Heavy rain resulted in flooding near the intersection of Government St and McDonald Ave.

Scattered convection developed across the tri-state area with isolated strong to severe weather.

An upper level disturbance embedded in the southwest upper level flow resulted in the development of a large cluster of showers and thunderstorms that impacted coastal Alabama during the late evening of May 15th into the early morning of May 16th. The system produced locally heavy rain and an isolated instance of flash flooding.

ESCAMBIA COUNTY 0.7 S AP	PLETON [31.11, -87.07]		
	05/20/15 17:55 CST	0	Hail (1.00 in)

Quarter size hail was reported in East Brewton.

CLARKE COUNTY --- 0.9 SW JACKSON [31.51, -87.89]

The combination of abundant moisture, an unstable airmass, and an upper level disturbance approaching from the west, resulted in the development of scattered to numerous thunderstorms over southwest. A few of the storms became severe.
