The city of Montgomery experienced extensive flash flooding due to a period of very heavy rainfall. An estimated 10+ inches of rain fell in portions of Montgomery County in about a six hour time frame. The downtown area, including the capitol district, was hit especially hard. At least three feet of water flowed into the basement of the Statehouse building, and state legislators temporarily moved to backup chambers in the old Capitol. Numerous streets downtown were closed, and numerous cars became stranded in the high water. One 67 year old man drowned when his car was swept away by flood waters in Montgomery.

Direct Fatalities: M67VE

Flash flooding caused numerous roads to become impassable. High water was reported on several county roads, in and around the city of Union Springs.

A slow moving area of thunderstorms brought considerable flash flooding to several counties in central and southeast Alabama. A relatively narrow but rather long swath of rainfall of 3 to more than 7 inches stretched from northeastern Autauga County, across the city of Montgomery, and into southern Russell and northern Barbour Counties. Peak rainfall amounts approached 10 inches.

TALLADEGA COUNTY --- 0.9 WNW SHOCCO [33.43, -86.14]

Two trees were blown down onto power lines and a car, on Renfroe Road east of the city of Talladega.
