FOR IMMEDIATE RELEASE  
National Weather Service Brownsville, TX  
February 24, 2021

Rick Hallman  
Fire Weather Program Leader  
956-504-1432, ext. 2

## Clarified Version of the Fire Danger Statement Begins March 1, 2021

As part of the National Weather Service's effort to simplify hazardous weather text products, NWS Brownsville/Rio Grande Valley has modified the Fire Danger Statement (World Meteorological Organization code FNUS64 KBRO RFDBRO) to match a bullet point format that is currently used in most other hazardous weather text products, including the related Red Flag Warning and Fire Weather Watch. The new format replaces the paragraph style with bullets (\*), which will include the following parameters:

- Timing
- 20 Foot Wind
- Relative Humidity
- Fuel Condition
- Impacts

An example of the new simplified version can be found [here](#). For comparison, the prior version can be found [here](#).

NOAA understands and predicts changes in the Earth's environment, from the depths of the ocean to the surface of the sun, and conserves and manages our coastal and marine resources. Visit <http://www.noaa.gov>.
