| | | | |
|--|--------------------|---|-------------------------|
| | 09/01/18 17:14 CST | 0 | Hail (1.75 in) |
| | 09/01/18 17:14 CST | 0 | Source: Broadcast Media |

Golf ball size hail reported near Randall High School.

POTTER COUNTY --- 5.7 W AMARILLO [35.19, -101.92]

| | | | |
|--|--------------------|---|----------------|
| | 09/01/18 17:20 CST | 0 | Hail (0.88 in) |
| | 09/01/18 17:20 CST | 0 | Source: Public |

Nickel sized hail at I-40 & Bell Street in Amarillo.

An outflow boundary moving east across the western Panhandles generated severe wind gusts with some damage reported as well. A lone thunderstorm that developed over Canyon moved north out ahead of the outflow boundary. Once the thunderstorm interacted with the boundary, strong vertical growth in the thunderstorm helped to developed up to golf ball sized hail in parts of south Amarillo. Thunderstorm then moved north over parts of western Amarillo before the lift from the boundary moved east of the city and weakened the thunderstorm.
