An abundance of rainfall fell across a good portion of the central Alabama during the first half of June, with some locations receiving over 3 inches of rain in a two week period. However, the latter half of June proved to be very dry and drought conditions for the southeast portion of the area did not improve.

Multiple trees were reported down across the town of Moundville.

Numerous trees were down, blocking roads in Pleasant Grove.

Trees and powerlines were downed in Ensley, along 19th Street.

Trees were reported down along the western portion of the county, along Interstate 65 near Warrior and Hayden.

Trees and power lines were reported down on Eastern Valley Road, as well as along Alliance Road and Taylor's Ferry Road.

Numerous trees were reported down across the county, with some roadways blocked by fallen trees.

A tree was reported down on a house on 15th Street SW.

Two hangers at the Shelby County Airport were destroyed by high winds associated with a squall line. The extent of the damage was likely due to the funneling effects of the winds through the hanger structures. In addition, many planes (small, single engine planes) were damaged or destroyed; some as a result of the collapsing hanger. Monetary losses of the airport structures equaled $450,000.

A tree was reported down on Highway 119 at Forest Drive in Leeds.

A tree was reported down on Water Tank Lane.

On Thursday, June 14, isolated thunderstorms initially developed along an inverted surface trough across east central Alabama. This convection pushed westward during the early afternoon, with additional thunderstorms developing on outflow boundaries during the peak heating of the day.

A strong ridge of high pressure centered over the Central Plains and locally dry conditions resulted in unseasonably warm temperatures across Central Alabama. Scattered locations reached at least 100 degrees or a heat index of 105 or greater for several days between June 23 and June 27, before expanding areawide for the end of the month.
A strong ridge of high pressure shifted eastward from the Central Plains to the southeastern Continental United States, bringing with it recording breaking temperatures. Afternoon highs rose over 100 degrees or greater each afternoon. With a moist airmass in place, heat index values reached over 105 degrees in many places. The Tuscaloosa Regional Airport recorded record high temperatures on June 29 and 30; the Anniston Regional Airport recorded a record high temperature on June 30. Two fatalities in Jefferson County resulted from heat stress due to the above normal heat conditions. In addition, 19 illnesses were reported to the Alabama Department of Public Health for this time period. This heat wave extended into the first week of July.

</tbody>
</table>
A very hot period occurred during the last week of June. Maximum temperatures climbed to 100 degrees or higher on each of these days in at least one county in north Alabama. At Muscle Shoals, the temperature reached or exceeded 100 degrees from the 23rd through 25th, and again from the 27th through the 30th. On two of these days (29th and 30th), the temperature reached 107 degrees. At Huntsville, the temperature reached or exceeded 100 degrees on the 24th and 25th, and again from the 28th through the 30th. On the 29th, the temperature reached 106 degrees.

**ALABAMA, Southeast**

**Drought**

- **(AL-Z065) COFFEE, (AL-Z066) DALE, (AL-Z067) HENRY, (AL-Z069) HOUSTON**
  - 06/01/12 00:00 EST: 0 Drought
  - 06/30/12 23:59 EST: 0

Drought conditions gradually improved across parts of southeast Alabama during the month of June, but portions of Coffee, Dale, Henry, and Houston counties still remained in D2 or worse drought status through the month and into July. The worst conditions were across Henry county, which remained in D4 or exceptional drought status, which is the highest category.

**Geneva county saw increased rainfall during the early to middle part of June, and their drought status improved into the D0 to D1 category (abnormally dry to moderate drought) on June 12th.**

**GENEVA COUNTY — 0.6 W EUNOLA [31.04, -85.85]**

A tree was blown down near the intersection of Highway 27 South and County Road 723. Monetary damage was estimated.

| COFFEE COUNTY --- 2.3 S COOL SPRINGS [31.20, -85.82], 2.1 S COOL SPRINGS [31.20, -85.82] | 06/10/12 10:33 CST | 0             | Tornado (EF0, L: 0.26 mi , W: 50 yd) | Source: Law Enforcement |
|                                                                                         | 06/10/12 10:34 CST | 0             |                     |                        |

This is a continuation of the Geneva county tornado. This tornado was seen near the Geneva/Coffee county line by a retired police officer before dissipating. No damage was reported in Coffee county.

| DALE COUNTY --- DALEVILLE [31.28, -85.72] | 06/10/12 10:48 CST | 0          | Funnel Cloud | Source: Public |
|                                           | 06/10/12 10:48 CST | 0          |                     |                        |

The public reported a funnel cloud over Daleville moving northeast. This was the same storm that spawned an EF1 tornado in Geneva county.

| GENEVA COUNTY --- 15.0 W GENEVA [31.03, -86.12], 15.0 E GENEVA [31.03, -85.62] | 06/10/12 12:00 CST | 5K          | Thunderstorm Wind (EG 55 kt) | Source: County Official |
|                                                                                         | 06/10/12 12:55 CST | 0          |                     |                        |

Trees were blown down county wide. Monetary damage was estimated.

| COFFEE COUNTY --- ENTERPRISE [31.32, -85.84] | 06/10/12 12:10 CST | 5K          | Thunderstorm Wind (EG 50 kt) | Source: Emergency Manager |
|                                           | 06/10/12 12:10 CST | 0          |                     |                        |

Several trees were blown down in Enterprise. Monetary damage was estimated.

| DALE COUNTY --- 4.5 SW MARLEY MILL [31.45, -85.75] | 06/10/12 12:20 CST | 3K          | Thunderstorm Wind (EG 50 kt) | Source: Public |
|                                                       | 06/10/12 12:20 CST | 0          |                     |                        |

Trees were blown down and a fence was damaged. Monetary damage was estimated.

| HENRY COUNTY --- 3.0 NW ABBEVILLE [31.59, -85.29] | 06/10/12 13:15 CST | 2K          | Thunderstorm Wind (EG 50 kt) | Source: County Official |
|                                                       | 06/10/13 13:15 CST | 0          |                     |                        |

Trees were blown down on State Highway 10 West northwest of Abbeville. Monetary damage was estimated.

| DALE COUNTY --- 1.1 NNE OZARK [31.46, -85.63] | 06/11/12 10:30 CST | 0.50K       | Thunderstorm Wind (EG 45 kt) | Source: County Official |
|                                                       | 06/11/12 10:30 CST | 0          |                     |                        |

A single tree was blown down on Martin Street in Ozark with no other wind damage reported in the area. Monetary damage was estimated.

| HOUSTON COUNTY --- 2.4 W ARDILLA [31.17, -85.40] | 06/11/12 12:12 CST | 2K          | Thunderstorm Wind (EG 50 kt) | Source: Emergency Manager |
|                                                       | 06/11/12 12:12 CST | 0          |                     |                        |

Power lines were blown down and blocking the road. Monetary damage was estimated.

Thunderstorm wind gusts tore the roof off a temporary structure at the Bama Jam, injuring one person.

| COFFEE COUNTY --- ENTERPRISE [31.32, -85.84] | 06/14/12 15:55 CST | 3K | Thunderstorm Wind (EG 50 kt) |
| | 06/14/12 15:55 CST | 0 | Source: Law Enforcement |

Trees and power lines were blown down in and around Enterprise. Monetary damage was estimated.

| COFFEE COUNTY --- 0.9 N CAMP ALAFLO BSA [31.42, -85.86] | 06/14/12 16:22 CST | 0 | Hail (0.75 in) |
| | 06/14/12 16:22 CST | 0 | Source: Trained Spotter |

A broad upper level trough was present over the southeastern U.S. A weak surface low was located just offshore of the Florida panhandle. A mesoscale convective vort max was also in the area. SBCAPE values of 1500-2500 j/kg and delta thetace values of 25-35 contributed to several instances of severe storms with trees and power lines down across the area.

**ALABAMA, Southwest**

| BALDWIN COUNTY --- LOXLEY [30.62, -87.75] | 06/05/12 16:20 CST | 0 | Hail (1.00 in) |
| | 06/05/12 16:22 CST | 0 | Source: Emergency Manager |

| BALDWIN COUNTY --- 2.0 E LOXLEY [30.62, -87.72] | 06/05/12 16:30 CST | 2K | Funnel Cloud |
| | 06/05/12 16:33 CST | 0 | Source: Emergency Manager |

Funnel cloud observed 3 times by fire dept near County Roads 64 and 65. Tree limbs were also down in the area.

Thunderstorms developed across southwest Alabama and produced large hail and a funnel cloud.

| MOBILE COUNTY --- 5.0 S MOBILE BATES FLD [30.61, -88.23] | 06/07/12 14:00 CST | 0 | Heavy Rain |
| | 06/09/12 14:00 CST | 0 | Source: NWS Employee |

Two day storm total of 15.62 inches.

| MOBILE COUNTY --- 1.9 N DAWES [30.63, -88.25], 1.8 N DAWES [30.63, -88.25], 1.7 N DAWES [30.62, -88.25], 1.8 N DAWES [30.63, -88.25] | 06/09/12 07:52 CST | 0 | Flash Flood (due to Heavy Rain) |
| | 06/09/12 09:52 CST | 0 | Source: NWS Employee |

Several lower lying spots along Dawes Road experiencing water moving over the road and from property to property. The Johnson/Dawes Road intersection has water flowing over the road with many culverts to capacity.

| MOBILE COUNTY --- 3.1 WWN THEODORE IDLE HOUR A [30.60, -88.31], 3.0 S MOBILE BATES FLD [30.64, -88.23], 3.1 WWN TILLMANS CORNER [30.60, -88.18], 2.0 ESE THEODORE IDLE HOUR A [30.57, -88.24] | 06/09/12 08:55 CST | 5K | Flash Flood (due to Heavy Rain) |
| | 06/09/12 11:55 CST | 0 | Source: NWS Employee |

Several roads were flooded across southern Mobile County. Some of the roads were washed out to fast moving water.

| BALDWIN COUNTY --- 1.1 SE RIVER PARK [30.44, -87.79], FOLEY [30.42, -87.68], 2.8 W MIFLIN [30.37, -87.65], 1.6 NW BON SECOUR [30.34, -87.75] | 06/09/12 13:33 CST | 0 | Flash Flood (due to Heavy Rain) |
| | 06/09/12 15:33 CST | 0 | Source: Emergency Manager |

Numerous roads covered with water in southern Baldwin County due to heavy rain.
Heavy rain developed over the area during the morning and continued into the afternoon. The heaviest rain fell across southern Mobile and Baldwin counties. Storm total rainfall amounts were between 10 to 20 inches. This caused widespread flooding in many areas.

### BALDWIN COUNTY --- GULF SHRS [30.28, -87.68]
