Ten and one	

Several wildfires were reported in the Minot area on Saturday, April 19th, with flare-ups continuing into Sunday, April 20th when the wildfire was reported contained. 500 to 800 acres were burned. The fires started late Saturday morning with the cause unknown. Gusty south winds of 20 to 35 miles per hour, afternoon relative humidity values around 15 percent, and dormant grass and drought conditions contributed greatly to the wildfire behavior. North Dakota National Guard Blackhawk helicopters assisted the firefighting efforts by dropping water on the fires. Several structures were destroyed, and there were two minor direct injuries.
