## ALABAMA, Central

(AL-Z011) MARION, (AL-Z012) LAMAR, (AL-Z013) FAYETTE, (AL-Z022) PICKENS, (AL-Z023) TUSCALOOSA, (AL-Z024) JEFFERSON, (AL-Z025) SHELBY, (AL-Z027) TALLADEGA, (AL-Z028) CLAY, (AL-Z034) BIBB, (AL-Z035) CHILTON, (AL-Z036) COOSA, (AL-Z037) TALLAPOOSA, (AL-Z038) CHAMBERS, (AL-Z041) AUTAUGA, (AL-Z043) ELMORE, (AL-Z047) LEE, (AL-Z048) RUSSELL

03/01/09 00:00 CST 0

03/01/09 15:30 CST 0

A late winter storm system, that had caused some severe thunderstorms the previous day, ended with a heavy snow event for portions of central Alabama. The snow began during the early morning hours on March 1, and lasted until the afternoon on the same day, with the most significant accumulations occurring from around 3 am to 3 pm. The heaviest snow, generally from 3 to 5 inches, was in a swath across the middle of the state, from near Tuscaloosa to Auburn. Thundersnow was reported in several counties near the Georgia state line. The vast majority of the snow melted before the sun set that evening, which minimized the total impact of the event.

(AL-Z037) TALLAPOOSA

03/15/09 10:00 CST 0

Repeated rainfall during the spring months led to a mudslide.

LAMAR COUNTY --- 3.3 SSE KENNEDY [33.54, -87.96], 3.2 SE KENNEDY [33.54, -87.95]

Heavy Snow

The tornado touched down near the intersection of Junkins Road and Holliman Road, in the southeastern portion of Lamar County. From there, it moved northeastward into Fayette County. In Lamar County, damage was confined to numerous trees that snapped and uprooted.

FAYETTE COUNTY --- 7.5 S BELK [33.54, -87.95], 5.9 SSE BELK [33.57, -87.90]

03/26/09 02:21 CST 50K Tornado (EF1, L: 3.02 mi , W: 100 yd) 03/26/09 02:28 CST 0 Source: NWS Storm Survey

The tornado that touched down in southeastern Lamar County moved into southwestern Fayette County. It continued to travel northeastward, across Junkins Drive, Brazeal Road, Wesley Chapel Road, and Howard Drive. It lifted just north of the intersection of Summers Road and AL-159. In addition to numerous trees that were snapped and uprooted, the tornado also damaged two homes, one business shop, and at least 5 outbuildings. A 17 foot camper was pushed 3 feet sideways in the mud due to the force of the wind. A family that was in one of the homes at the time heard the warning via NOAA Weather Radio and went to their storm cellar. They then heard the "roar of a jet" as the tornado passed overhead, but they made it through the event without any injuries.

SUMTER COUNTY --- 2.9 S SILOAM [32.39, -88.27]

Trees were blown down by winds estimated around 50 mph, on CR-9 near the Mission Community.

WALKER COUNTY --- 1.6 SSE MARIETTA [33.68, -87.39]

Deaths &

Location

Date/Time **Event Type and Details** Property & Injuries Crop Dmg Moisture and strong lift produced by a deepening low pressure system over Georgia moved west into northern Alabama after midnight on March 1st. With freezing or below freezing temperatures in place, widespread snowfall began after midnight on the 31st and continued through the afternoon hours on the 1st in some counties. Accumulations of between half an inch and 1 inch occurred across much of northern Alabama. In addition, portions of Lauderdale, Colbert, Franklin, Limestone, and Cullman counties received heavy snowfall over two inches. The heaviest snowfall occurred in northwestern portions of Lauderdale county, where over 4 inches of snow fell. Low-topped supercell thunderstorms developed along a powerful cold front during the late afternoon of the 28th across the eastern half of north Alabama. The storms evolved into a quasi-linear convective system (QLCS) with embedded mesocyclones, one of which became tornadic. There were also a few reports of large hail and damaging winds.

ESCAMBIA COUNTY 0.5 S APPLETON [31.11, -87.07], 2.0 NE APPLETON [31.14, -87.05]		
03/26/09 05:55 CST	30K	Tornado (EF1, L: 2.38 mi , W: 1000 yd)
03/26/09 06:00 CST	0	Source: NWS Storm Survey

The EF1 tornado touched down just south of Appleton where it destroyed a small barn behind a residence and uprooted several hardwood trees and snapped several pine trees. The tornado continued northeast where it strengthened and widened. At its strongest point the tornado snapped numerous large pine trees in a wooded area. On the periphery of the stronger winds several homes and outbuildings experienced minor roof and shingle damage. The tornado lifted about two miles northeast of Appleton.

COVINGTON COUNTY 3.0 NE GREEN BAY [31.23, -86.26]					
03/26/09 07:00 CST	50K	Thunderstorm Wind (EG 78)			

03/26/09 07:00 CST 50K Thunderstorm Wind (EG 78 kt) 03/26/09 07:03 CST 0 Source: NWS Storm Survey

Survey team found evidence of straight line wind damage to several homes and metal buildings. Most of the wind damage occurred to mobile homes and metal buildings with two mobile homes completely destroyed and several other suffering damage. A two story homes also experienced roof damage. Most of the damage was found in an area from one to two miles northeast of Onycha. Based on the damage evidence the team estimated winds around 90 mph.

A line of slow moving thunderstorms moved across southwest Alabama and produced a tornado and wind damage along with very heavy rain that caused flash flooding.
