High Wind (MAX 57 kt)

11/13/07 21:00 CST

0

A strong low pressure system and jet stream moving across the region created a tight pressure gradient over western and central North Dakota. This resulted in high winds during the morning and afternoon hours of Tuesday, November 13th. Mesonet data showed the highest wind gusts in excess of 65 mph across parts of Mclean County. Sustained winds greater than 40 mph were common over the entire warned area throughout the day.
