	08/28/20 15:02 CST		0	Tornado (EF1, L: 8.75 mi , W: 325 yd)
	08/28/20 15:18 CST		0	Source: NWS Storm Survey

National Weather Service meteorologists surveyed damage in northeastern Winston County and determined that it was consistent with an EF1 tornado, with maximum winds near 105 mph.

The tornado developed in a wooded area east of County Road 195. The tornado tracked northeast, crossing County Road 6 near Sandy Creek, where it caused minor timber damage. The tornado caused minor damage to the roof of a chicken house just off of County Road 415. The tornado continued northeast where it approached Highway 33 west of Moreland. The tornado caused notable timber damage as it crossed Highway 33, then it continued northeast across County Road 3163 where it removed sheathing from under a manufactured home, destroyed a small outbuilding, and removed portions of siding and sheathing from a manufactured home. The tornado then crossed County Road 63, or Cheatam Road, where it removed a portion of the roof from a manufactured home, damaged two garage doors, and blew out a window of an outdoor storage building. The tornado continued northeast before dissipating near Collier Creek.

0	8/23/20 11:13 CST	0	Tornado (EFU, L: 0.12 mi , W: 50 yd)
O	8/23/20 11:21 CST	0	Source: Mesonet

A local research meteorologist located at Ditto Landing witnessed a tornado and possibly a waterspout at times on and adjacent to Hobbs Island along the Tennessee River. Mesonet cameras including one from the University of Alabama in Hunstville at the Severe Weather Institute, Radar and Lightning Laboratories (SWIRLL) captured the event. No damages were reported.

A small shower developed during the midday hour near the Tennessee River at Ditto Landing on the Madison-Marshall County line. The shower produced a funnel cloud that descended at 1107 pm CST, and touched down as a tornado and/or waterspout from around 1113 pm CST and lifting around 1125 pm CST. The tornado was observed by a local research meteorologist at Ditto Landing who called in the report to the National Weather Service. The tornado from his viewpoint touched down at Hobbs Island, and possibly could have crossed onto the water as well. However, no damage was reported. Two other mesonet weather cameras also recorded the tornado from two
