

Storm Data and Unusual Weather Phenomena - April 2023

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

ALABAMA, Central

MARION COUNTY --- 2.8 SW HACKLEBURG [34.24, -87.85], 3.7 E BEAR CREEK [34.26, -87.64]

04/01/23 01:32 CST			0	Tornado (EF1, L: 12.46 mi , W: 675 yd)
04/01/23 01:48 CST		1	0	Source: NWS Storm Survey

National Weather Service meteorologists surveyed damage in northern Marion County and determined that it was consistent with an EF 1 tornado, with maximum winds near 110 mph. The tornado began on Marion County Road 348 west of Alabama Highway 253 south of Hackleburg, where minor tree damage was noted. The tornado rapidly increased and caused significant damage as it crossed Alabama Highway 253, uprooting several trees and causing superficial damage to a home on the edge of the track. The tornado continued east-northeastward along Union Hill Road, crossing the road twice before the intersection with Chalk Mine Road. Damage in this segment of the path consisted solely of pockets of tree damage which varied in intensity but was easily identified as tornado damage. As the tornado paralleled Chalk Mine Road, it produced more widespread tree damage, and destroyed a manufactured home. The damage to trees surrounding the manufactured home was minimal, which contributed to a below expected value or 100 mph assigned to the flipping and tossing of the manufactured home. The tornado continued across the Fairview community causing significant tree damage just east of County Road 12, with a grove of pine trees all being sheared off about 20 feet above ground level. The tornado then continued over inaccessible areas south of County Road 6 as it headed towards the Lumbull community, crossing Alabama Highway 241 just south of Lumbull. As it approached Bear Creek, it continued to cause sparse but notable tree damage. The most significant damage along the entire path occurred along Alabama Highway 13 south of Bear Creek, where a large metal building structure received significant damage to the windward side of the building. Winds in this area approached 110 mph, bringing this tornado to a high end EF1 rating. The tornado then crossed AL Hwy 13, where an individual received major injuries as the manufactured home being occupied was flipped upside-down. The tornado continued eastward, crossing Old Union Road, then paralleling County Line Church Road until the tornado passed into Winston County just north of Sherwood Place Drive.

WINSTON COUNTY --- 2.3 WSW HALEYVILLE POSEY ARP [34.26, -87.64], 0.4 SW FORKVILLE [34.27, -87.56]

04/01/23 01:48 CST			0	Tornado (EF1, L: 4.52 mi , W: 675 yd)
04/01/23 01:52 CST			0	Source: NWS Storm Survey

National Weather Service meteorologists surveyed damage in northwest Winston County and determined that it was consistent with an EF 1 tornado, with maximum winds near 100 mph. This tornado began in Marion County and crossed into Winston County just north of Sherwood Place Drive. The tornado weakened somewhat as it crossed the county line, and the damage path widened. As it approached the vicinity of Posey Field, the tornado seemed to intensify locally, uprooting several trees in a residential neighborhood. The tornado crossed Airport Road, damaging trees and a detached garage at a residence. The tornado continued eastward through the Center community, with damage decreasing and becoming more sporadic before eventually dissipating just north of County Road 68 just west of Alabama Highway 195.

ETOWAH COUNTY --- 1.8 SE BOAZ [34.18, -86.15], 1.6 ENE SARDIS CITY [34.18, -86.10]

04/01/23 03:51 CST			0	Tornado (EF0, L: 3.10 mi , W: 250 yd)
04/01/23 03:55 CST		2	0	Source: NWS Storm Survey

National Weather Service meteorologists surveyed damage in far northern Etowah County and determined that it was consistent with an EF 0 tornado, with maximum winds near 85 mph. The tornado touched down near the intersection of Coosa Road and Sardis Cut-off Road before moving across Highway 431, where a shop had large doors blown out and a church had the roof partially removed. At Morningview Drive and Hood Drive, several homes had significant roof damage and numerous trees were uprooted. A shed was blown several yards and destroyed, a fence was blown down, and one home had failure of the west facing garage door which caused the roof to be removed and walls to collapse. More trees were uprooted in a wooded area before the tornado moved along Patterson Street. Here, one home sustained roof damage, a silo was damaged, a metal shed had significant damage to the southeast corner, and a tree fell through another homes backyard privacy fence. Many hundred-year-old trees were uprooted around both homes. Another home was damaged by a falling tree at the corner of Patterson and Church Road. More trees were uprooted along Parkway Drive and Alexander Drive. Two pine trees fell through two manufactured homes on Alexander Drive and two injuries were reported in one of the manufactured homes. A few more pine trees were uprooted, with smaller limbs snapped off as well, across Kristie Lane and Oak Drive. At Horton Circle, numerous trees were uprooted, and a house sustained minor shingle damage. The tornado lifted near the intersection of Broadwell Road and Sardis Drive.

ETOWAH COUNTY --- 1.8 S HOKES BLUFF [33.97, -85.86]

04/01/23 04:26 CST			0	Thunderstorm Wind (EG 50 kt)
04/01/23 04:27 CST			0	Source: Public

Several trees uprooted near the intersection of Colvin Gap Road and Ford Valley Road.

ETOWAH COUNTY --- 3.8 SE BALLPLAY [34.01, -85.77]

04/01/23 04:33 CST			0	Thunderstorm Wind (EG 50 kt)
04/01/23 04:34 CST			0	Source: Public

Several trees uprooted near the intersection of Tom Cat Road and Beaird Road.

A very dynamic Spring storm system over the Upper Midwest states produced conditions favorable for tornadoes over northwest

Storm Data and Unusual Weather Phenomena - April 2023

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Alabama during the early morning hours on April 1st, and strong gradient winds throughout the day.

GREENE COUNTY --- 0.7 N SNODDY [33.04, -87.88]

	04/03/23 16:04 CST		0	Hail (1.00 in)
	04/03/23 16:05 CST		0	Source: Public

Quarter size hail reported near the intersection of Joseph Wilder Road and Highway 191.

MONTGOMERY COUNTY --- 0.9 SW CHISHOLM [32.39, -86.26]

	04/06/23 15:43 CST		0	Hail (1.00 in)
	04/06/23 15:44 CST		0	Source: Public

Quarter size hail reported in the city of Montgomery.

A persistent zone of deep layer shear over the Gulf Coast region and moderate mid level lapse rates produced conditions somewhat favorable for large hail.

FAYETTE COUNTY --- 1.9 ENE STOUGH [33.71, -87.72], 3.8 N BANKSTON [33.73, -87.68]

	04/21/23 18:34 CST		0	Tornado (EF0, L: 2.28 mi , W: 125 yd)
	04/21/23 18:39 CST		0	Source: NWS Storm Survey

National Weather Service meteorologists surveyed damage in northeast Fayette County and determined that it was consistent with an EF 0 tornado, with maximum winds near 80 mph. The tornado touched down just west of County Road 77 with minimal tree damage. Several tree limbs were downed and a couple of trees were uprooted across a pasture as well. Along County Road 101 at Piney Grove Road, a few trees and tree limbs were downed, with a small tree falling on a small detached carport, knocking it down. Several trees were uprooted around a house on Piney Grove Road, and numerous trees were uprooted in an inaccessible area between Piney Grove and Avery Gray Road. Along Heartline Road, a couple of trees were uprooted and some roofing was peeled up on an older manufactured home. At Rocky Hill Drive, numerous small tree limbs were scattered throughout a field and a large limb was broken out of a pine tree. A small pine tree was uprooted along County Road 67 as the tornado lifted.

A line of strong thunderstorms moved into west Alabama early Friday evening, April 21st, ahead of an approaching cold front. A brief weak tornado developed over northeast Fayette County along a break in the line of thunderstorms.

PIKE COUNTY --- GOSHEN [31.72, -86.12]

	04/26/23 16:34 CST		0	Thunderstorm Wind (EG 50 kt)
	04/26/23 16:35 CST		0	Source: 911 Call Center

Several trees uprooted in the Goshen area.

PIKE COUNTY --- TROY [31.80, -85.97]

	04/26/23 16:44 CST		0	Thunderstorm Wind (EG 50 kt)
	04/26/23 16:46 CST		0	Source: 911 Call Center

Several trees uprooted in the city of Troy.

An east to west band of thunderstorms moved across southern Alabama ahead of a warm front. A severe thunderstorm developed over Pike County in the late afternoon and produced wind damage.

TUSCALOOSA COUNTY --- 4.2 S SAMANTHA [33.36, -87.61]

	04/27/23 19:54 CST		0	Hail (0.88 in)
	04/27/23 19:55 CST		0	Source: Trained Spotter

Nickle size hail reported between Northport and Samantha along Highway 43.

A weak surface low moving northward across eastern Mississippi produced a few thunderstorms across west Alabama during the evening hours on Thursday, April 27th. Mid level lapse rates increased to near 7 degrees Celsius which allowed for the production of large hail in Tuscaloosa County.

ALABAMA, North

MADISON COUNTY --- 0.5 NE FISK [34.97, -86.57], 1.7 NW FAIRVIEW [34.99, -86.50]

	04/01/23 02:09 CST	1	0	Tornado (EF3, L: 4.49 mi , W: 215 yd)
	04/01/23 02:16 CST	5	0	Source: NWS Storm Survey

Storm Data and Unusual Weather Phenomena - April 2023

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>The tornado began west of Highway 431 and south of Elkwood Section Road where multiple trees were uprooted and several trees fell on homes. On the east side of Highway 431, near the Lincoln Road intersection, numerous structures were heavily damaged including multiple stores which sustained major damage. This includes a collapse of walls and roofs displaced with debris thrown eastward. Given the degree of damage at this location, a mid-range EF-3 rating was reported. The tornado tracked east-northeast through Mulberry Road. Along this path, the tornado uprooted and snapped numerous trees and caused significant roof damage to a single-family home. Unfortunately, the tornado continued to intensify on route to Borderline Road which is along the Alabama and Tennessee state line. At this location, heavy damage was noted where houses were damaged and two homes experienced a complete collapse of walls, destroying the structures. One fatality was reported at a single-family home along Borderline Road where the structure was destroyed. In addition, HEMSI reported five injuries, three of which were transported to the hospital with critical injuries and two were treated on scene with minor injuries.</p>				

Direct Fatalities: F90PH

MADISON COUNTY --- 0.5 SW MADISON CO JET PORT [34.64, -86.79]

04/01/23 02:18 CST	0	Thunderstorm Wind (MG 56 kt)

Trees were snapped or uprooted at the 2700 block and 3500 block of CR 44.

JACKSON COUNTY --- 3.4 SE DAVISTOWN [34.51, -85.98]

04/01/23 03:20 CST	3K	Thunderstorm Wind (EG 52 kt)
04/01/23 03:20 CST	0	Source: Emergency Manager

Trees were knocked down on CR 415 in the Macedonia areas.

As part of a larger regional outbreak of severe thunderstorms and tornadoes on March 31st into April 1st, a band of thunderstorms, many of them supercellular, pushed east across north Alabama and southern middle Tennessee during the early morning hours of the 1st. One of these thunderstorms produced an EF-3 tornado in northern Madison County along the Tennessee State Line. Other thunderstorms produced wind damage across parts of Madison in Jackson Counties of north central into northeast Alabama.

COLBERT COUNTY --- 2.4 ESE PICKWICK LAKE [34.84, -88.06]

04/21/23 16:40 CST	1K	Thunderstorm Wind (EG 43 kt)
04/21/23 16:40 CST	0	Source: State Official

A tree was knocked down at the intersection of Buchanan Peninsula road and Riverton Rose Trail road. Time was estimated from radar.

COLBERT COUNTY --- 2.8 SSE PICKWICK LAKE [34.81, -88.09]

04/21/23 16:40 CST	1K	Thunderstorm Wind (EG 43 kt)

Storm Data and Unusual Weather Phenomena - April 2023

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A tree was knocked down at 4090 Riverton Rose Trail road. Time was estimated from radar.

MADISON COUNTY --- 0.7 S DEPOSIT [34.84, -86.47]

04/21/23 18:53 CST			0	Hail (1.00 in)
04/21/23 18:53 CST			0	Source: Public

Hail up to quarter size was reported on River Walk Trail off of Winchester road. Time was estimated by radar.

CULLMAN COUNTY --- 1.3 ESE EBENEZER [34.24, -86.91]

04/21/23 20:03 CST			1.20K	Thunderstorm Wind (EG 48 kt)
04/21/23 20:03 CST			0	Source: Public

A tree was knocked down and a trampoline moved along Cullman CR 1193.

A band of showers and thunderstorms pushed east across north Alabama during the evening hours, out ahead of an advancing cold front and upper level disturbance. A few of the thunderstorms produced gusty winds of 30 to 40 mph, but a couple also produced gusts that knocked down a couple of trees. One storm produced up to quarter sized hail between Huntsville and New Market in Madison County.

(AL-Z001) LAUDERDALE

04/24/23 05:00 CST			0	Frost/Freeze
04/24/23 07:00 CST			0	

Widespread frost developed during the early morning hours after clouds exited the region in portions of northwestern Alabama. Temperatures dropped into the mid 30s.

CULLMAN COUNTY --- 0.6 W CULLMAN [34.18, -86.84]

04/28/23 00:45 CST			0	Thunderstorm Wind (EG 61 kt)
04/28/23 00:45 CST			0	Source: Broadcast Media

A news article reported that one third of a roof at the Stiefelmeyer Building was blown away . A power pole between First and Second Avenues was splintered and an unspecified number of vehicles were damaged. Debris blown from the building damaged surrounding businesses and areas. Three buildings of Margo's Antiques and Gifts experienced damage .

CULLMAN COUNTY --- 0.9 NW ST BERNARD [34.19, -86.81]

04/28/23 00:45 CST			0	Hail (2.00 in)
