#### ALABAMA, Central

(AL-Z028) CLAY, (AL-Z029) RANDOLPH, (AL-Z036) COOSA, (AL-Z037) TALLAPOOSA, (AL-Z038) CHAMBERS, (AL-Z042) LOWNDES, (AL-Z043) ELMORE, (AL-Z044) MONTGOMERY, (AL-Z045) MACON, (AL-Z046) BULLOCK, (AL-Z047) LEE, (AL-Z048) RUSSELL

03/01/11 00:00 CST 0 E

0

03/31/11 23:59 CST

Below normal precipitation during the month of February brought no relief to the drought conditions across portions of east central Alabama. Although 3-6 inches of rain fell, there were no significant changes in drought conditions. Severe drought (D2) conditions persisted to the right of a line from Blue Springs State Park to Comer to Fort Davis to Mt Carmel to Gordonville to Prattville to Hollins to Clairmont Springs to Needmore to Graham, through the month of March.

(AL-Z041) AUTAUGA

Several storm systems brought rainfall to the area through the first half of the month, improving local drought conditions. Autauga county was removed from severe drought (D2) on March 15, with abnormally dry and moderate drought (D1) conditions continuing through the end of March.

(AL-Z037) TALLAPOOSA, (AL-Z038) CHAMBERS, (AL-Z043) ELMORE, (AL-Z045) MACON, (AL-Z047) LEE

03/01/11 00:00 CST 0 Drought

03/31/11 23:59 CST 0

Below normal rainfall continued across portions of central Alabama during the latter half of February caused drought conditions to worsen. Extreme drought (D3) conditions began for portions of Tallapoosa, Chambers, Lee, Macon, and Elmore Counties. Although, several systems brought rainfall to the area through March, portions of these counties remained in Extreme Drought (D3) through the entire month.

(AL-Z028) CLAY, (AL-Z029) RANDOLPH

03/01/11 00:00 CST 0 Drought

03/14/11 23:59 CST 0

Dry conditions during the latter part of February led to a strengthening of drought conditions in extreme southern portions of Clay and Randolph counties, where conditions worsened to extreme (D3) the beginning of March. Several storm systems brought rainfall to the area through the first half of the month, improving local drought conditions. Clay and Randolph counties were removed from extreme drought (D3) on March 15, with severe drought (D2) conditions continuing across the extreme southern portion of these counties through the end of March.

PERRY COUNTY --- 0.5 E UNIONTOWN [32.45, -87.51]

A brief EF1 tornado with winds of 90 mph touched down just south of the intersection of County Road 10 and Homeland Way in the Aldrich community, approximately 3 miles northwest of Montevallo. Ten to twenty trees were either snapped or uprooted along the short, 0.19 mile track. In addition, one fourth of an outbuilding's metal roof was peeled off and tossed 50 yards.

A stalled boundary sagged southward into North Central Alabama on Saturday, March 26, and became a focus for convection ahead of an approaching storm system. Through the day, as the air mass south of the boundary became increasingly unstable, thunderstorms developed across much of the area. This activity continued into the overnight hours. With the approach of a surface low and cold front, activity reintensified early Sunday morning, March 27, and continued through the pre-dawn hours on Monday as the cold front slowly moved through the area.

03/29/11 21:23 CST 0 Source: Emergency Manager

A surface low developed in Texas and moved into the northern Gulf of Mexico Tuesday evening, March 29th. Stable easterly flow across much of Central Alabama prevented a warm front from lifting northward and limited instability across the area. As the surface low tracked across the far southeastern portion of the forecast area, moderate rainfall fell across most of the area through Wednesday afternoon, March 30th. The lack of instability resulted in only an isolated severe threat from this storm system.

One inch diameter hail was reported.				

One inch diameter hail was reported.

Numerous thunderstorms erupted during the late evening hours of the 29th across northern Alabama. A few of the storms produced large hail, including one report of up to 3 inch diameter hail. Frequent lightning was observed with the strongest storms. The storms exited during the early morning hours of the 30th, about as quickly as they arrived, moving northeast and east at 45 to 60 mph.

Heavy rain caused water across road near intersection of County Road 34 and Highway 55.

A powerful cold front brought widespread severe thunderstorms to southwest Alabama. These thunderstorms produced many reports of large hail...damaging winds and tornadoes. The thunderstorms also produced heavy rain which caused flash flooding.
