The tornado touched down at the intersection of CR-27 and Jones Chapel Road. It then traveled northeastward and crossed Lake Rd, CR-29, Putman Road, and Hicks Road, before moving into Saint Clair County. Six chicken houses were completely destroyed, killing nearly 100,000 chickens. One home had its second story destroyed, and another home suffered a complete roof collapse. One large industrial barn was destroyed. Two additional homes, several more chicken sheds, and about 9 outbuilding also received varying degrees of damage. About 200 trees were snapped and uprooted.

ST. CLAIR COUNTY --- 2.4 NNE GREENSPORT [33.86, -86.22], 3.8 SSE STEELE [33.88, -86.17]

The tornado touched down at the intersection of US-411 and Joshua Drive, several miles northeast of Ashville. It then moved nearly coincident with US-411 for about 3 miles, lifting just west of Mopar Drive. About 50 trees were snapped or uprooted, but no other damage was found.

MACON COUNTY --- 0.5 SSW LITTLE TEXAS [32.42, -85.57]

A couple of trees were blown down on CR-71.

MACON COUNTY --- 0.7 S CREEK STAND [32.29, -85.48]

A couple of trees were blown down near the intersection of CR-79 and CR-10, near the Creek Stand community.

TALLADEGA COUNTY --- TALLADEGA [33.43, -86.10]

04/19/09 21:00 CST 15K Thunderstorm Wind (EG 50 kt) 04/19/09 21:00 CST 0 Source: Emergency Manager

Several trees were blown down in the city of Talladega. At least two trees fell onto houses, and another fell onto a car.

RUSSELL COUNTY --- 1.5 WNW GIRARD [32.46, -85.02], 0.3 SSE PHENIX CITY [32.47, -85.00]

04/19/09 21:35 CST 0 Source: NWS Storm Survey

The tornado touched down near the intersection of 22nd Avenue and 17th Street in Phenix City. It then traveled northeast through the south end of Phenix City, and crossed the Chattahoochee River and moved into Muscogee County Georgia. Five businesses sustained major damage, and seven homes received varying degrees of roof damage. At least 100 and as many as 200 trees were snapped or uprooted.

A powerful spring storm system and associated cold front brought numerous thunderstorms to central Alabama. Many of the storms produced large hail, damaging winds, and tornadoes.

ALABAMA, North

COLBERT COUNTY --- 2.7 N OLD BETHEL [34.62, -87.53], 2.4 SW BINGHAM [34.62, -87.53]

04/02/09 14:46 CST 33K Tornado (EF1, L: 0.26 mi , W: 75 yd) 04/02/09 14:48 CST 0 Source: NWS Storm Survey

This was an EF-1 tornado with a peak wind of 100 mph, path length of 0.26 miles, and a maximum path width of 75 yards. The tornado touched down along County Line Road about one mile south of Whiteoak and moved northward before lifting before reaching Alabama Highway 157 near Bingham. The roof of a church was heavily damaged and several large trees were snapped or uprooted. Also, numerous power lines were blown down.

LIMESTONE COUNTY --- 0.8 WNW MURPHREE PLACE [34.70, -86.98], 1.0 SE TANNER [34.72, -86.96]

A wave of damaging winds produced widespread and signficant damage to portions of north central and northeast Alabama during the late evening hours of the 12th into the early morning hours of the 13th. These winds have been attributed to wake low / gravity wave combination on the northwest edges of a decaying mesoscale convective system (MCS) across central Alabama into northern and central Georgia. Sustained wind speeds of 40 to 50 mph were common over a period of one to two hours, especially across Morgan, Cullman, Marshall and Jackson Counties. Damages were most severe in the communities of Guntersville and Scottsboro where widespread damage was reported, and power was knocked out as numerous large trees were knocked down. Schools were closed in both communities for up to three days. Many roads became impassible on the morning of the 13th due to the tree damage. Trees were knocked down onto homes, vehicles and trailers, entrapping one individual in a camper in Scottsboro. In Scottsboro, power was out for no less than three days in some cases.

A strong low pressure system tracking northeast from the southern Ozarks into the Ohio Valley brought a cold front into the central Tennessee Valley during the late afternoon and evening hours of the 19th. Supercells erupted across northern Mississippi, moving into far northwest Alabama shortly before 5 pm CDT. Initially, these storms were large hail producers, with up to baseball sized hail reported in the town of Red Bay in Franklin County. As the early evening progressed, this supercell tracked into Lawrence and Morgan Counties producing wind damage and at least six tornadoes as it moved east. A male individual was killed in the town of Priceville in Morgan County when a tree was knocked down onto his trailer home. The thunderstorms evolved into a quasi-linear convective system (QLCS) as they moved into Marshall and DeKalb Counties. Another tornado developed rapidly in the community of Asbury in Marshall County, killing one and critically injurying another when their mobile home was destroyed. The QLCS progressed into DeKalb County producing additional tornado damage.
