIS

The November 2022 average temperature for Roswell was 47.6°, which was 3.4° below the normal of 51.0°. The average maximum temperature for the month was 60.6°. This was 5.1° below the average maximum temperature of 65.7°. The average minimum temperature for the month was 34.6°. This was 1.7° below the normal average minimum temperature of 36.3°. This ranked as the 53<sup>rd</sup> coolest November on record.

### **Roswell Precipitation**

Powered by ACIS

The November 2022 precipitation for Roswell was 0.83", which was 0.38" above the normal of 0.45". This ranked as the 27<sup>th</sup> wettest November on record.

There was 0.3" of snow, compared to the normal of 1.2".
