out on an emergency call. The victim was examined by medical personnel but was found to be not injured. However, a hole was carved out in his office wall.

A warm front pushed northeast from Mississippi into northern Alabama producing widespread rainfall during the afternoon of the 9th. A squall line then produced another round of heavy rainfall, along with several small bow echoes. One of these stronger bow echoes resulted in an EF-2 tornado in Jackson County after midnight on the 10th.
