Several roads flooded and impassabl	e in the city of Midfield due to high water.					
JEFFERSON COUNTY MIDFIELD	[33.45, -86.92]					
	05/15/18 16:50 CST		0	Thunderstorm Wind (EG 50 kt)		
	05/15/18 16:51 CST		0	Source: Public		

Several trees uprooted in the city of Midfield.

An upper low over the northern Gulf of Mexico brought deep Gulf moisture northward into Central Alabama. A zone of surface convergence extended from northeast Alabama southwest across the Birmingham Metro area. Slow moving convection developed along this boundary and produced isolated wind damage and flash flooding over Jefferson County.

. . .

JEFFERSON COUNTY 0.3 E PORT BIRMINGHAM [33.57, -87.11]					
05/20/1	8 13:50 CST	0	Hail (1.00 in)		
05/20/1	8 13:51 CST	0	Source: Public		

Large hail reported by boaters on the Locust Fork River.

Thunderstorms developed over central Alabama during the heating of the day. Atmospheric conditions were favorable for robust thunderstorms, and the combination of high precipitable water values and steep low level lapse rates resulted in the production of large hail over Jefferson County.

LEE COUNTY 2.5 ENE J C MEADOWS XRDS [32.51, -85.13], 3.3 SSE SMITHS [32.47, -85.06], 0.8 SE SMITHS [32.51, -85.06], 3.8 E SMITHS [32.51,

Portions of River Road closed due to flowing water.

Sub-tropical storm Alberto made landfall in the western Florida Panhandle Monday evening, Monday May 28th. The cyclone advanced northward into Central Alabama during the overnight hours and into Tuesday, May 29th. It was downgraded to a depression as it entered the southern counties of Central Alabama. The depression produced sustained winds of 25-35 mph across Central Alabama along with heavy rainfall. The duration of the higher winds Monday night resulted in numerous trees being uprooted along its path. Periods of heavy rainfall continued into Wednesday, May 30th.
