Power lines were blown down at the intersection of Taylor and Vaughn Roads, in Montgomery.

A powerful low pressure system and associated cold front pushed through the area, and helped trigger numerous thunderstorms. Some became supercells, that produced long swaths of large hail, areas of damaging winds, and at least one tornado.

FAYETTE COUNTY --- 3.2 W HUBERTVILLE [33.82, -87.81]

The tornado touched down southwest of the community of Salem. It then moved just north of due east, crossing US-280 and several smaller county roads, before lifting at CR-379. Winds estimated at 125-130 mph destroyed 6 mobile homes and 4 site built homes, badly damaged 8 homes, and caused minor damage to 9 others. Two area businesses were destroyed, one other received minor damage, and one school building was damaged. Hundreds of trees were snapped off and uprooted, and one 18-wheeler was overturned. There were three minor injuries reported, only one that required hospitalization.

A slow moving cold front brought an extended period of severe weather and heavy rain, that lasted about 24 hours. The storms produced damaging winds, large hail, flooding rains, and at least 4 tornadoes.
