

CoCoRaHS Rain Gauge Rally 2026 for the Rio Grande Valley and Nearby Ranchlands

The 2026 Rain Gauge Rally continues through April 30th! As of April 20th, we've signed up 19 new observers across the Valley, with a majority in Hidalgo County - which is the county where we need to fill in the most gaps. But *every county* we serve matters - from the four counties in the RGV (Cameron, Hidalgo, Starr, Willacy) to our ranchlands of Zapata, Jim Hogg, Brooks, and Kenedy County.

Let's "win" the rally for Texas in 2026! As of April 20th, Texas ranked third in overall new sign-ups, with 59. The **Valley accounted for 32% of the new signings**; if we keep up these efforts, we could overtake Minnesota for first place. Joining is easy. Here's what you need:

- A high-capacity 4" diameter rain gauge. Order yours [here](#).
- A location on your property not blocked by buildings or trees
- A way to mount, typically onto a wood, metal, PVC, or plastic post/pole that you can anchor firmly into the ground
- Internet access to report each morning or for special situations (such as torrential rains over a short period of time)
